

**Kris Kitchen**

Yeah, I am sure he will get this message. 11:52 AM

**Kris Kitchen**

you having a good day?

**Drew R**

hanging in there my friend, working on a piece i'm composing for my g/f on piano yourself?

**Kris Kitchen**

thats cool.

its ok.

your day is about to be augmented. I suspect your about to get a linkedin invite and or an email.

**Drew R**

oh realllly?

my linkedin profile needs a lot of work, maybe i should spend some time on that

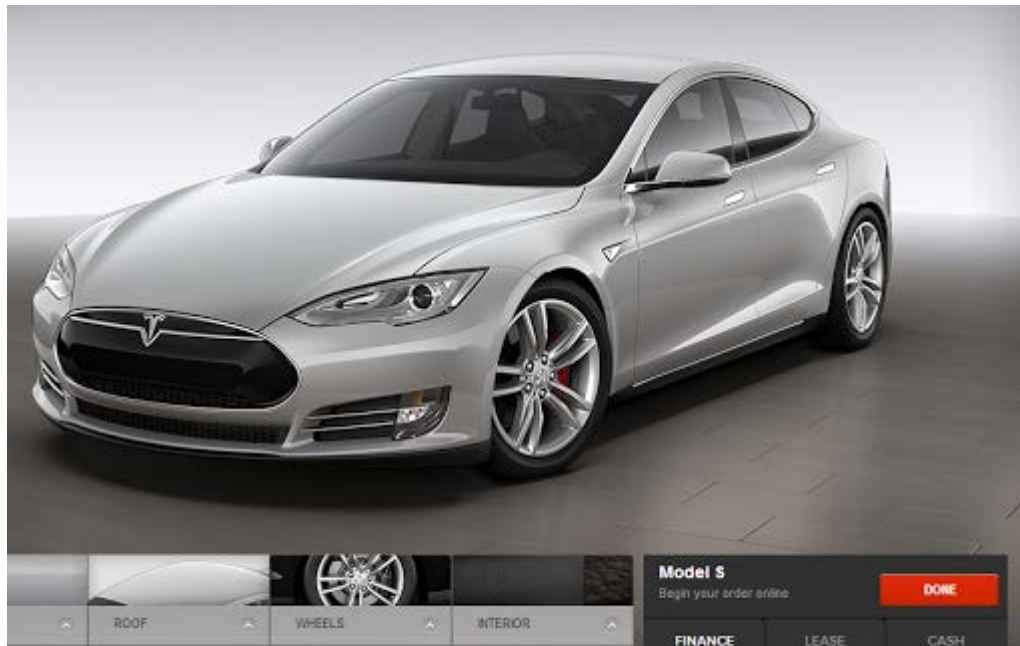

**Kris Kitchen**

you will.

**Drew R**

already am

**Kris Kitchen**

**Drew R**

You goin' for it?

**Kris Kitchen**

I am going to go the real hard route.

My art may not be worth much, but my message is much more valuable on many levels.

**Drew R**

Your art is worth a great deal, imho

But I do agree that your ideas/message is more easily marketable

**Kris Kitchen**

this is the part where wonder comes into play.

it borks so much because a trade isnt taxable.

so there is no sales tax.

**Drew R**

hmmm

**Kris Kitchen**

its a epic monkey wrench

the piece of art on printed media.  
the thing I can "sign"

**Drew R**

that definitely exists  
those are all over art museums  
and galleries

**Kris Kitchen**

what is?

**Drew R**

pieces of art on printed media, signed by the creator working in mixed mediums

**Kris Kitchen**

but I have never signed or created any of my mosaics.

I printed 2. I never signed them

**Drew R**

that doesn't make them any less "yours"

it just makes them less valued by traditional art standards because of the lack of provenance it creates

**Kris Kitchen**

so if I sign them they become worth more as long as the history of signatures is maintained in a ledger.  
as long as I don't sign everything.

**Drew R**

as long as the veracity of the signature is verifiable

**Kris Kitchen**

humm

**Drew R**

or rather the veracity of the piece

the signature is one part of that, and with printed digital media, a big one

**Kris Kitchen**

2 part authentication literally that has not happened.

what a quantum mind.

mindfuck

**Drew R**

haha

**Kris Kitchen**

"he took the time to sign it"

**Drew R**

that applies more to something that's mass-produced

e.g., a signed first-edition is worth more than a first-edition lacking a sig.

**Kris Kitchen**

exactly, someone could make millions of prints of my mosaics, I may never know.

