

BUILDING SMART MICROSCOPES

CHAS NELSON

WHY?

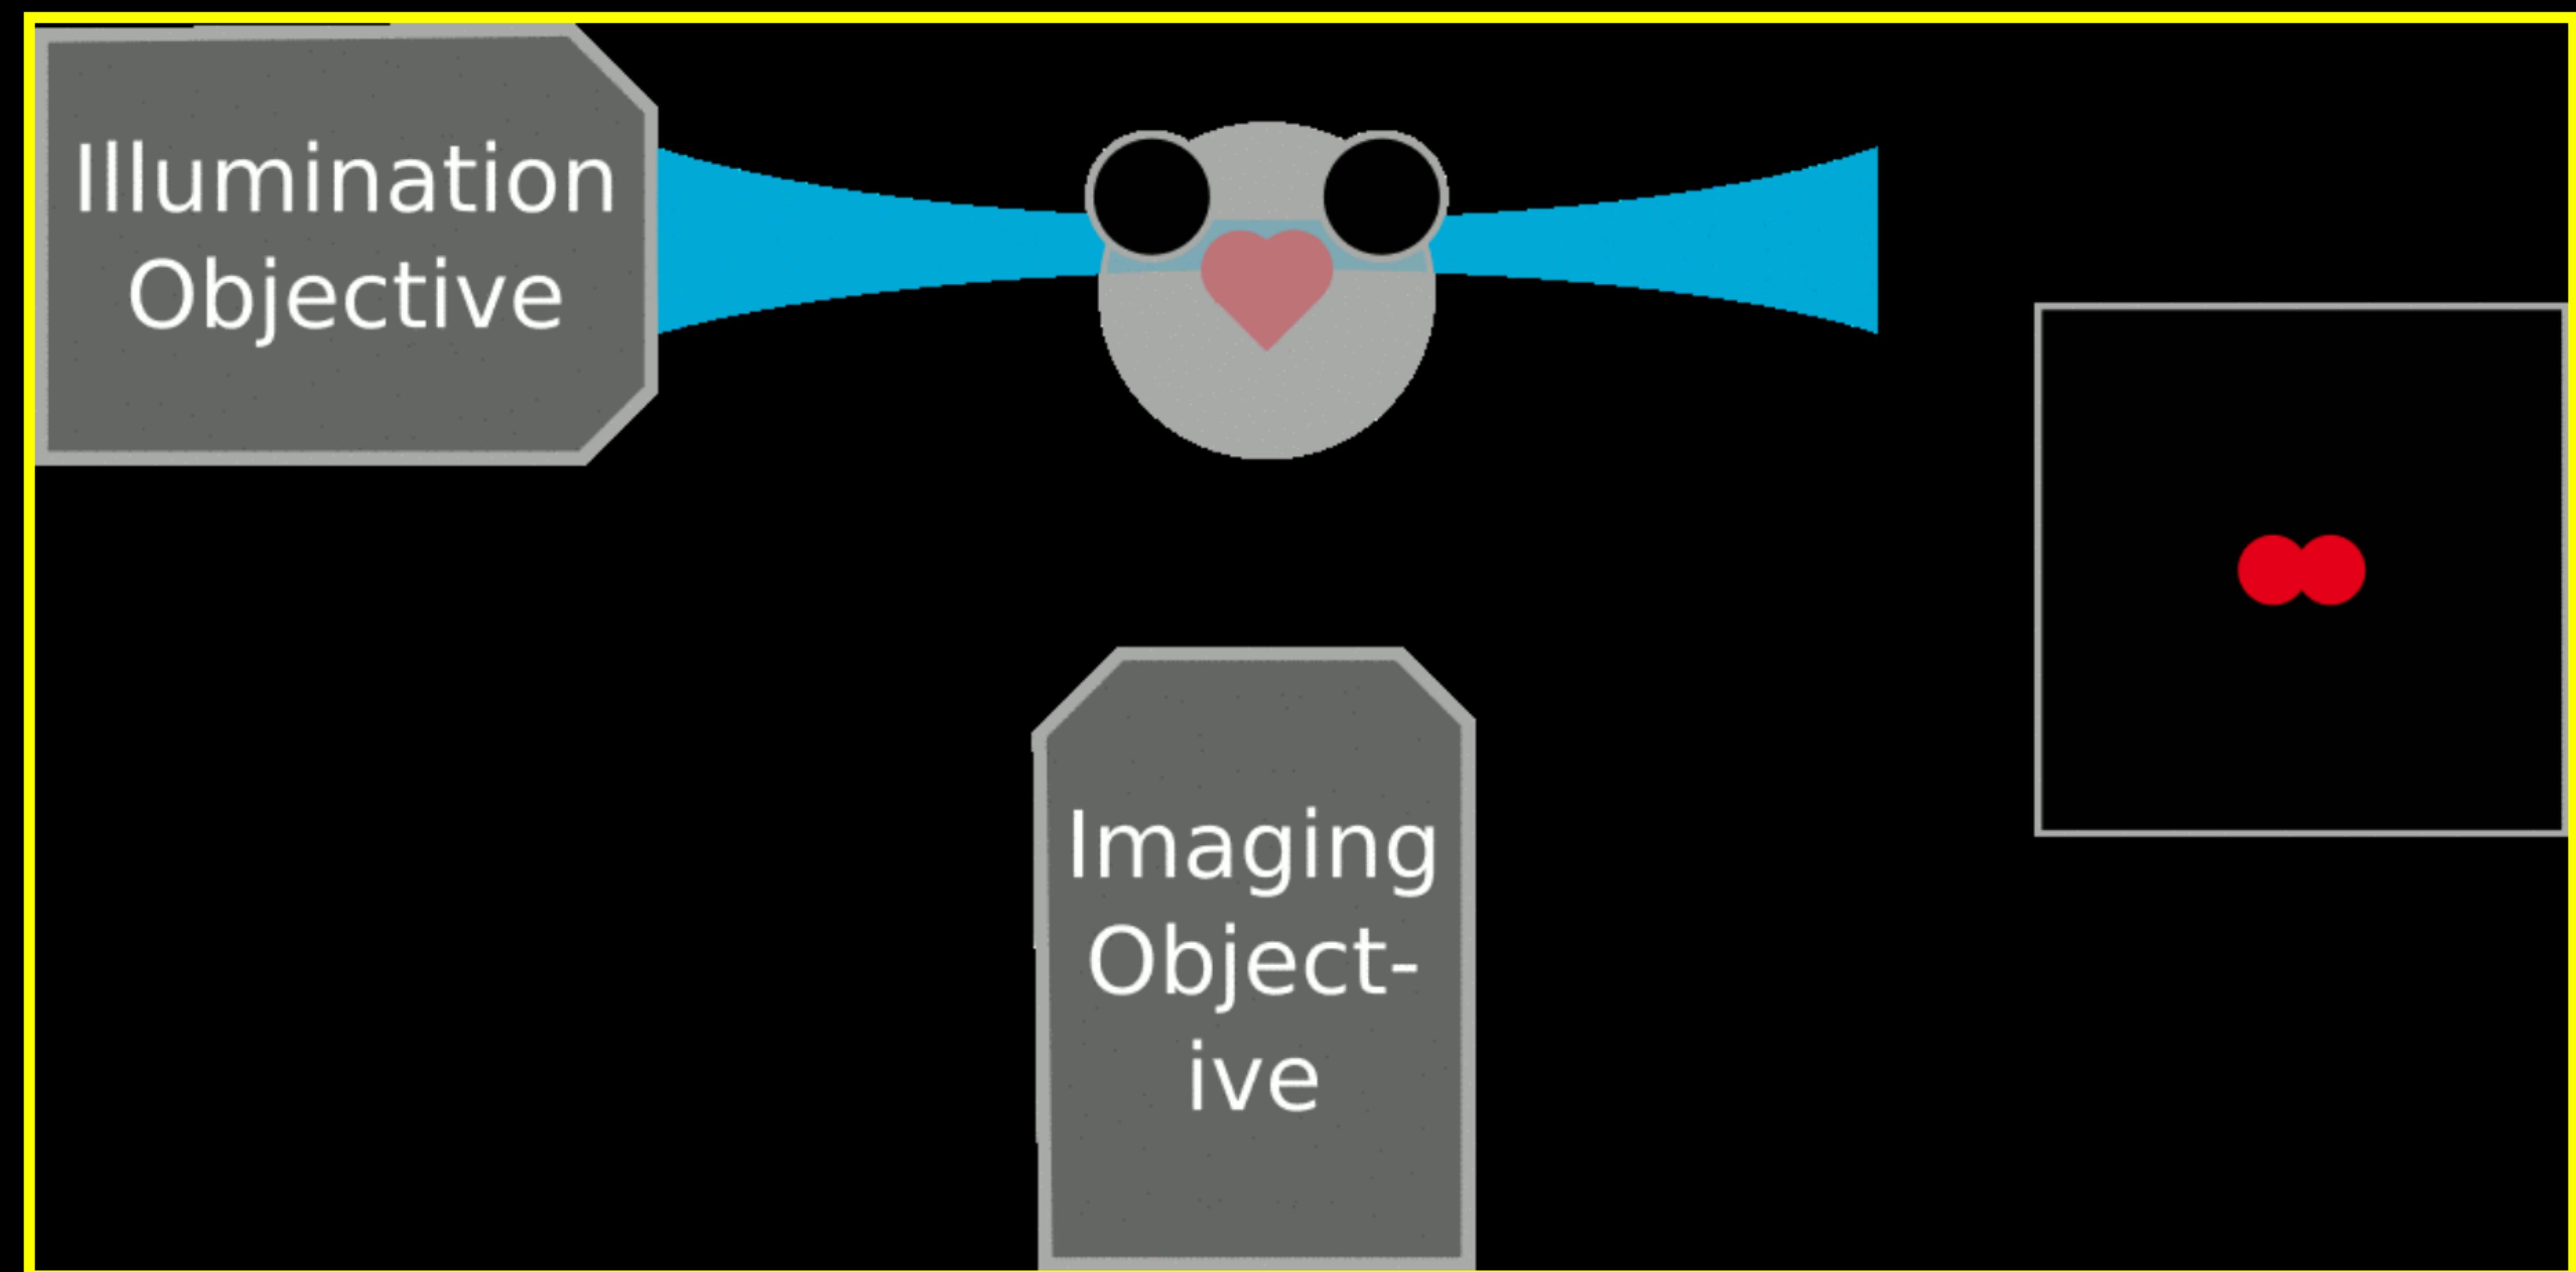

