

Table S4. Population pairwise average Fst for *Ipomoea pes-caprae* calculated from seven low-copy gene sequences

Population pairs within a rectangle of dotted lines show the ones within a geographic region employed in this study (names of regions are shown in gray letters).

	1	2	3	4	5	pes-caprae													
1. UAE																			
2. Sri Lanka A						0.45													
3. Sri Lanka B						0.42	0.25