But it is currently in an impossible state that I have signed one.

**Drew R**

well, the way most digital photographers control that is by not distributing the full resolution  
or with digital watermarking

**Kris Kitchen**

yep, but I did not do any of that.

because I wanted to literally sign them.

**Drew R**

well then that will be \_the\_ thing that sets it apart

**Kris Kitchen**

they can live in the machine but will never be signed unless X happens

maybe I am thinking too much about nothing.

**Drew R**

i'm not a good person to come to with that question at the moment....third day in a row with less than 3  
hours sleep

starting to get to me

**Kris Kitchen**

whoa, man

**Drew R**

yeah and not because ive been partying or anything

**Kris Kitchen**

that sucks bad

**Drew R**

just my sleep schedule has been strung up and down like a yo-yo as my various docs adjust the various drugs that allow me to actually function in one way or another

yeah it gets frustrating

**Kris Kitchen**

yeah I bet.

they entity on the planet that can make something impossible is man.

**Drew R**

i have no idea what that means

**Kris Kitchen**

it means anything is possible until someone makes it impossible.

**Drew R**

i think nature has that power

**Kris Kitchen**

and I am currently in an impossible state as I have not signed any "art"

**Drew R**

one cannot defy the laws of physics (if one could truly know them)

**Kris Kitchen**

I think the can.

correction

I know they can.

**Drew R**

then what they thought was a law isn't a law

if it can be broken, it's not a law

**Kris Kitchen**

yep

like a yes/no question. there are 2 options, but actually there are 3

the 3rd is to not answer the question.

**Drew R**

i need to take a break from my desk...i'm going to take glass and my phone out to my porch and chainsmoke for a bit

**Kris Kitchen**

k

**Drew R**

not answering the question is not itself an answer to the question, just a reaction to it

it's outside the question

it's a meta-response

**Kris Kitchen**

yes = 1, No = 0

not answering =

**Drew R**

and refusing to answer the question lies outside the set of possible answers; it doesn't actually qualify as an answer

**Kris Kitchen**

it trigger the wonder of why it was not answered

was it a mistake? was the question dangerous? was the question embarrassing? was the question too critical?

**Drew R**

those are questions about the question itself

**Kris Kitchen**

was there logic to not answering the question...

**Drew R**

rather than possible actual answers to the questions  
proposing that there is a third way to answer the question in not answering the question is not logically  
valid because it denies the set of all answers to the question being 1 or 0 or yes or no

**Kris Kitchen**

humm

this is a wierd scenario that I think people have thought about a lot or not much.

**Drew R**

I would say a lot. Georg Cantor would have to say about it  
would have alot to save  
god damn this voice recognition cannot get anything right when there's all this construction outside

**Kris Kitchen**

let me see who this is

**Drew R**

he's the father of set theory  
who also by the way happened to go insane

**Kris Kitchen**

that can happen thinking about things like this

**Drew R**

yes it certainly can. I also think that mines the gravity towards these kinds of thoughts are already  
teetering on the brink so to speak  
or at least the kind of mine it takes to think these kinds of thoughts really has to be able to see outside of  
the box and once you see things outside of the box and just how far things outside of it go is there's really  
no stopping

**Kris Kitchen**

that is correct

**Drew R**

I recommend the book everything and more a brief history of infinity by David Foster Wallace  
I think you'd find it absolutely fascinating  
wait the title is everything and more in a brief history not a brief history a compact history of infinity  
aside from being a phenomenal fiction writer he was also a phenomenal logician  
dude holy shit you seriously recommended me to Eric Klein on LinkedIn?

**Kris Kitchen**

I told you your day was about to get better. 😊

**Drew R**

indeed! I can't even believe that he would bother to look at my profile

**Kris Kitchen**

I can

**Drew R**

you flatter me kind sir

**Kris Kitchen**

**Drew R**

ok, something must be made of this day, i feel newly energized  
though the feeling won't last long without caffeine, i fear  
so i must now shower and go out in search of it  
back soon.....

**Kris Kitchen**

k. take it easy.

**Drew R**

first i'm going to write a message to eric klein telling him how incredible i think the lifeboat foundation is

**Kris Kitchen**

So the unknown question gets answered it appears.  
the question was not defined until it was realized.  
*Pre-Cognitive Thinking and Pre-Cognitive Realisation*

**Drew R**

whattttt the fuck  
did you just read my mind?  
i was just double-checking the spelling of a word i'm using

**Kris Kitchen**

i do not know.