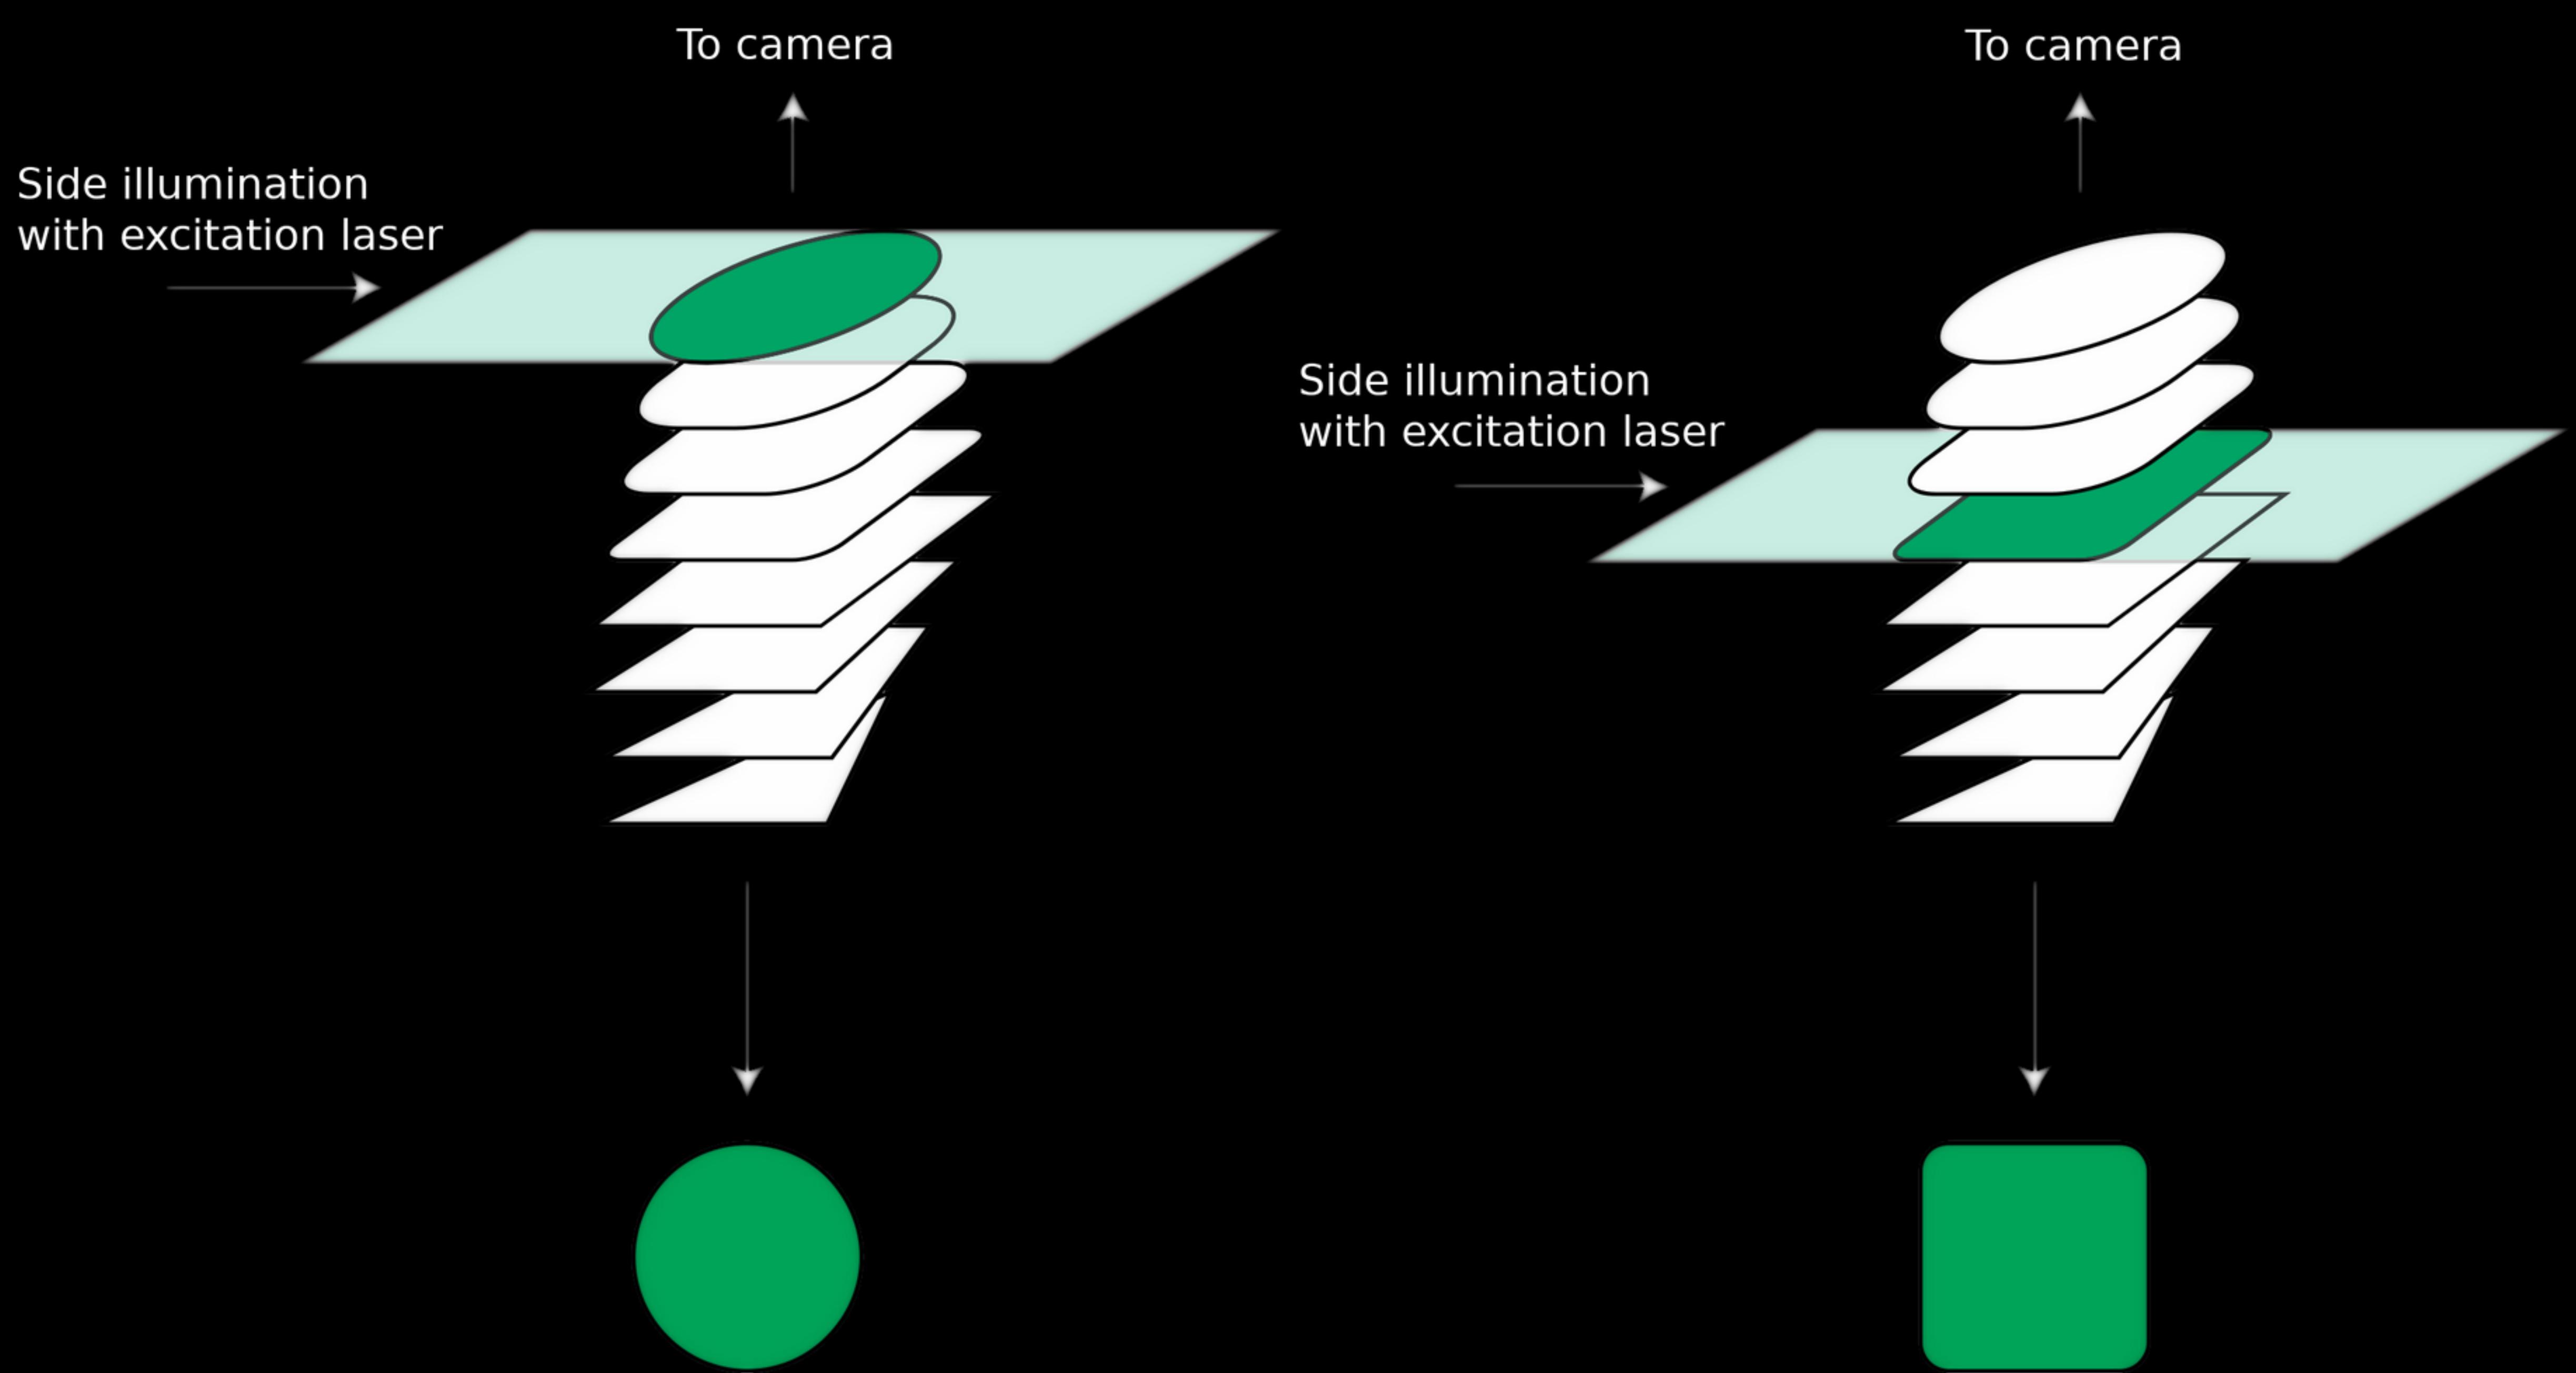

HOW?

LIGHT SHEET FLUORESCENCE MICROSCOPY

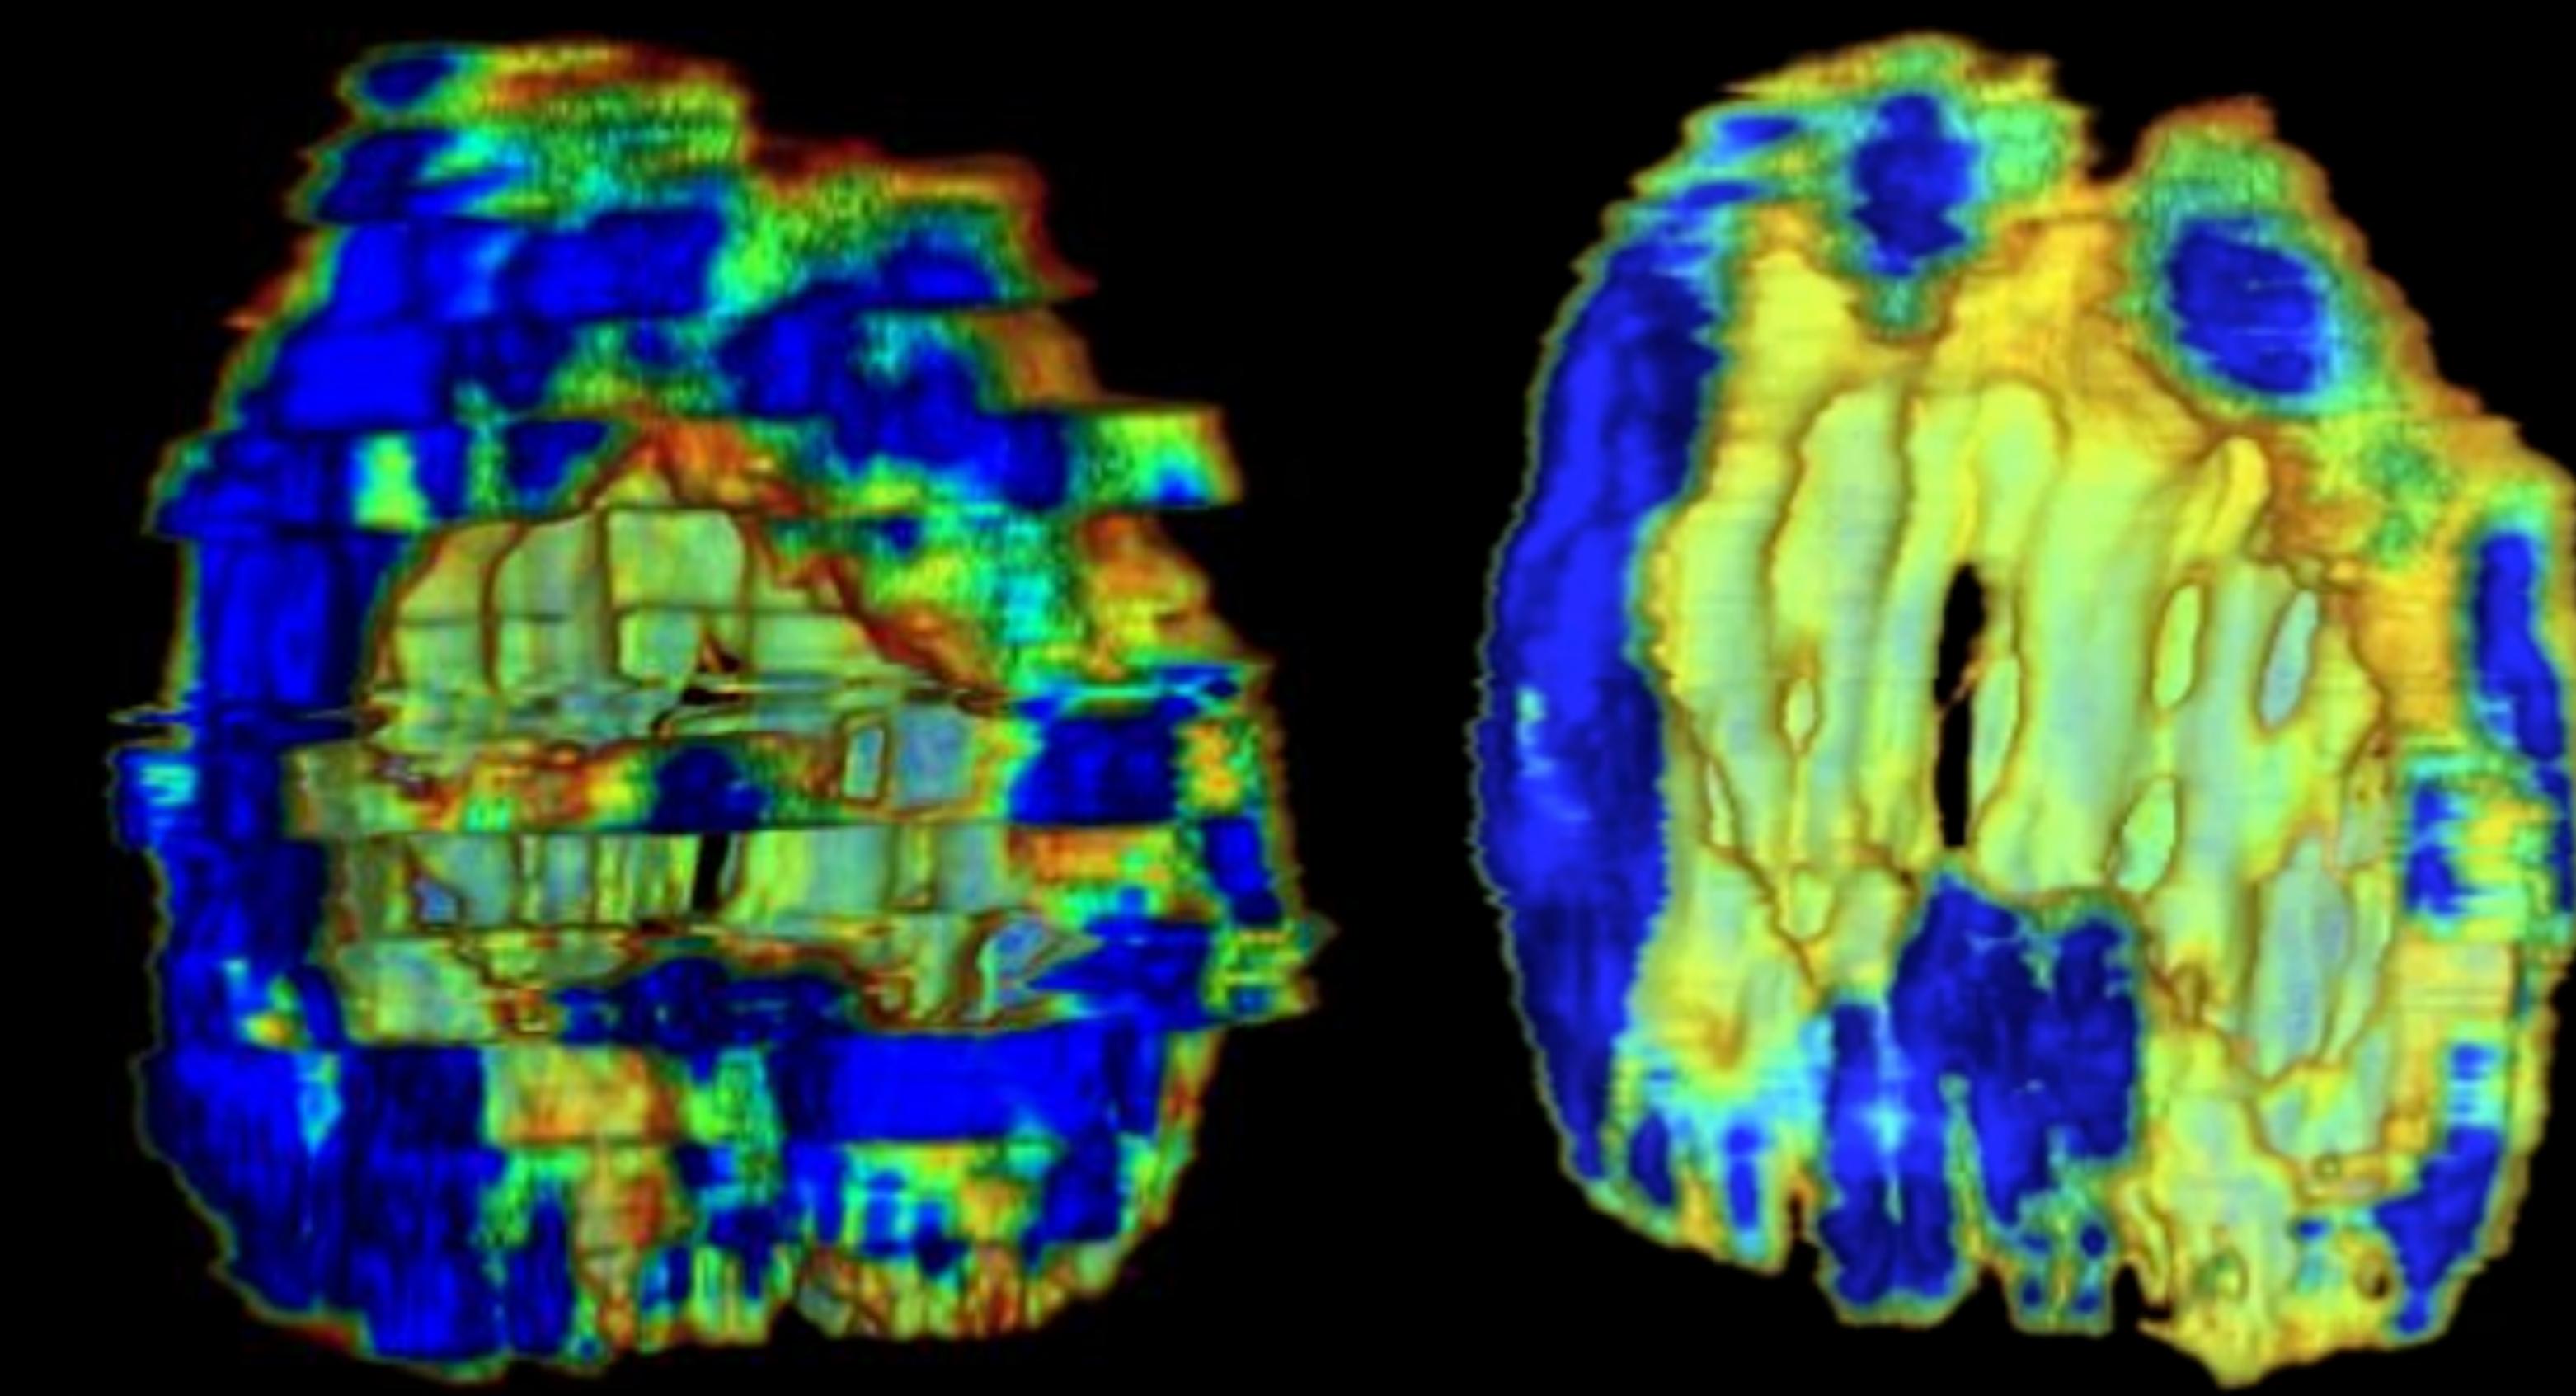

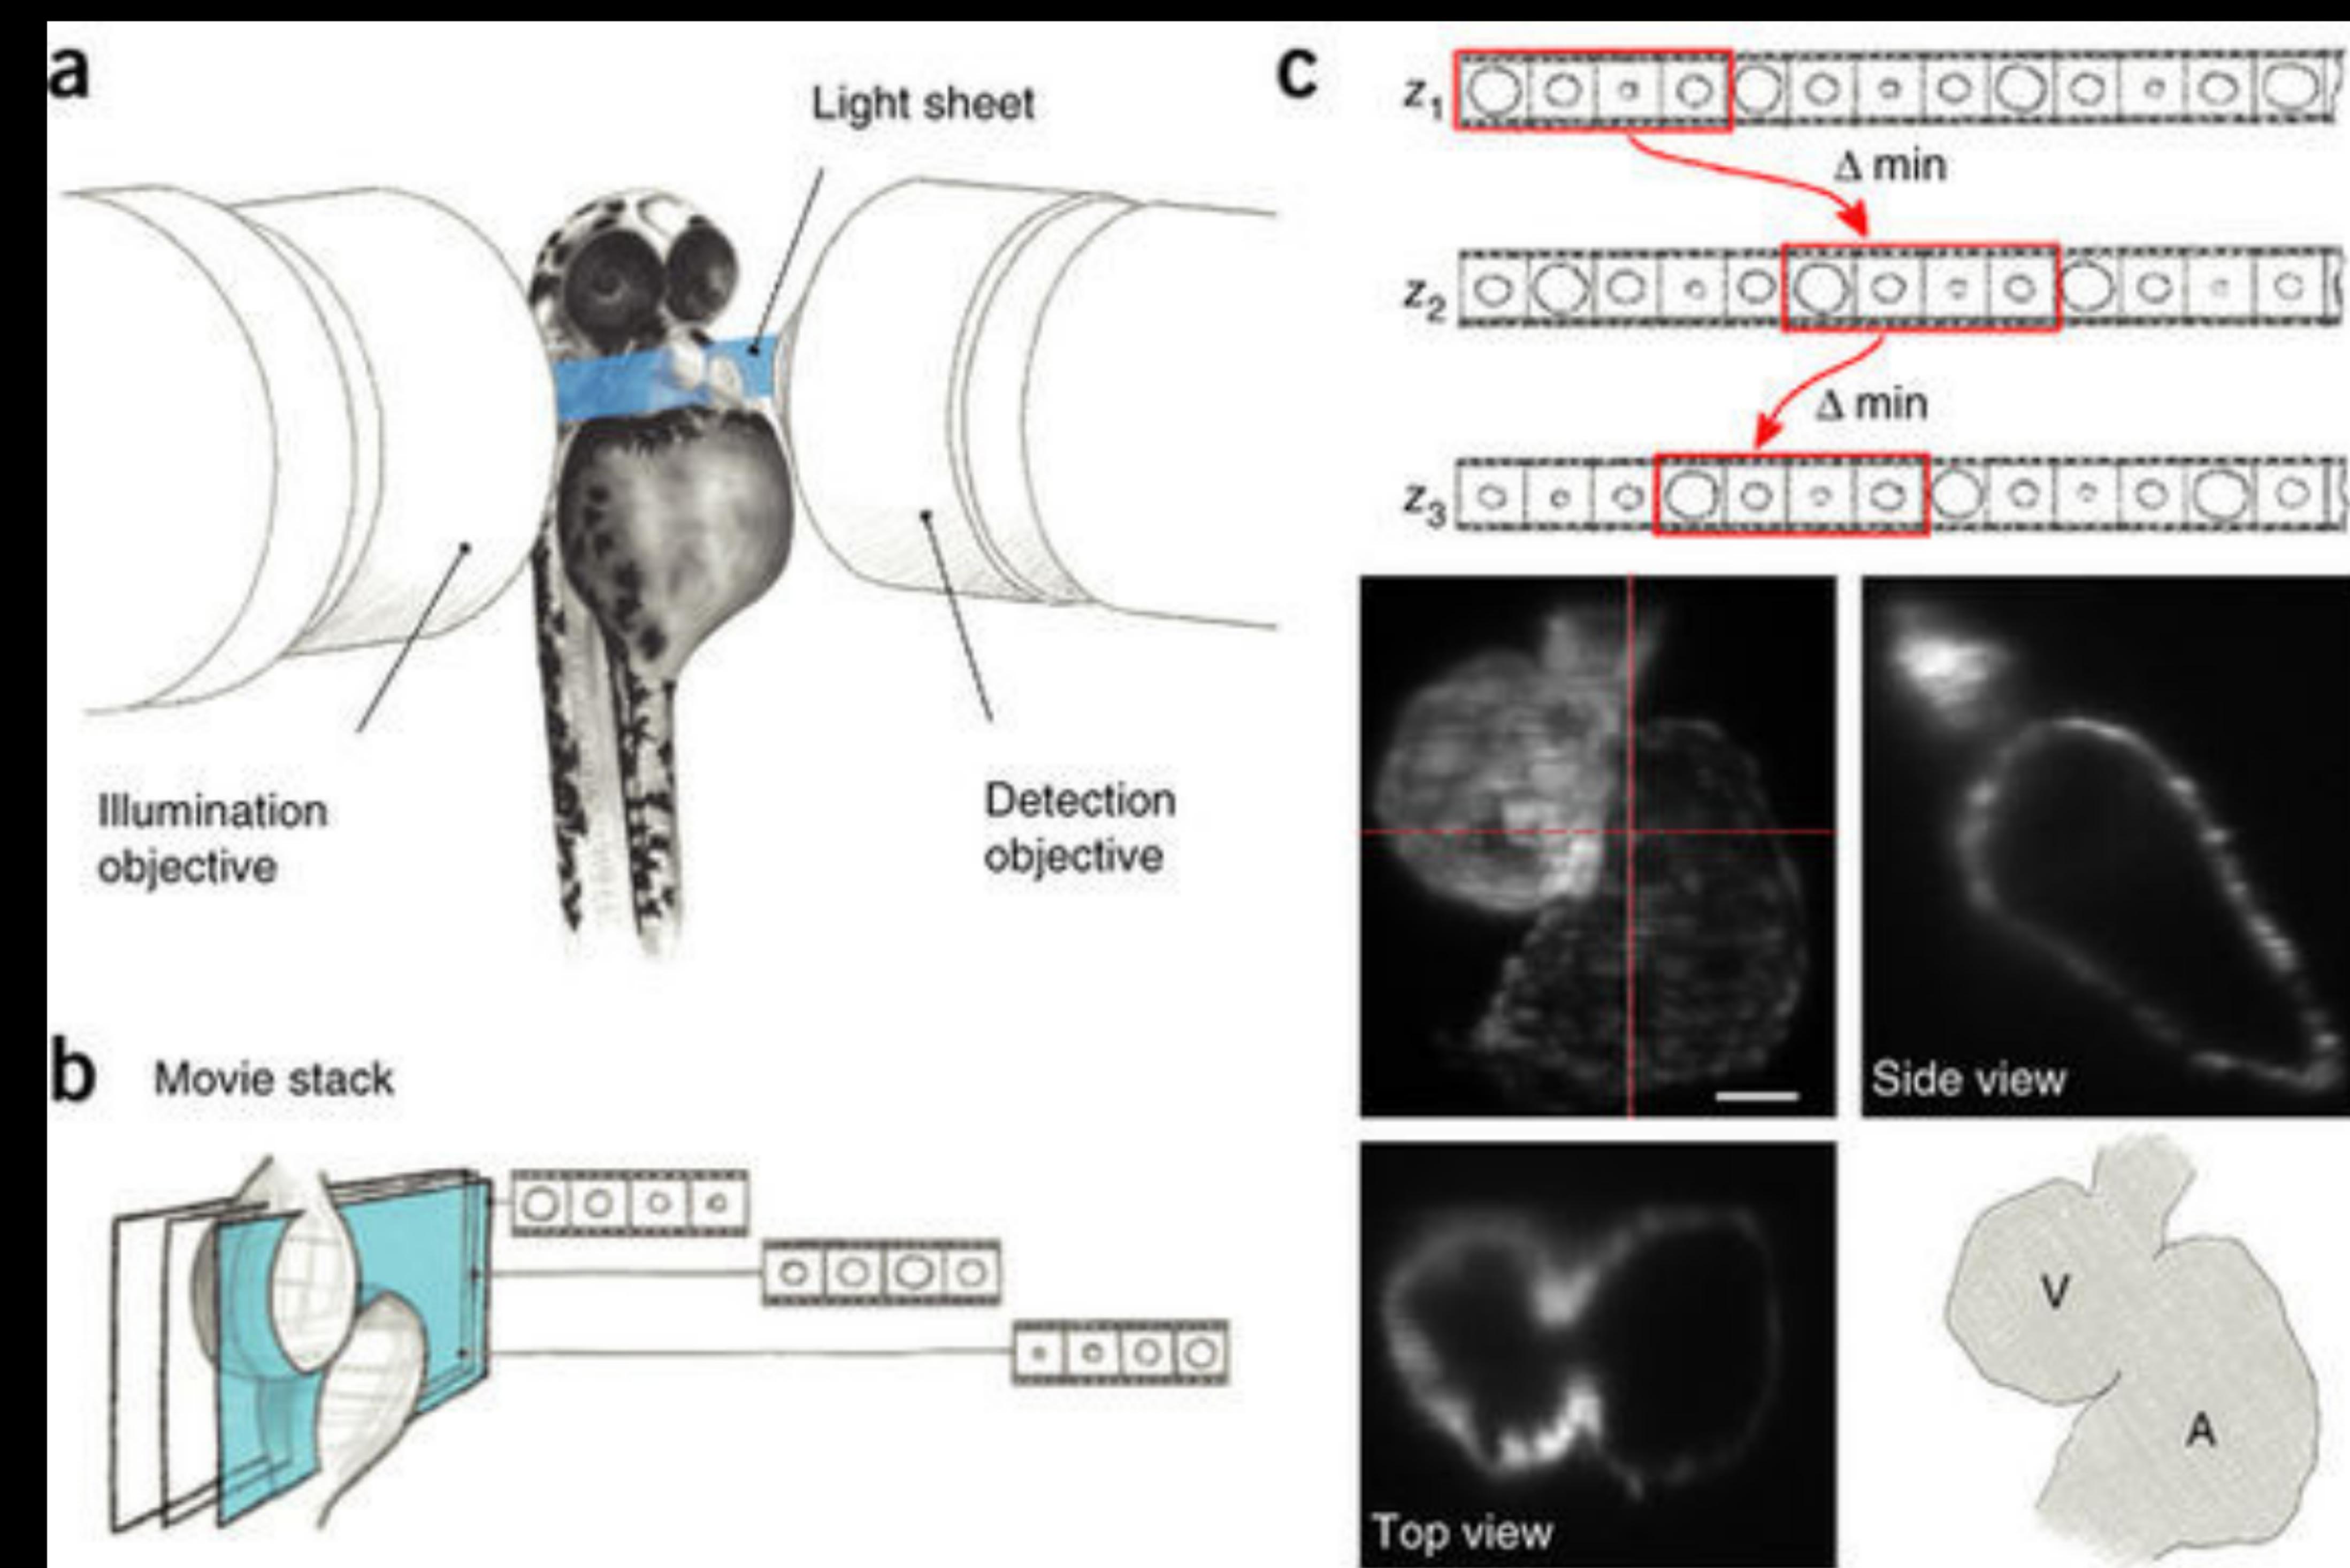