**Drew R**

presience

**Kris Kitchen**

yes

**Drew R**

whoa

i'm going to think on that while i shower

**Kris Kitchen**

same here.

**Kris Kitchen**

I think something strange happened. I do not belived it has ever been documented.

**Drew R**

on the phone w/ g/f be there in a min

**Kris Kitchen**

no worries

1:06 PM realization began

**Drew R**

ok i'm headed up to a coffee shop w/ glass and my laptop so hit me up on here with your realization and  
i'll read it as I travel and respond when I get there

**Kris Kitchen**

check out the history of this hang out and look at a time at 1:06 p.m.

**Drew R**

will do as soon as I can

**Drew R**

your realization came when you asked me if I was having a good day?

oh time zone difference

that's 1:06 my time

**Kris Kitchen**

should be on the same time zones..

cst.

**Drew R**

well 1:06 is when you asked me if i was having a good day

**Kris Kitchen**

yeah, just after that

@1:08

then @ 1:10

**Drew R**

ah i see what you mean!

your own presience

that came to pass relatively shortly thereafter!

**Kris Kitchen**

strange but logical.

**Drew R**

yes, absolutely

**Kris Kitchen**

did all 3 of those actually happen?

I know linked in was updated, I know he contacted you on linked in.

did he email you?

**Drew R**

no, not email

not yet, anyhow 😊

**Kris Kitchen**

lol

if all 3 happened then I would start to get creeped out.

This thread:

<https://www.glass-community.com/t5/Discussions/Small-observation-that-leads-epic-solution/m-p/147959#M38793>

read that mess, then I will throw a curve ball.

**Drew R**

ok, i read it

throw your curve ball

**Kris Kitchen**

choo choo = lifeboat foundation

**Drew R**

(btw, one could argue that you did not precognitavely anything that eric kien would send me a linkedin invitation/email as you knew that you had already sent him a request to contact me, thus giving you prior knowledge that it would happen, though i can't explain how you expected it to happen today)

but go on

we can explore my tangent later yours sounds more interesting

**Kris Kitchen**

so say I did not know he would contact you today. which it did not know. but i deducted he would. that does not explain how or why your vision came true.

I am just a crazy guy, why would anyone listen to me. 😊

**Drew R**

you're already a part of his foundation, i'd hope he'd listen to you!

**Kris Kitchen**

But I do not know how I got there, so that means I do not know how you were contacted.

**Drew R**

but i had no vision until you, who had foreknowledge of the possibility, even probability of his contacting me, put it in my head

faulty

just because you don't know how you got to a corner

**Kris Kitchen**

But you did have a vision. Or this wouldnt have happened at all.

Did I notice it before you?

**Drew R**

just because you got to a corner without knowing how, doesn't mean that you don't know why crossing against the light resulted in being hit by a bus

**Kris Kitchen**

if so did I change the future or make it?

**Drew R**

they are one and the same

**Kris Kitchen**

but how did I realise you had a vision when you did not realise you had the vision?

**Drew R**

my excitement for you when you became a part of the foundation?

**Kris Kitchen**

maybe

So the question is

from that thread: Kris, is the difference between scenario 1&2 the strength of the girl's will or the awareness level of the man?

Must both collide for the train to appear?

I do question the girl's intuition. Is she seeing into the future or creating it? I guess this depends on whether you believe the singularity has already occurred or not.

**Drew R**

i think she is creating it in equal parts with the man  
they BOTH create it  
through a set of circumstances

**Kris Kitchen**

So was it the strength of your will or my level of awareness?

**Drew R**

i'm a multiverse guy; in my opinion, there is likely an infinite number of universes, and in each every possible state of being will come to be  
it was your level of awareness in our case  
but who knows  
because it may have been helped along by the fact that i spent a few hours adding things to my profile skills  
that had they not been there, he wouldn't have contacted me

**Kris Kitchen**

humm. stange indeed.

**Drew R**

which i wouldn't have done if you hadn't mentioned it

**Kris Kitchen**

so what happened was proven without money, and over the internet, I have also proved it out of the internet.

**Drew R**

i believe time travel to the past is possible, but not to the future; the future and the present are one and the same in my view of time

**Kris Kitchen**

remember when I asked you about a man that went the speed of light, and could see all iterations of himself, and they all looked at eachother and made the exact concious same choice?