Taylor *et al.* Proc. of SPIE (2012)

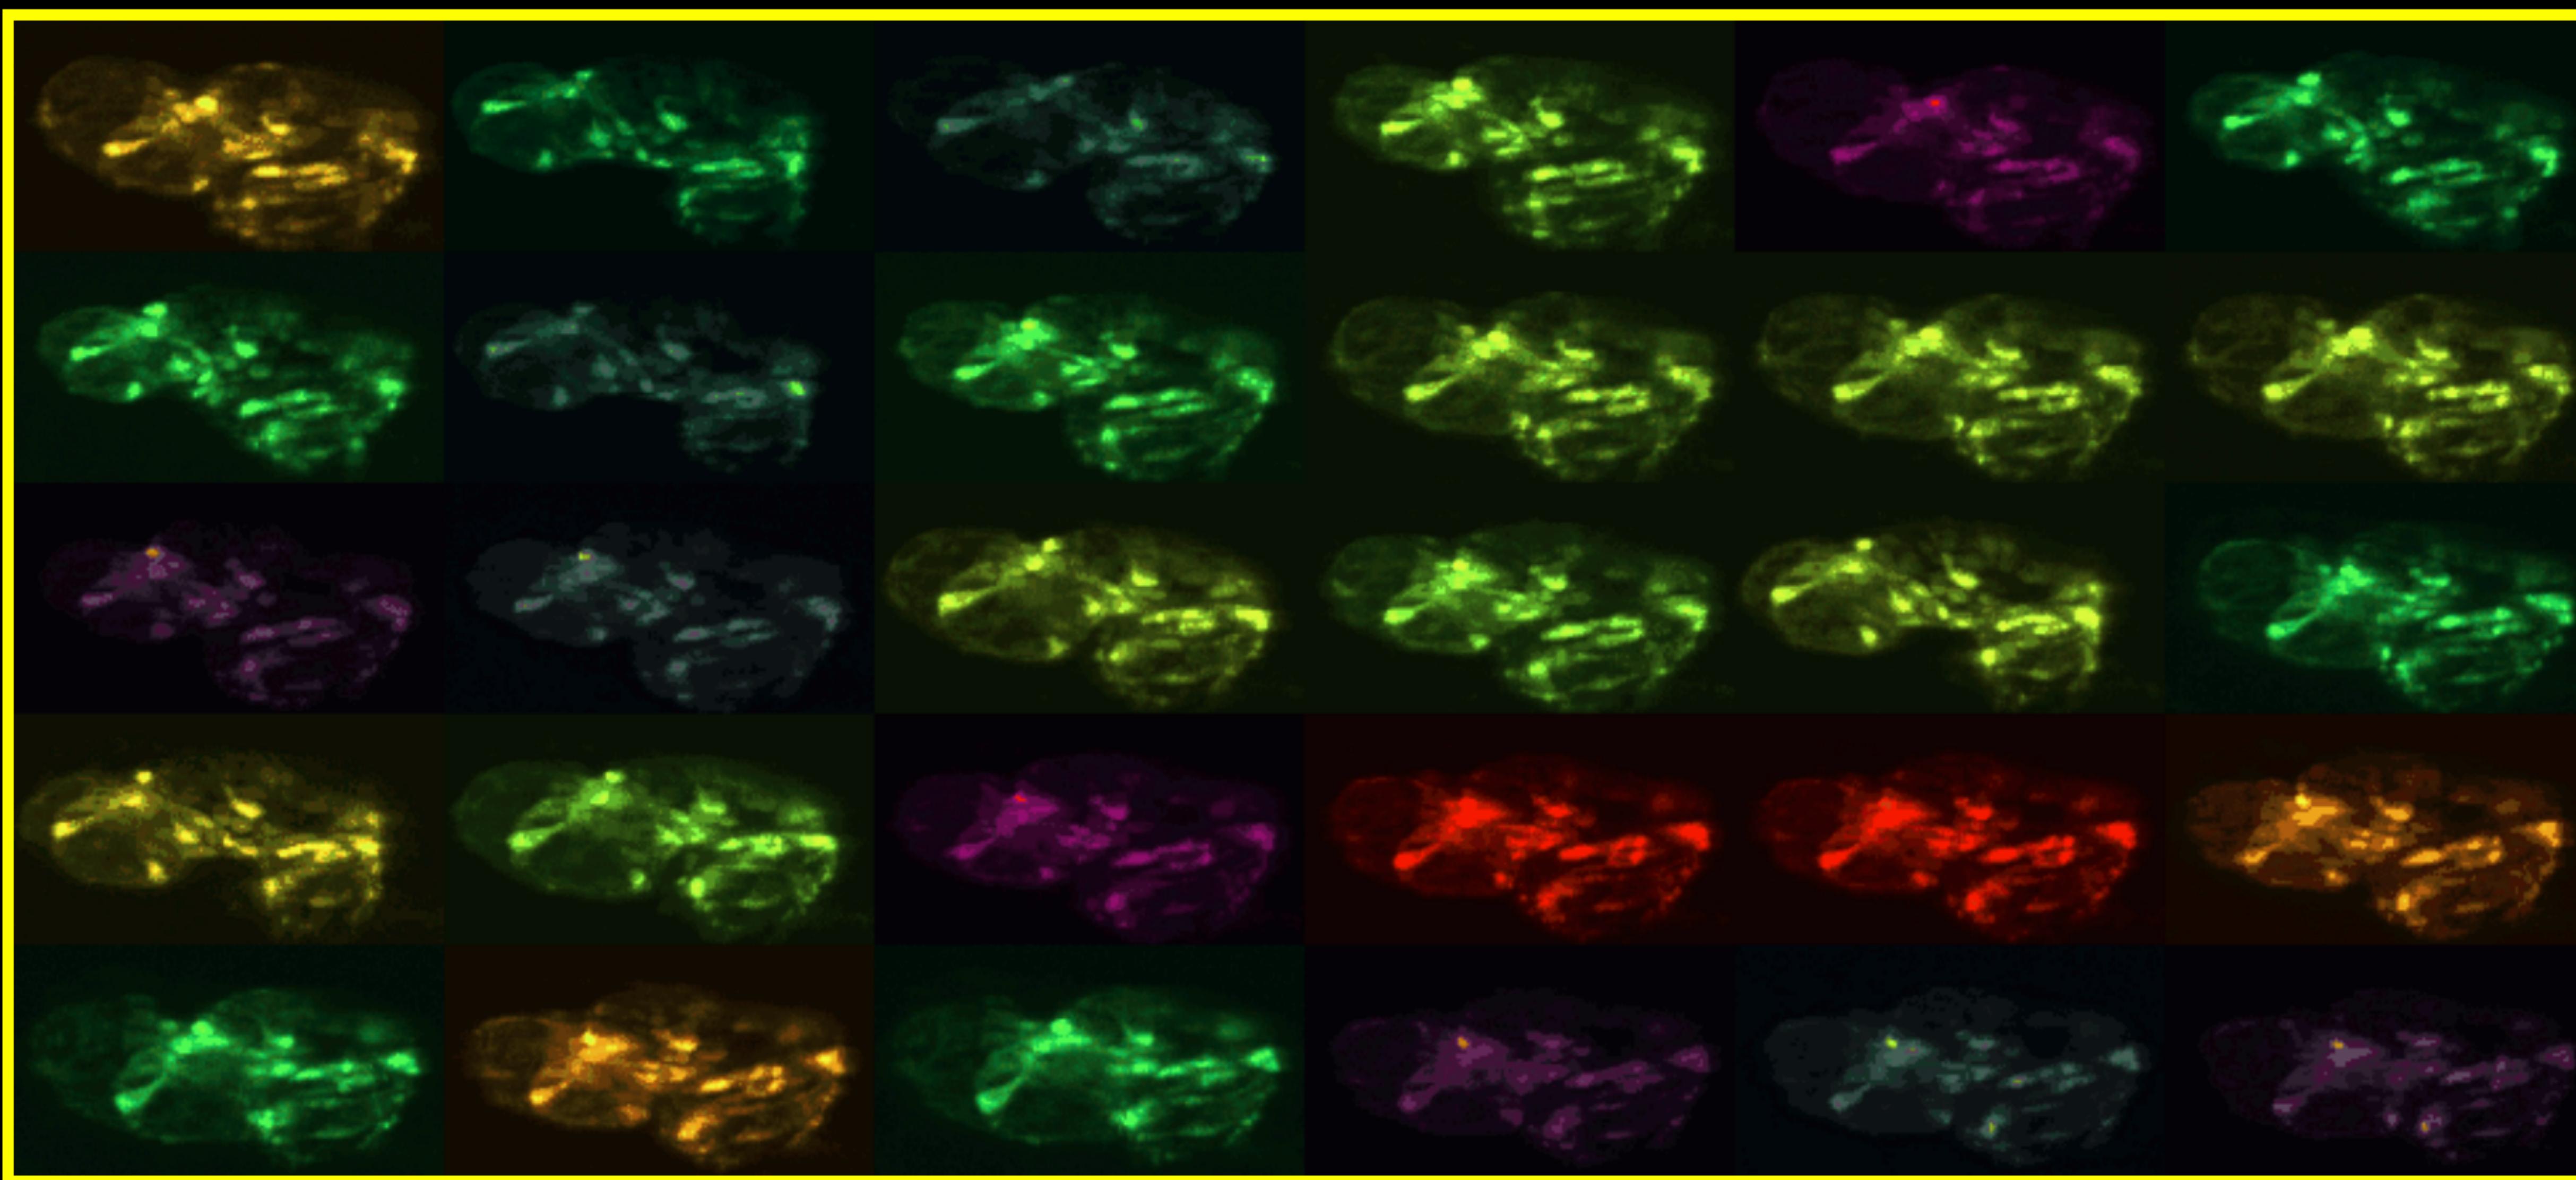

Taylor *et al.* J. of Biomedical Optics (2011)