**Drew R**

yes  
but a man travelling at the speed of light will, possibly, be both at the front AND back of that "line"

**Kris Kitchen**

something wierd going on.. I dont know what or how it works  
I am doing that really batshit crazy things  
So.. humm

**Drew R**

the future consists of the ever-unfolding present  
and thus we make it  
we create it AND know it before it happens, for it happens because of (or in spite of) us

**Kris Kitchen**

I have no idea. wierd

**Drew R**

nice shirt - i'd wear the hell outta that

**Kris Kitchen**

yeah, finally ordered one. its my mosaic,

**Drew R**

i noticed

**Kris Kitchen**

So the question must be, does everyone have the ability to recreate the situations I have?

**Drew R**

no

that much is clear to me

not in our world

**Kris Kitchen**

then i have a special ability?

**Drew R**

you have a unique (and uniquely brilliant) mind

**Kris Kitchen**

So what does one do with this ability. humm.

**Drew R**

this is the t-shirt i'm wearing now, though in a darker color

<http://ep.yimg.com/ay/guggenheim/rotundashirt-2.jpg>

**Kris Kitchen**

so is this ability a superhuman ability or just an ability

**Drew R**

i don't know

but i just met the guy from this website, while he was wearing a cape and shooting a

video: [www.urbangliders.com](http://www.urbangliders.com)

**Kris Kitchen**

I have to check this out on a minute I'm driving

**Drew R**

haha okay take your time and

**Kris Kitchen**

I have a superhuman ability to make people happy

that has to be the weakest link superhuman ability ever I mean look at the Xmen and they have like crazy stuff that they can do and then I get out of this ability and its like okay

**Drew R**

ridiculousness

**Drew R**

That's adb amazing superhero

Power

**Kris Kitchen**

its something. lol

that glider is cool

**Drew R**

yeah it's actually pretty interesting

**Kris Kitchen**

I am Agent X.

**Drew R**

Lol

**Kris Kitchen**

zazzle ad is lol

**Drew R**

lol yeah its not the best

**Kris Kitchen**

those are all mine except for the 4th shirt

**Drew R**

yeah i didn't figure you for the 4th one

lol

**Kris Kitchen**

lol

I was like that is extreemly out of place

**Drew R**

why is that one mixed in there?

yeah

seriously

just to appeal to a wider audience?

**Kris Kitchen**

singulartiy, singulartiy, singularity, fiction? what

**Drew R**

lol

i got the email

inviting me to join lifeboat's advisory board

**Kris Kitchen**

what

**Drew R**

yep

**Kris Kitchen**

your fucking with me

**Drew R**

nope

**Kris Kitchen**

um

**Drew R**

Drew,

We were wondering if you would like to join the Lifeboat Foundation Advisory Board as shown at <http://lifeboat.com/ex/board>

We just had Ray Kurzweil and Nobel Laureates Daniel Kahneman, Eric S. Maskin, Richard J. Roberts, and Wole Soyinka join our Board so you would

have some good company!

Eric Klien

Lifeboat Foundation

+1 (775) 853-5212 Voice

+1 (775) 853-5214 Fax

Skype ID lifeboathq

Twitter lifeboathq

<http://lifeboat.com>

**Kris Kitchen**

ummm

ok

so

that just happened

**Drew R**

yeah seriously

here was my reply:

**Kris Kitchen**

and now I need to recalculate

**Drew R**

It would be my great pleasure to join your Lifeboat Foundation Advisory Board in any capacity in which I might be helpful. I'm honored to say so, and look forward to helping humanity through your frankly amazing Foundation. In short, I would love to, and am incredibly grateful for the offer. Please let me know how I might be of service to your Foundation and, by extension, to my fellow human beings.

**Kris Kitchen**

so that was 7 hrs of latency.

**Drew R**

only 6

**Kris Kitchen**

the odd of me making those predictions are next to impossible

**Drew R**

i got it an hour ago

**Kris Kitchen**

at that point did you mind explode?

cuz mine just did

**Drew R**

it sure as fuck did

**Kris Kitchen**

holy shit

**Drew R**

i can't believe that I was invited to join

**Kris Kitchen**

I can

whoa

**Drew R**

whoa is right

**Kris Kitchen**

it think precognitive realization is actually reproducible.

quantum thought

I know its reproducible

**Drew R**

Just be careful

don't mistake coincidence for miracle

**Kris Kitchen**

I have been

**Drew R**

not that this is coincidental, really

**Kris Kitchen**

this is an anomaly

**Drew R**

i'm just saying lay the groundwork for your theory very very carefully

**Kris Kitchen**

I am

what an epic day. I don't think I am going to publish any data on this.