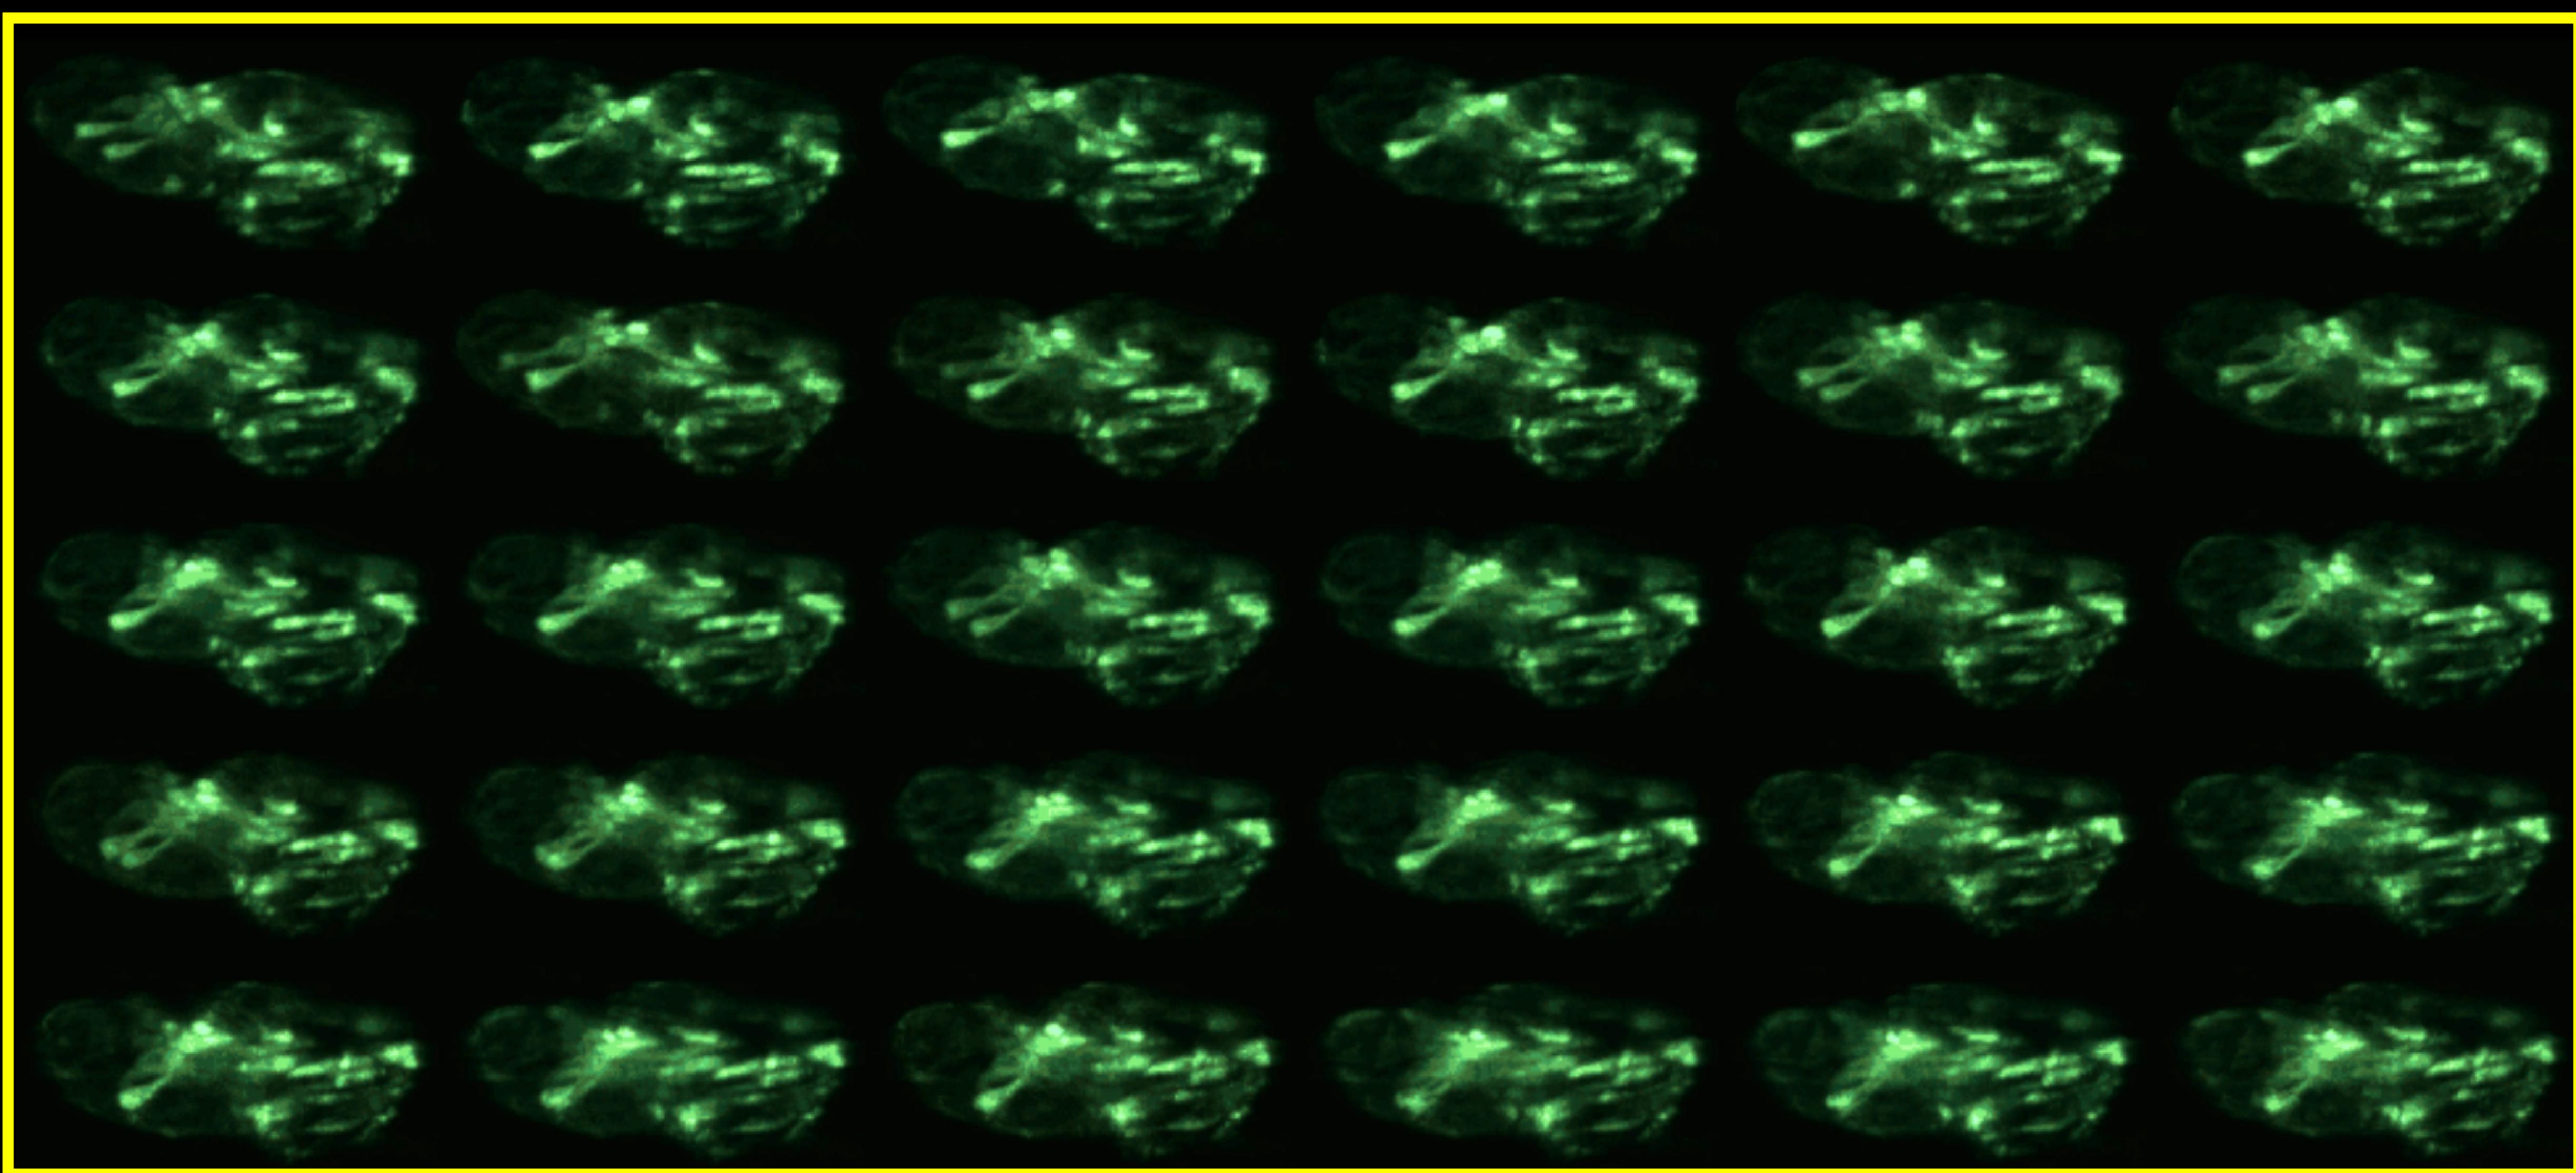

RETROSPECTIVE OPTICAL GATING

Liebling *et al.* IEEE ISBI (2006)