I am not going to

**Drew R**

it has been an epic day

i woke up from a crazy nightmare at 4AM this morning

and did not expect my day to progress in any such manner

**Kris Kitchen**

Well I did say I have a passive ability to make people happy.

Well. the fun part is that 99.999999999% of people wouldn't believe it anyway

**Drew R**

hahaha

that is probably true

but hey, what percentage of people still don't believe darwin?

**Kris Kitchen**

true

I think science just happened

"spooky" science

**Drew R**

spooky action at a distance

**Kris Kitchen**

this is some really hard shit to process

I need a better processor. lol.

stupid mind

well there goes the "machine" they

hey, you just got invited to a board with some of the best minds in the world.

literally

**Drew R**

i know, right?!

seriously, if i wasn't so sleep deprived, i'd be saying things to people like "ray kurzweil, bitch!"

**Kris Kitchen**

I can't believe he highlighted Ray.

i did it again

**Drew R**

haha

**Kris Kitchen**

this is epic

**Drew R**

hell yeah it's epic!

seriously man i'm telling if it weren't for the fact that my body is physically shutting down, and crashing from my insane caffeine high from earlier this afternoon, i might actually call \_my parents\_

i don't EVER call my parents

**Kris Kitchen**

lol

what is that " call \_my parents\_ "

underscore mean?

**Drew R**

oh, that's the italicize command in G+

used to work in hangouts

dunno why it doesn't anymore

**Kris Kitchen**

ok, that makes sence now.

**Drew R**

this has been one nutty day

**Kris Kitchen**

yeah man

**Drew R**

i'm not sure i'm going to believe it when i wake up tomorrow

**Kris Kitchen**

welcome to my world

**Drew R**

hopefully not at 4 am again

haha oh shit your world? i'd better strap in

**Kris Kitchen**

i could not imagine you not sleeping well after today

**Drew R**

yes, there is little that troubles me just now

god i wish i could ditch this body and be purely my mind

but if i try and meditate i'm going to fall asleep lol

**Kris Kitchen**

go recharge.

**Drew R**

i'm going to - it's time enough that i did

have a good night, my friend

**Kris Kitchen**

yeah, take it easy!

Tuesday, July 29, 2014 9:15 AM

**Drew R**

did yesterday happen?

**Kris Kitchen**

yep

I confirmed it with the wife that was infact " some fucked up shit"

**Drew R**

haha

just checking because i was pretty ready to believe these emails in my inbox were a hoax

damn though, what a good night's sleep won't do for you in terms of clarity! i'm off to compose a

scherzo! good morning to you, mein Freund!

**Kris Kitchen**

Wednesday, July 30, 2014 7:56 PM

**Kris Kitchen**

More I have.