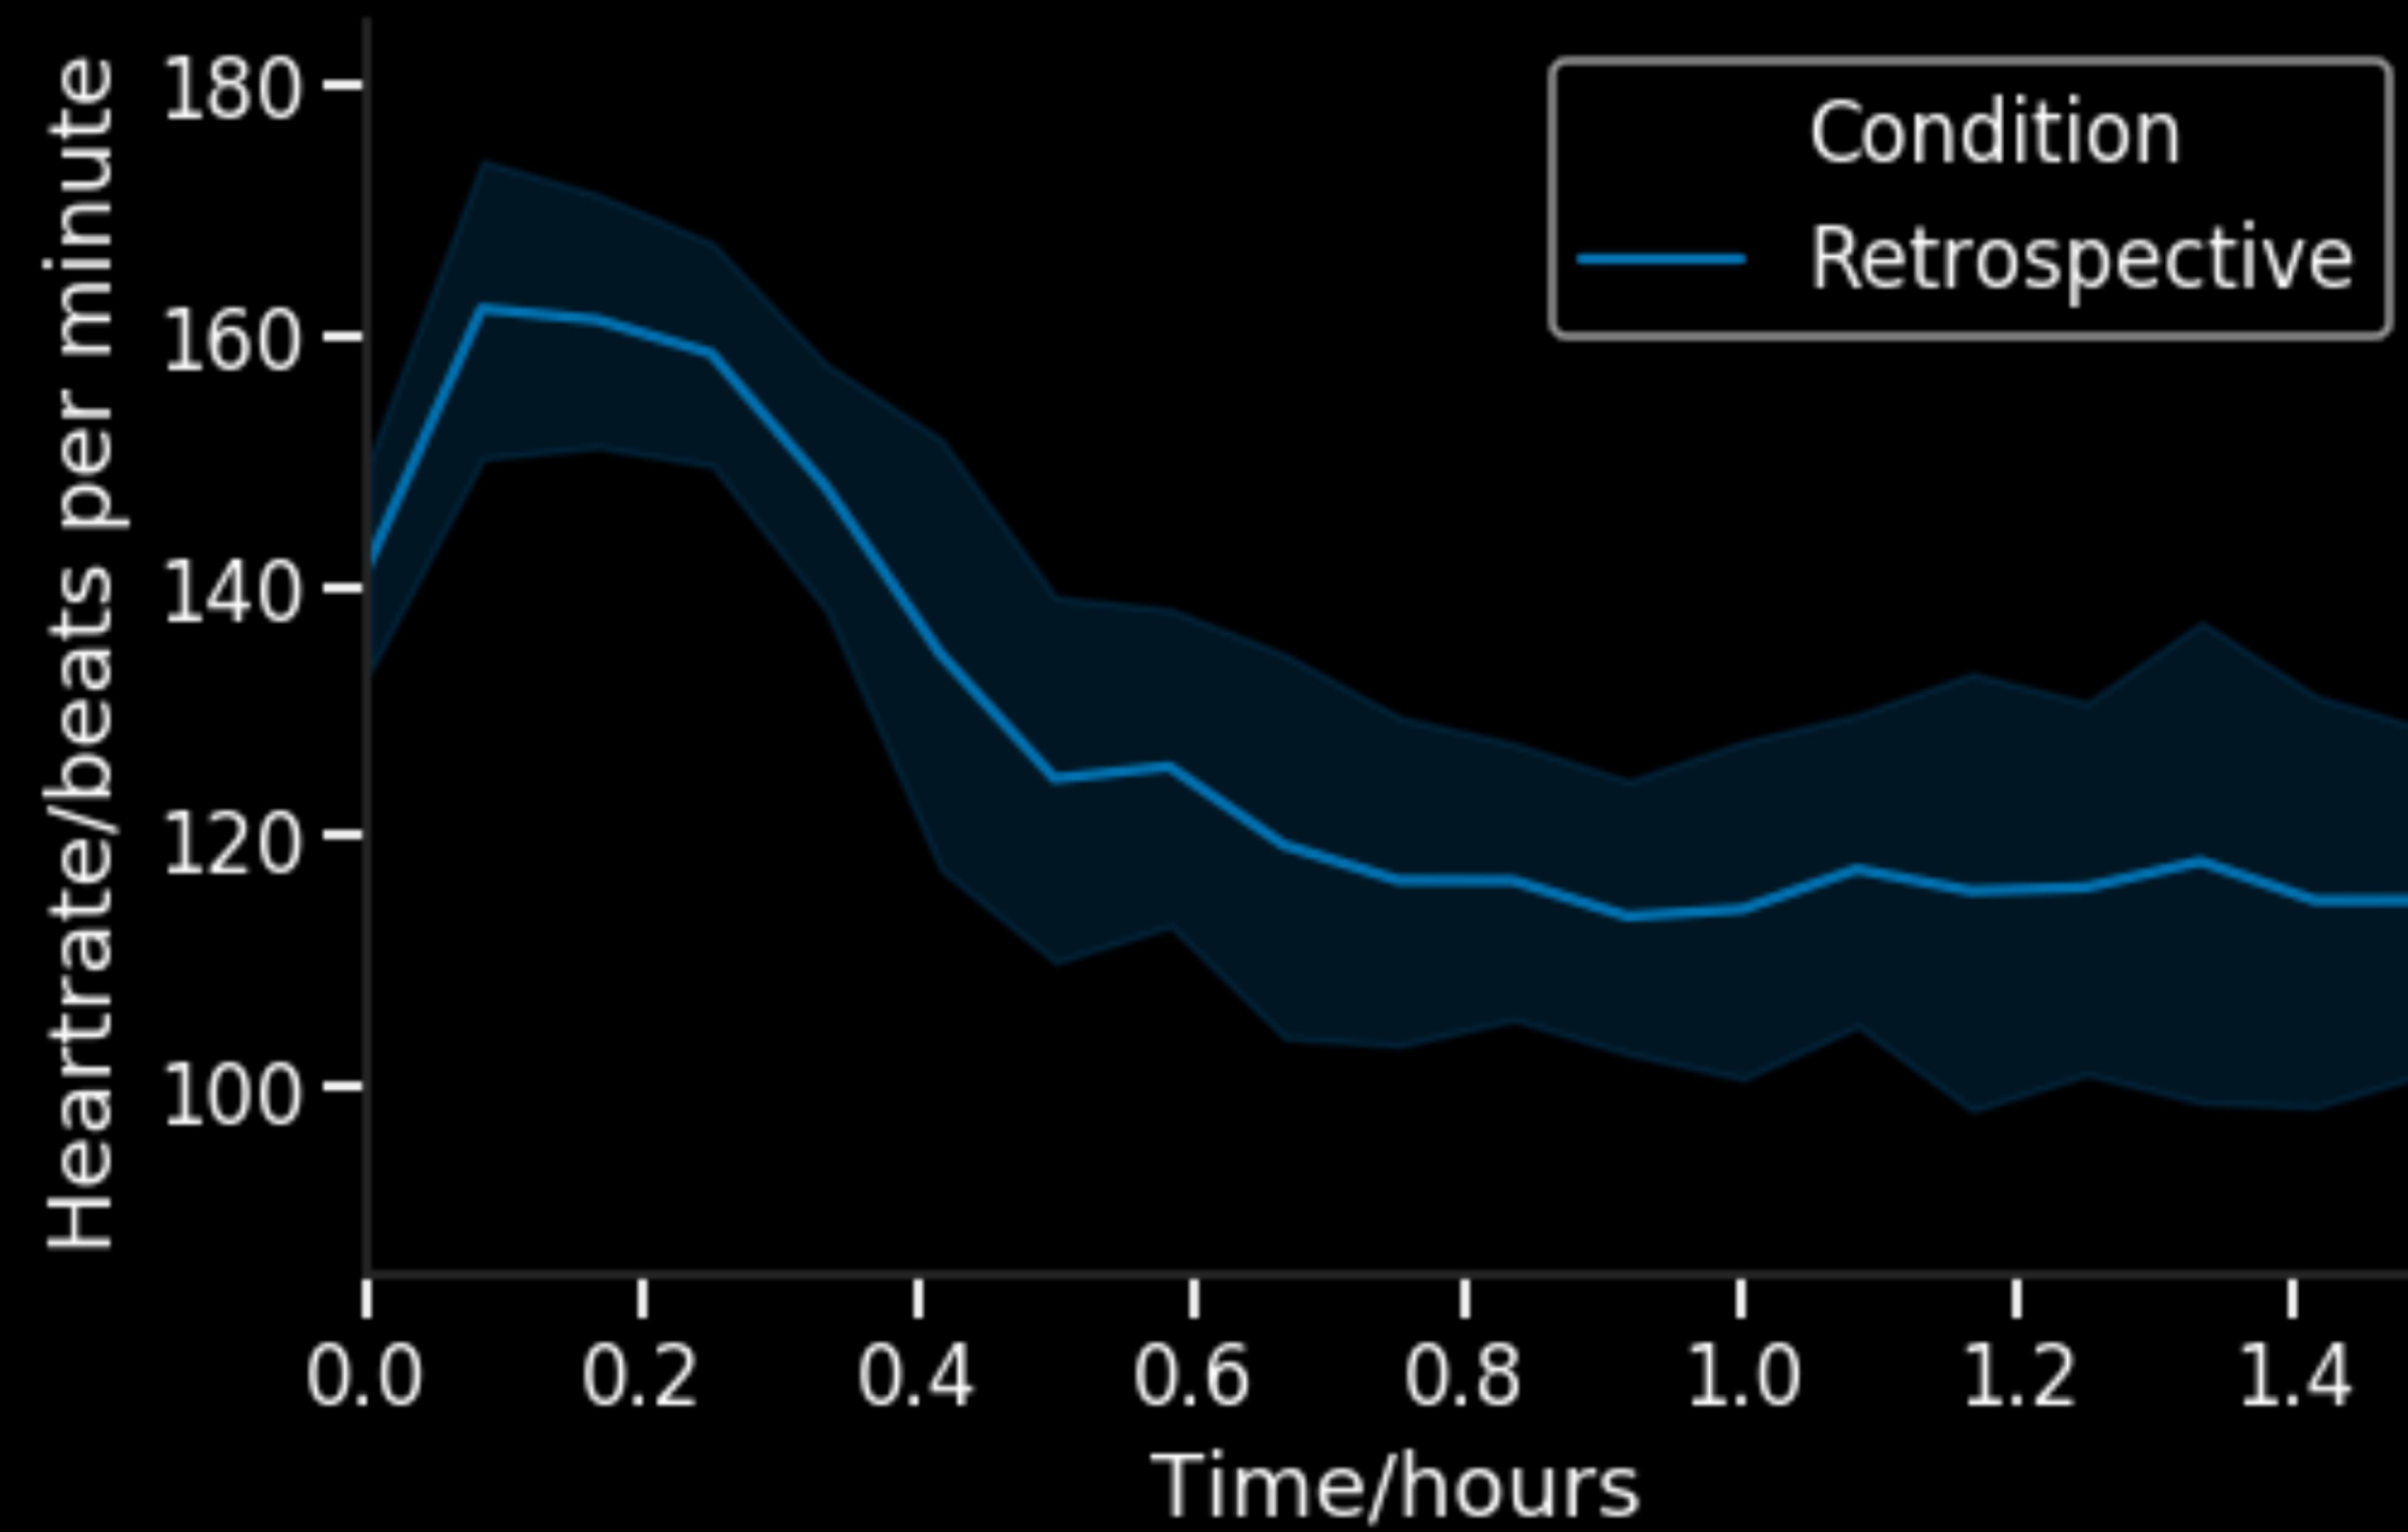

Mickoleit *et al.* Nature (2014)

: (

Your zebrafish ran into a problem that
it couldn't handle.

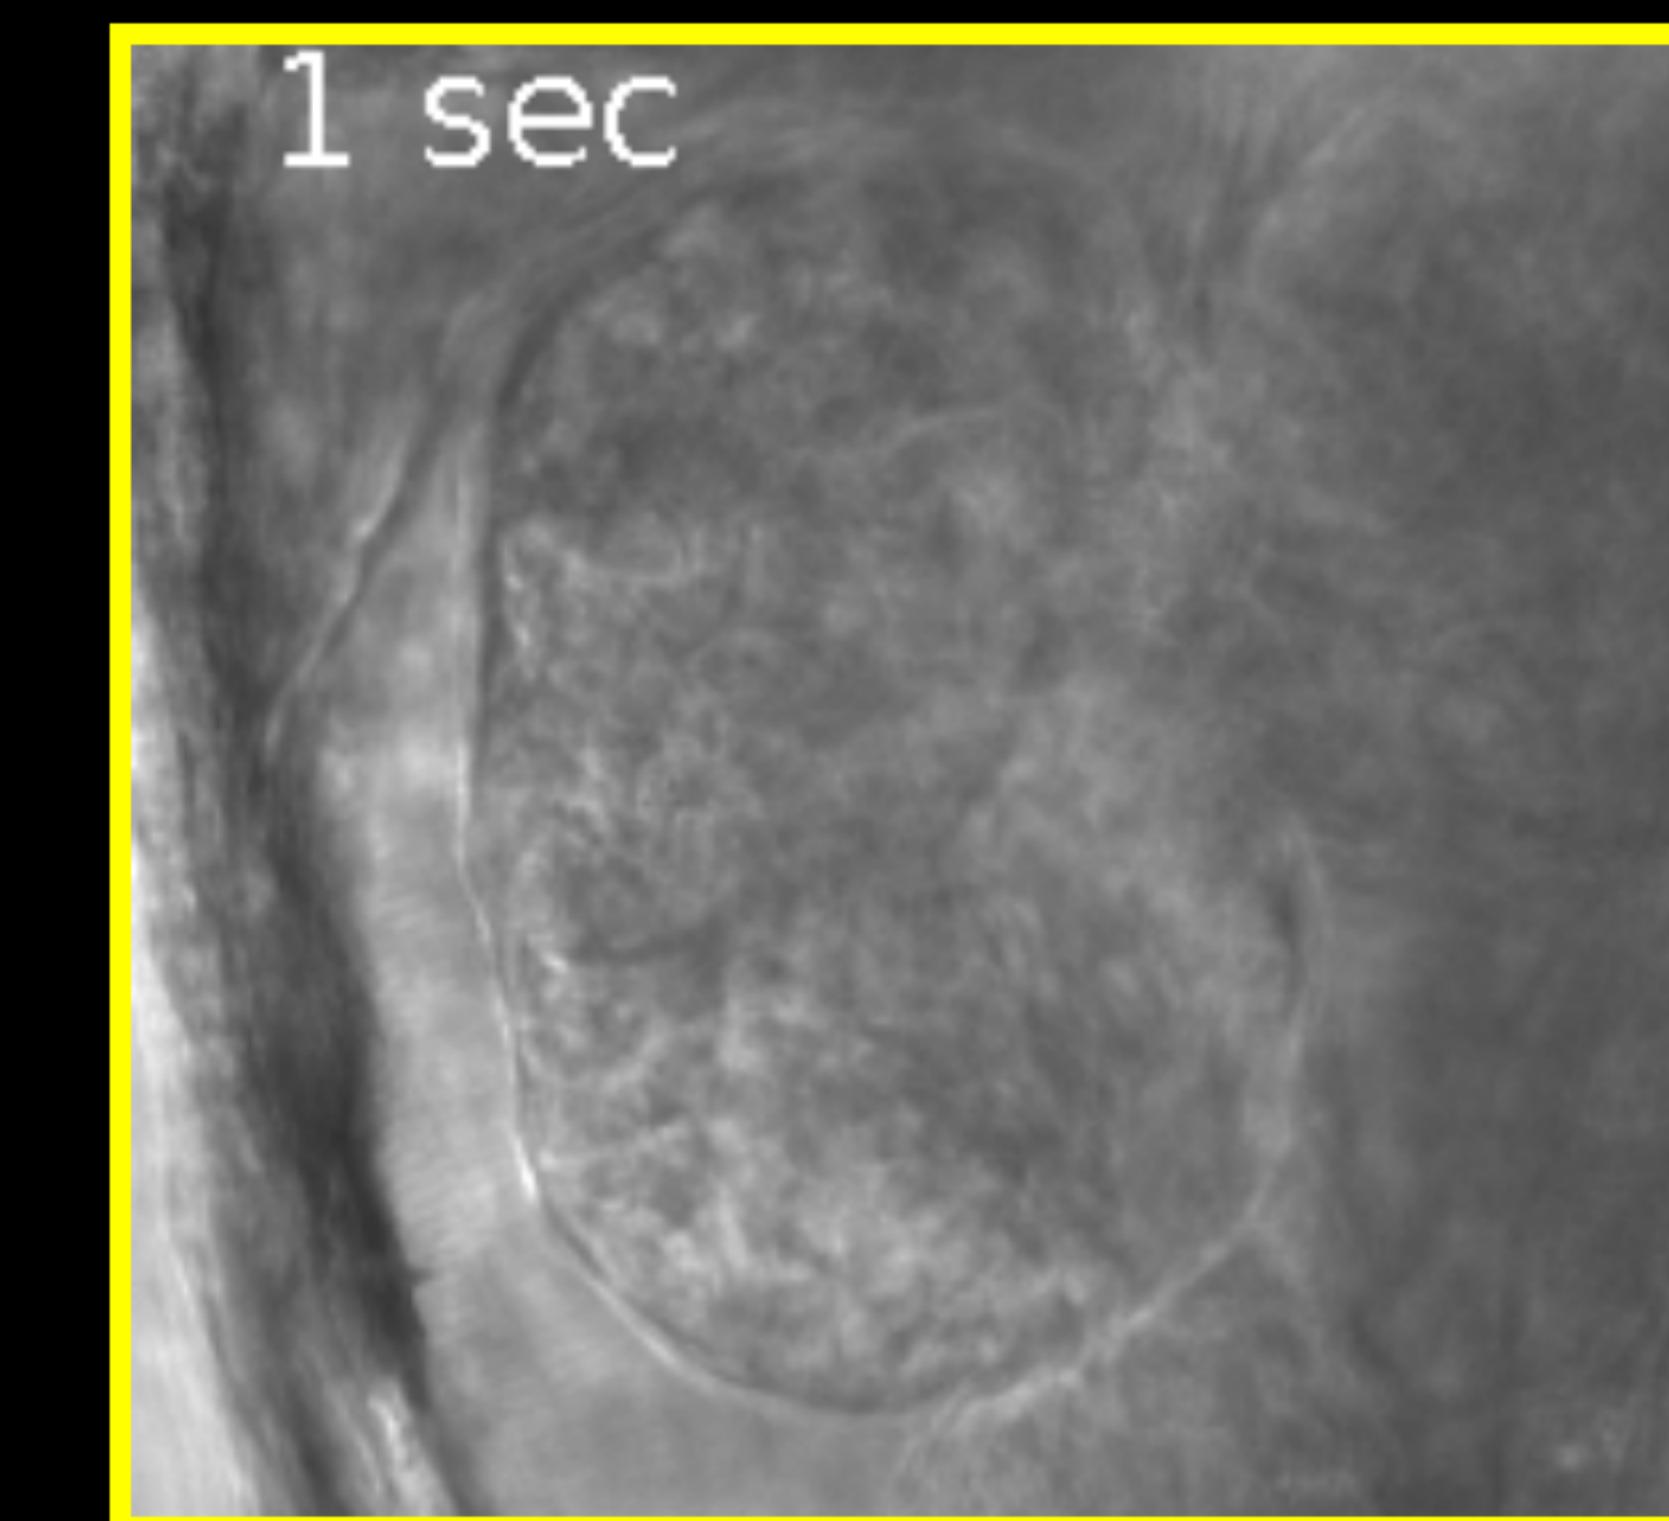

A SMART MICROSCOPE
FOR IMAGING THE BEATING HEART
WITHOUT BREAKING IT

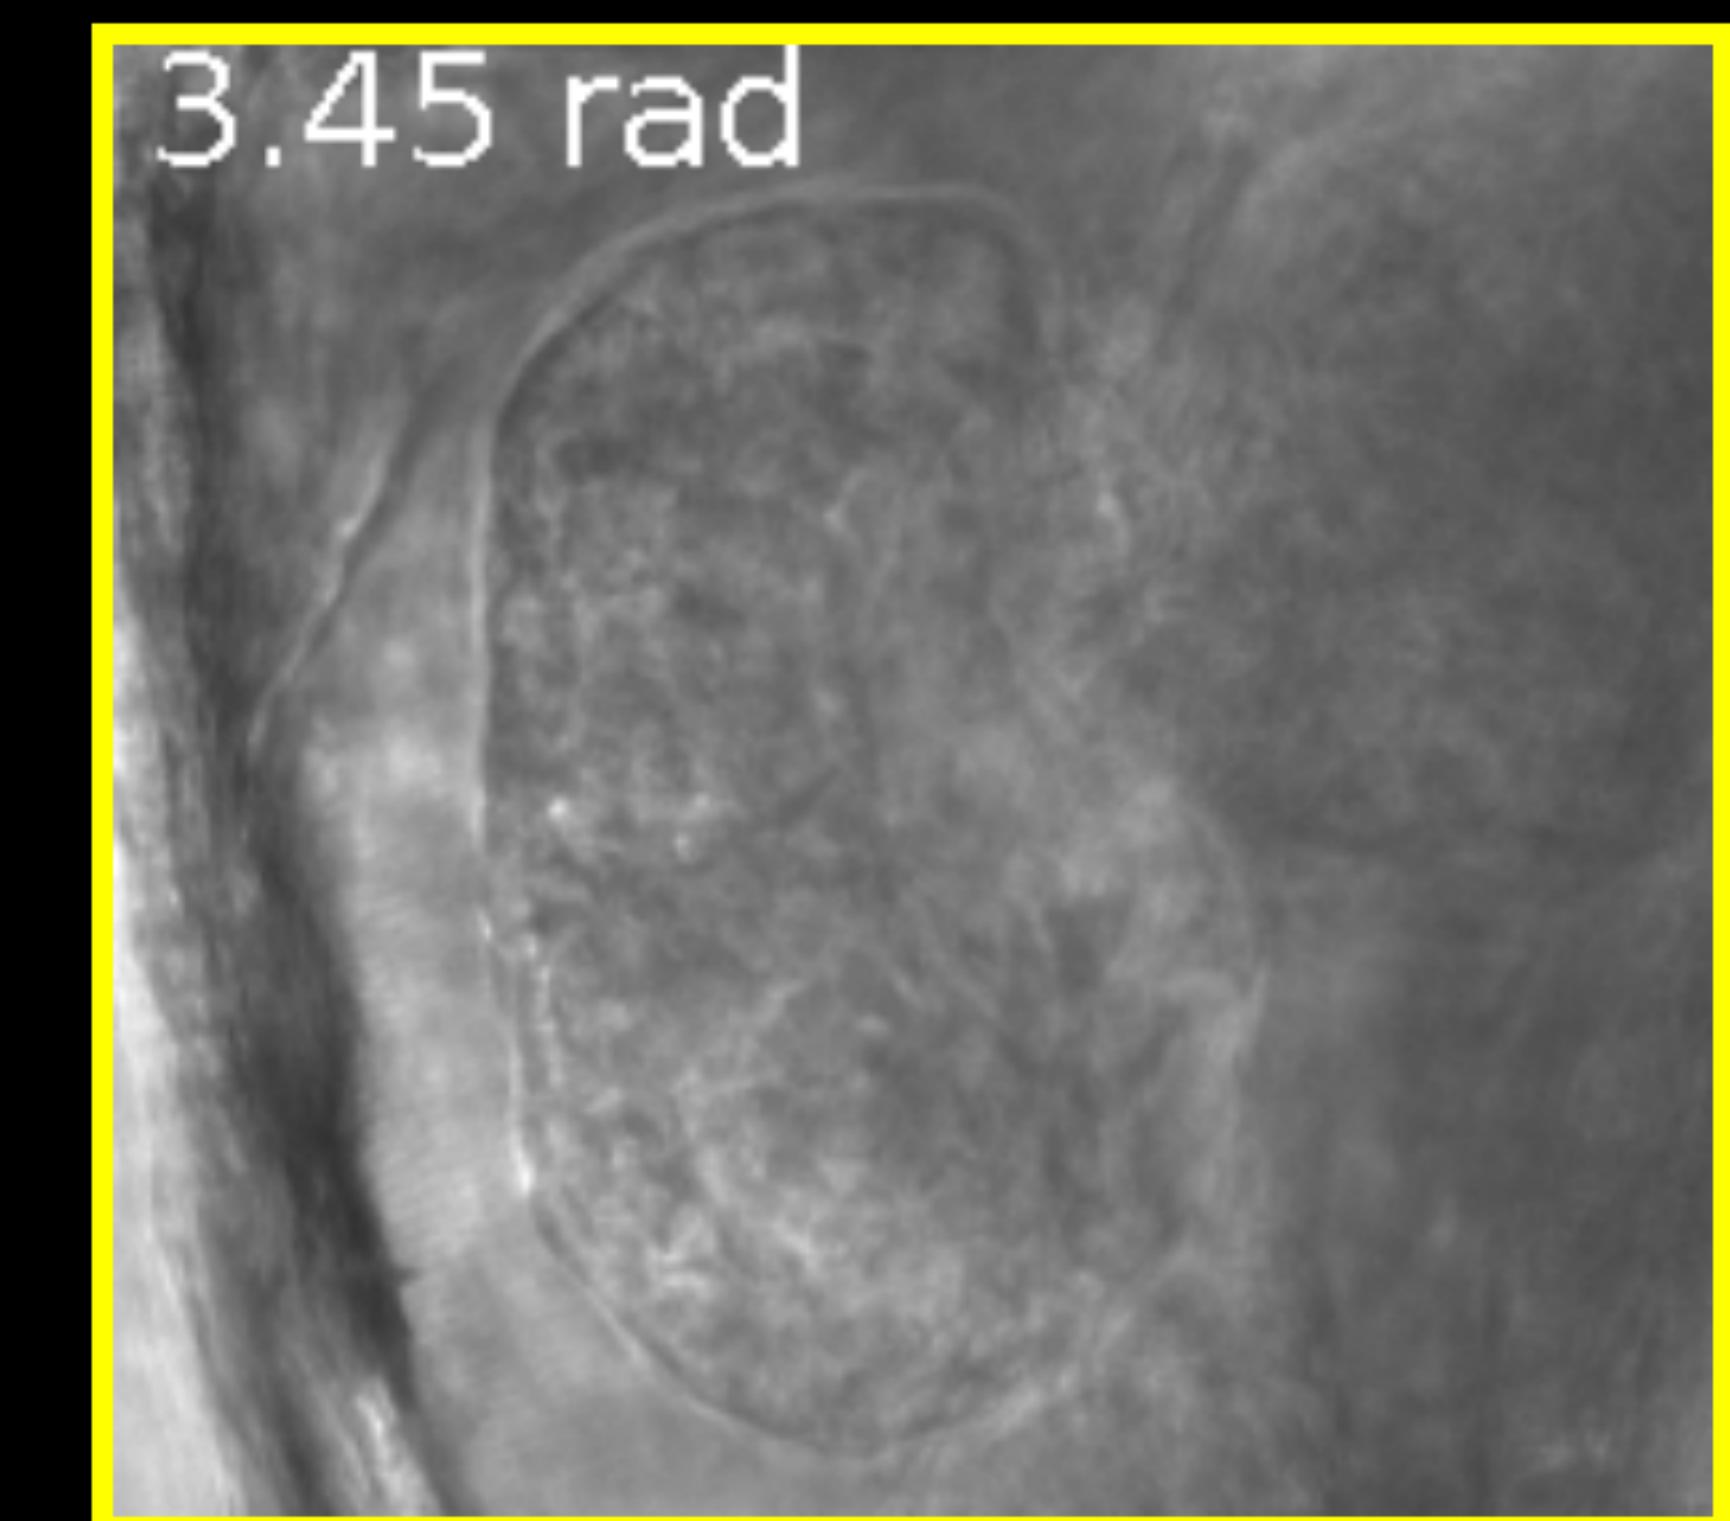

REAL-TIME PROSPECTIVE OPTICAL GATING