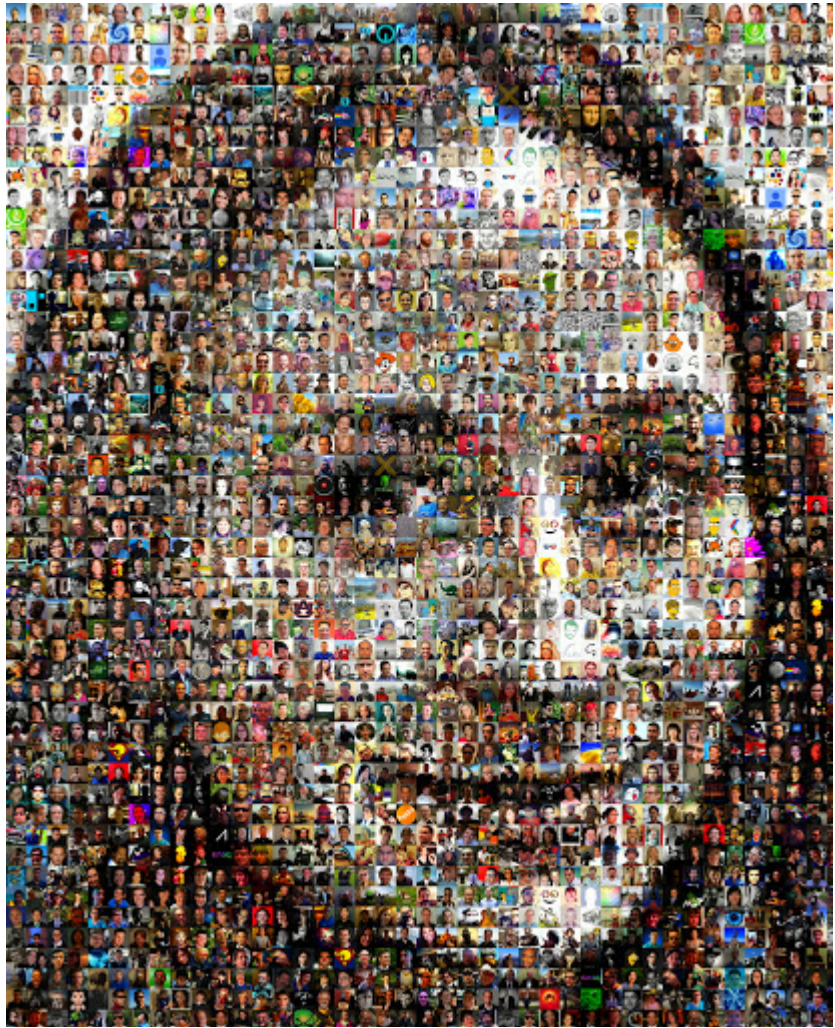

**Drew R**

Yoda you are?

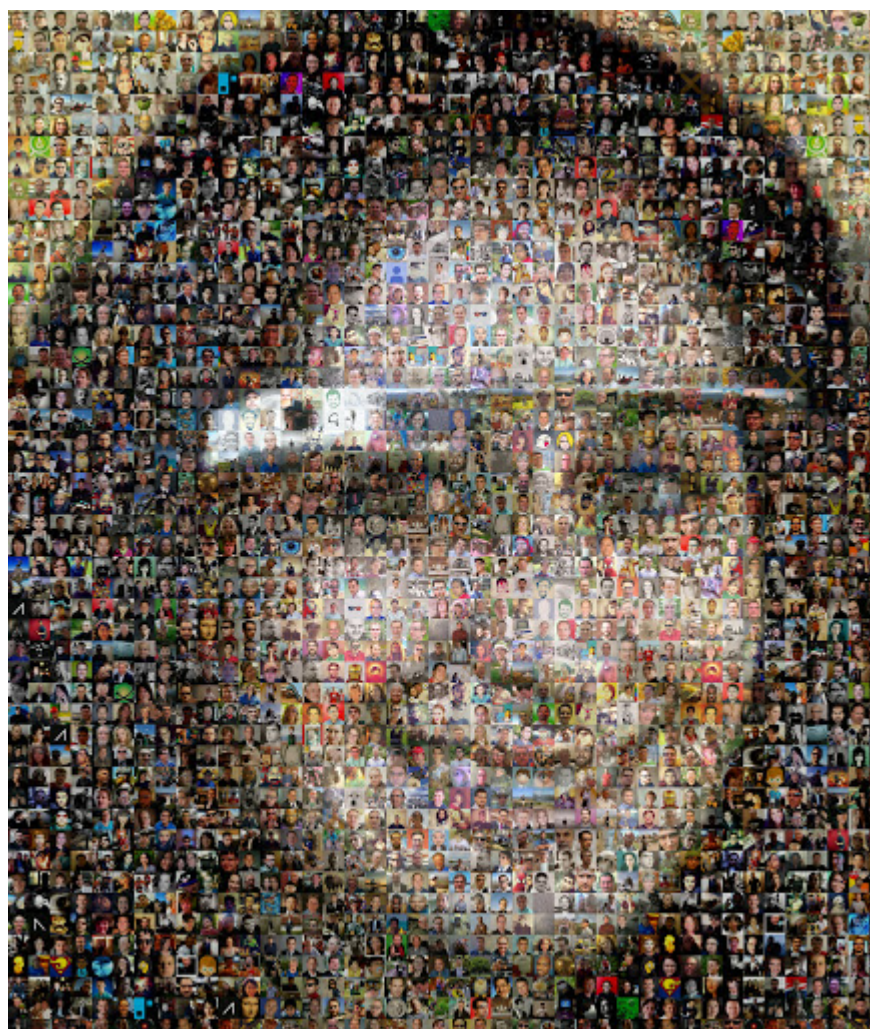

**Kris Kitchen**

maybe

this picture:

**Drew R**

Your Teresa/Mona Loss Lisa pictures?

**Kris Kitchen**

yes

so they mean nothing until:

you look at the dates

1/21/14

no big deal right?

just some strange shit

kind of look the same

but other than that.. nothing out of the ordinary. Correct.

**Drew R**

Right