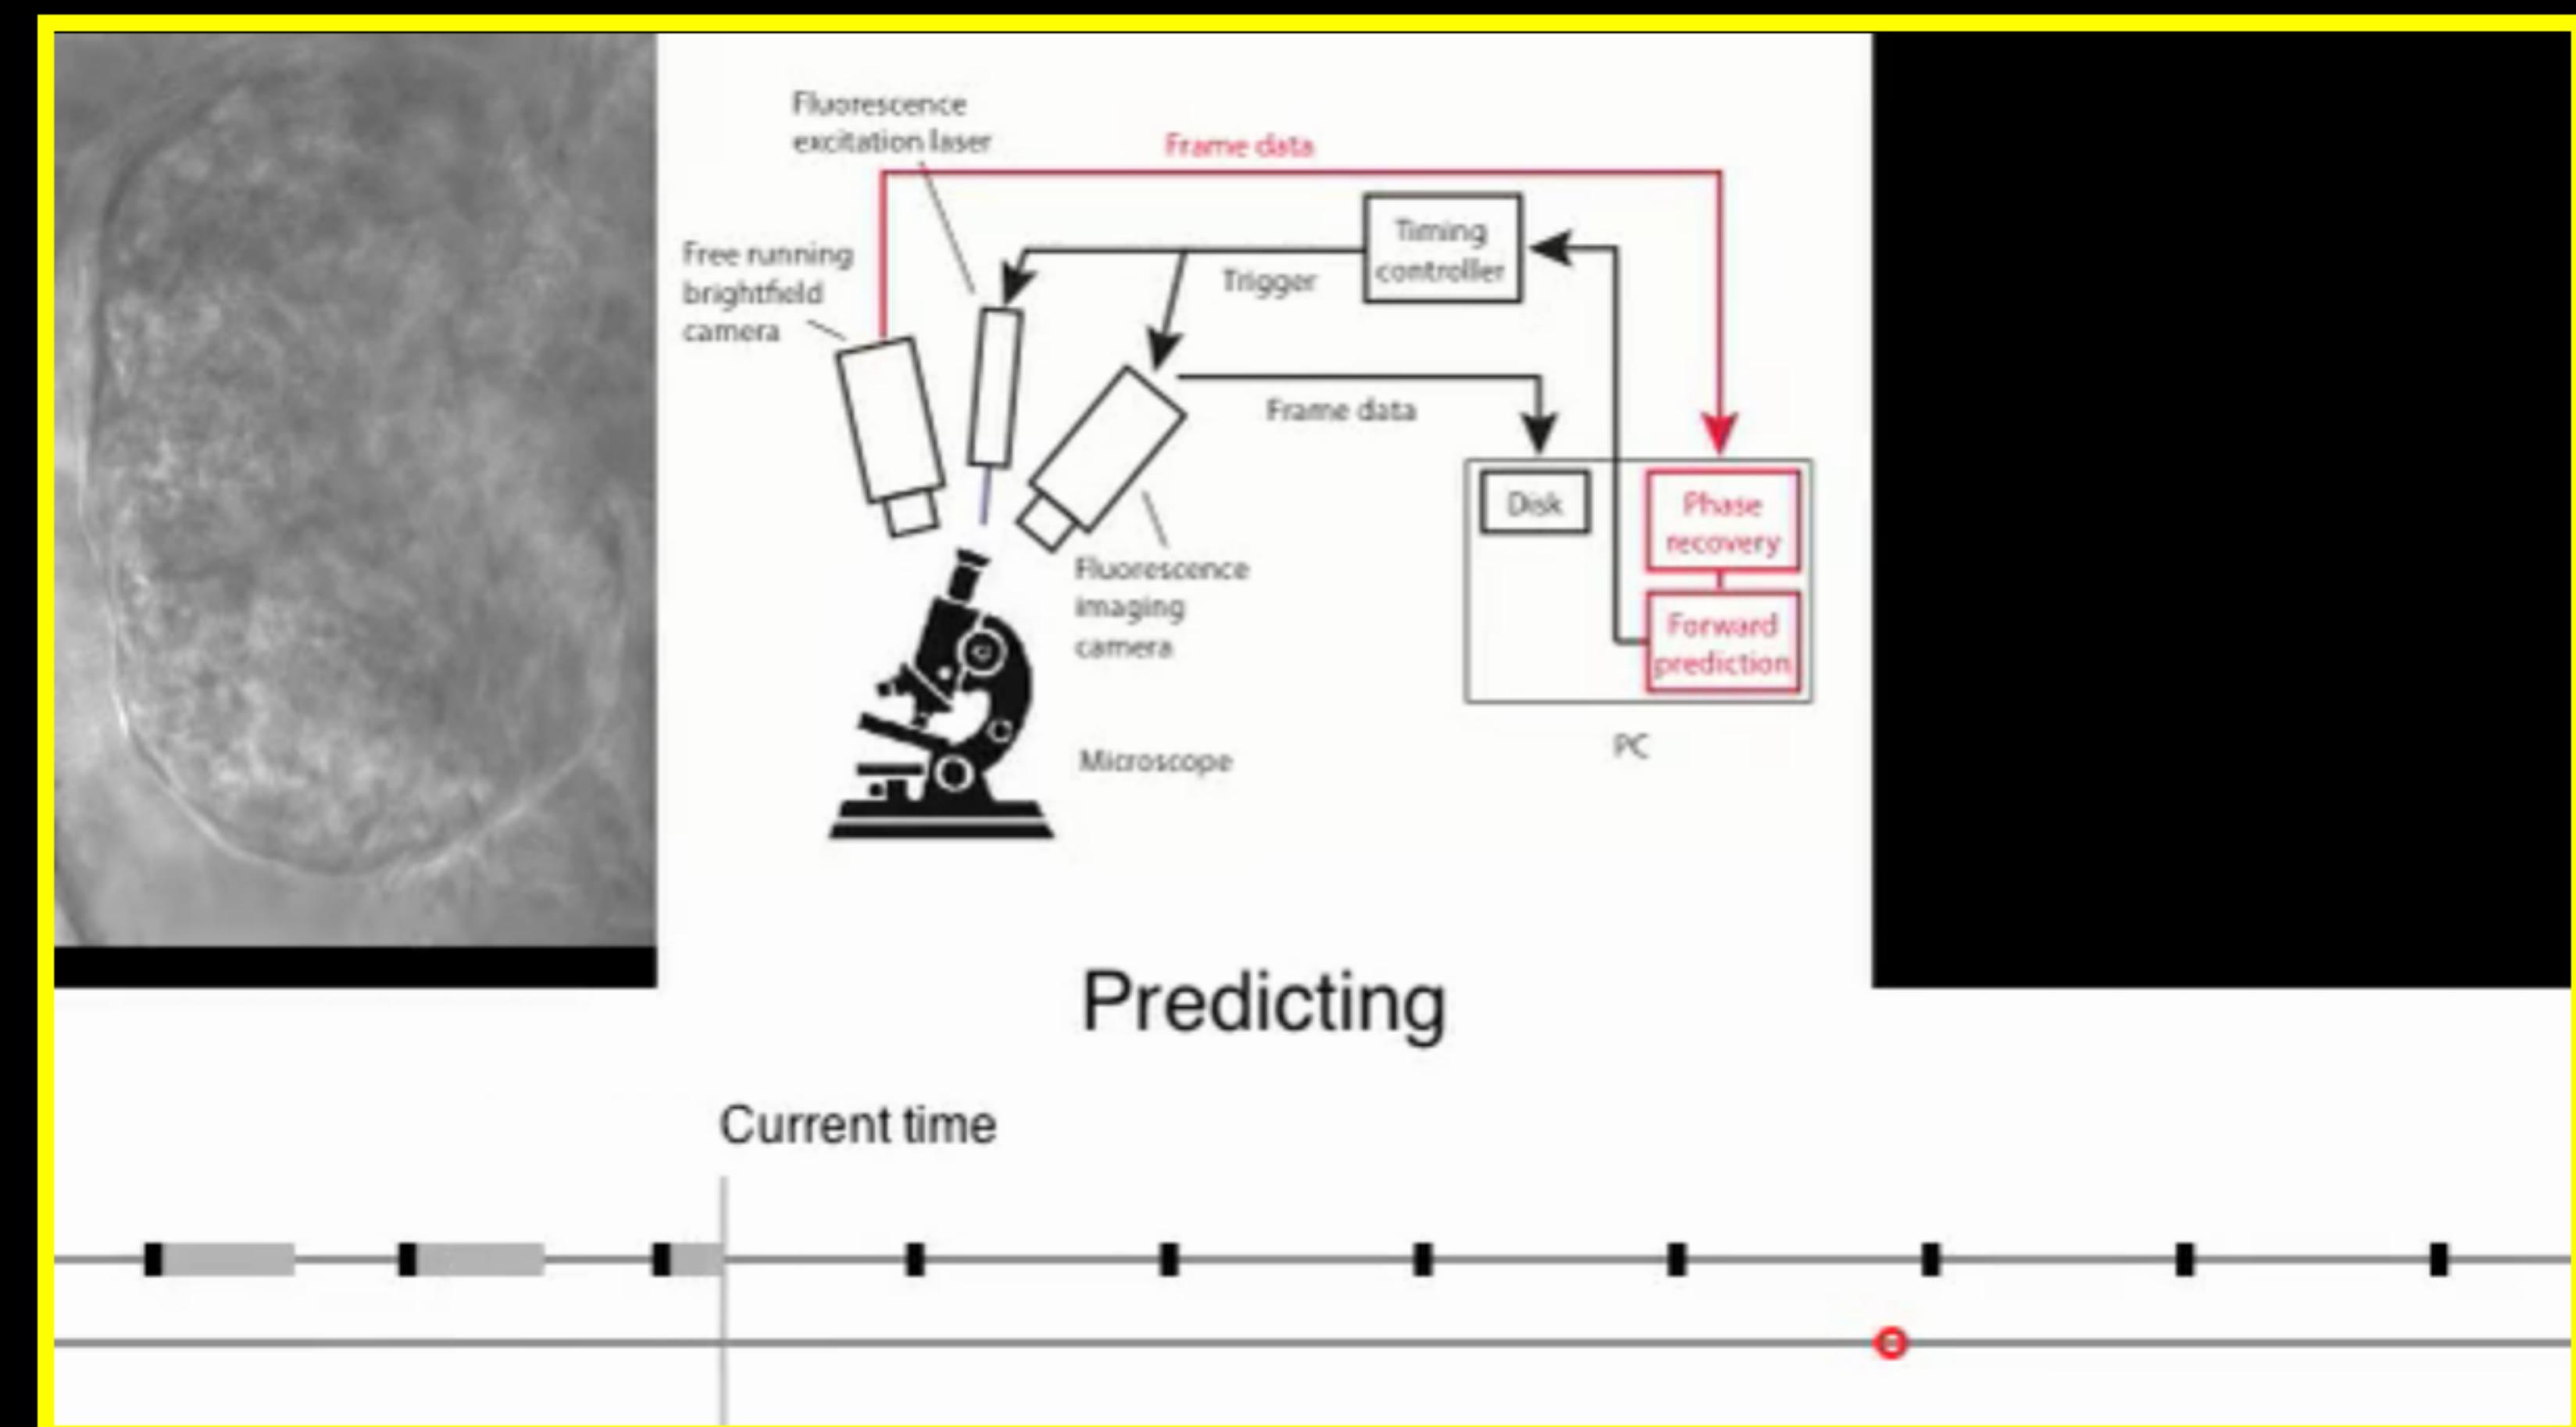

Taylor *et al.* J. of Biomedical Optics (2011)

Brightfield Stream

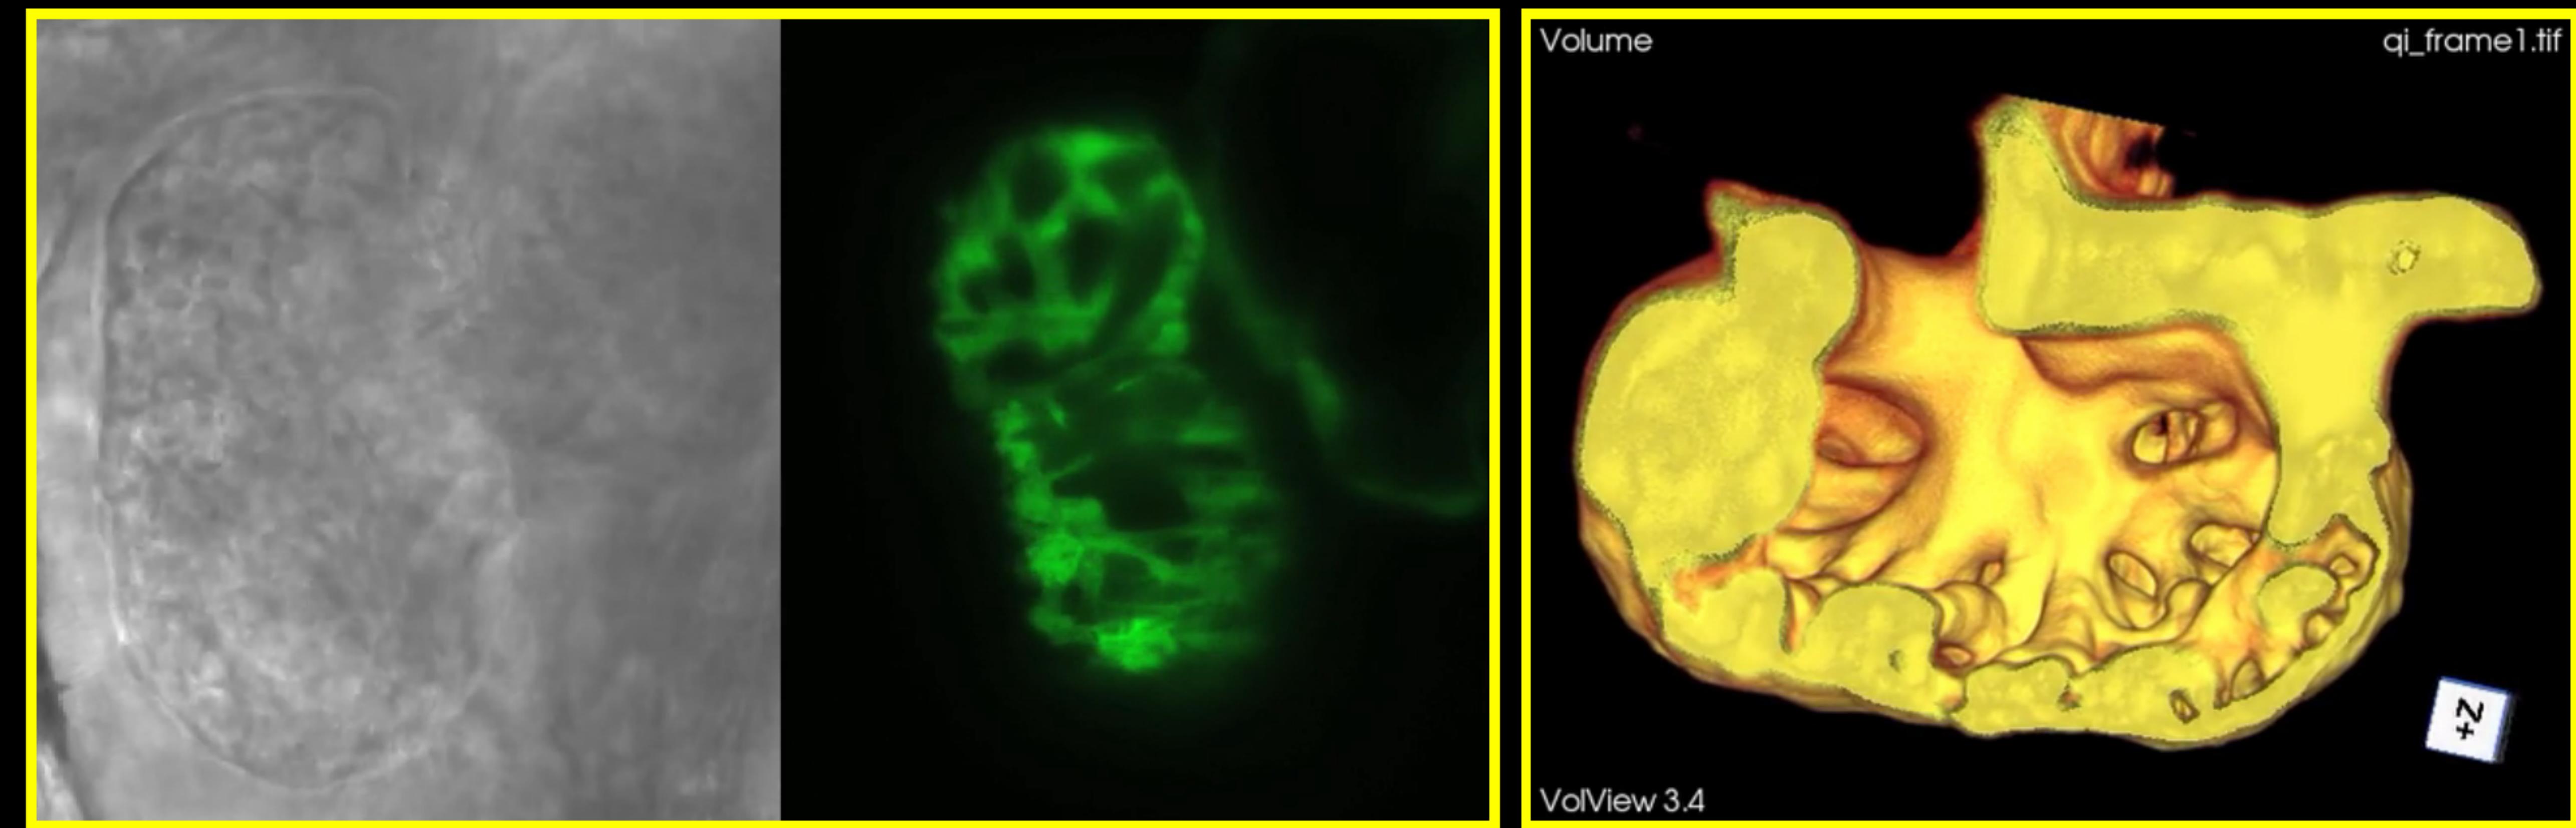

Reference Heartbeat

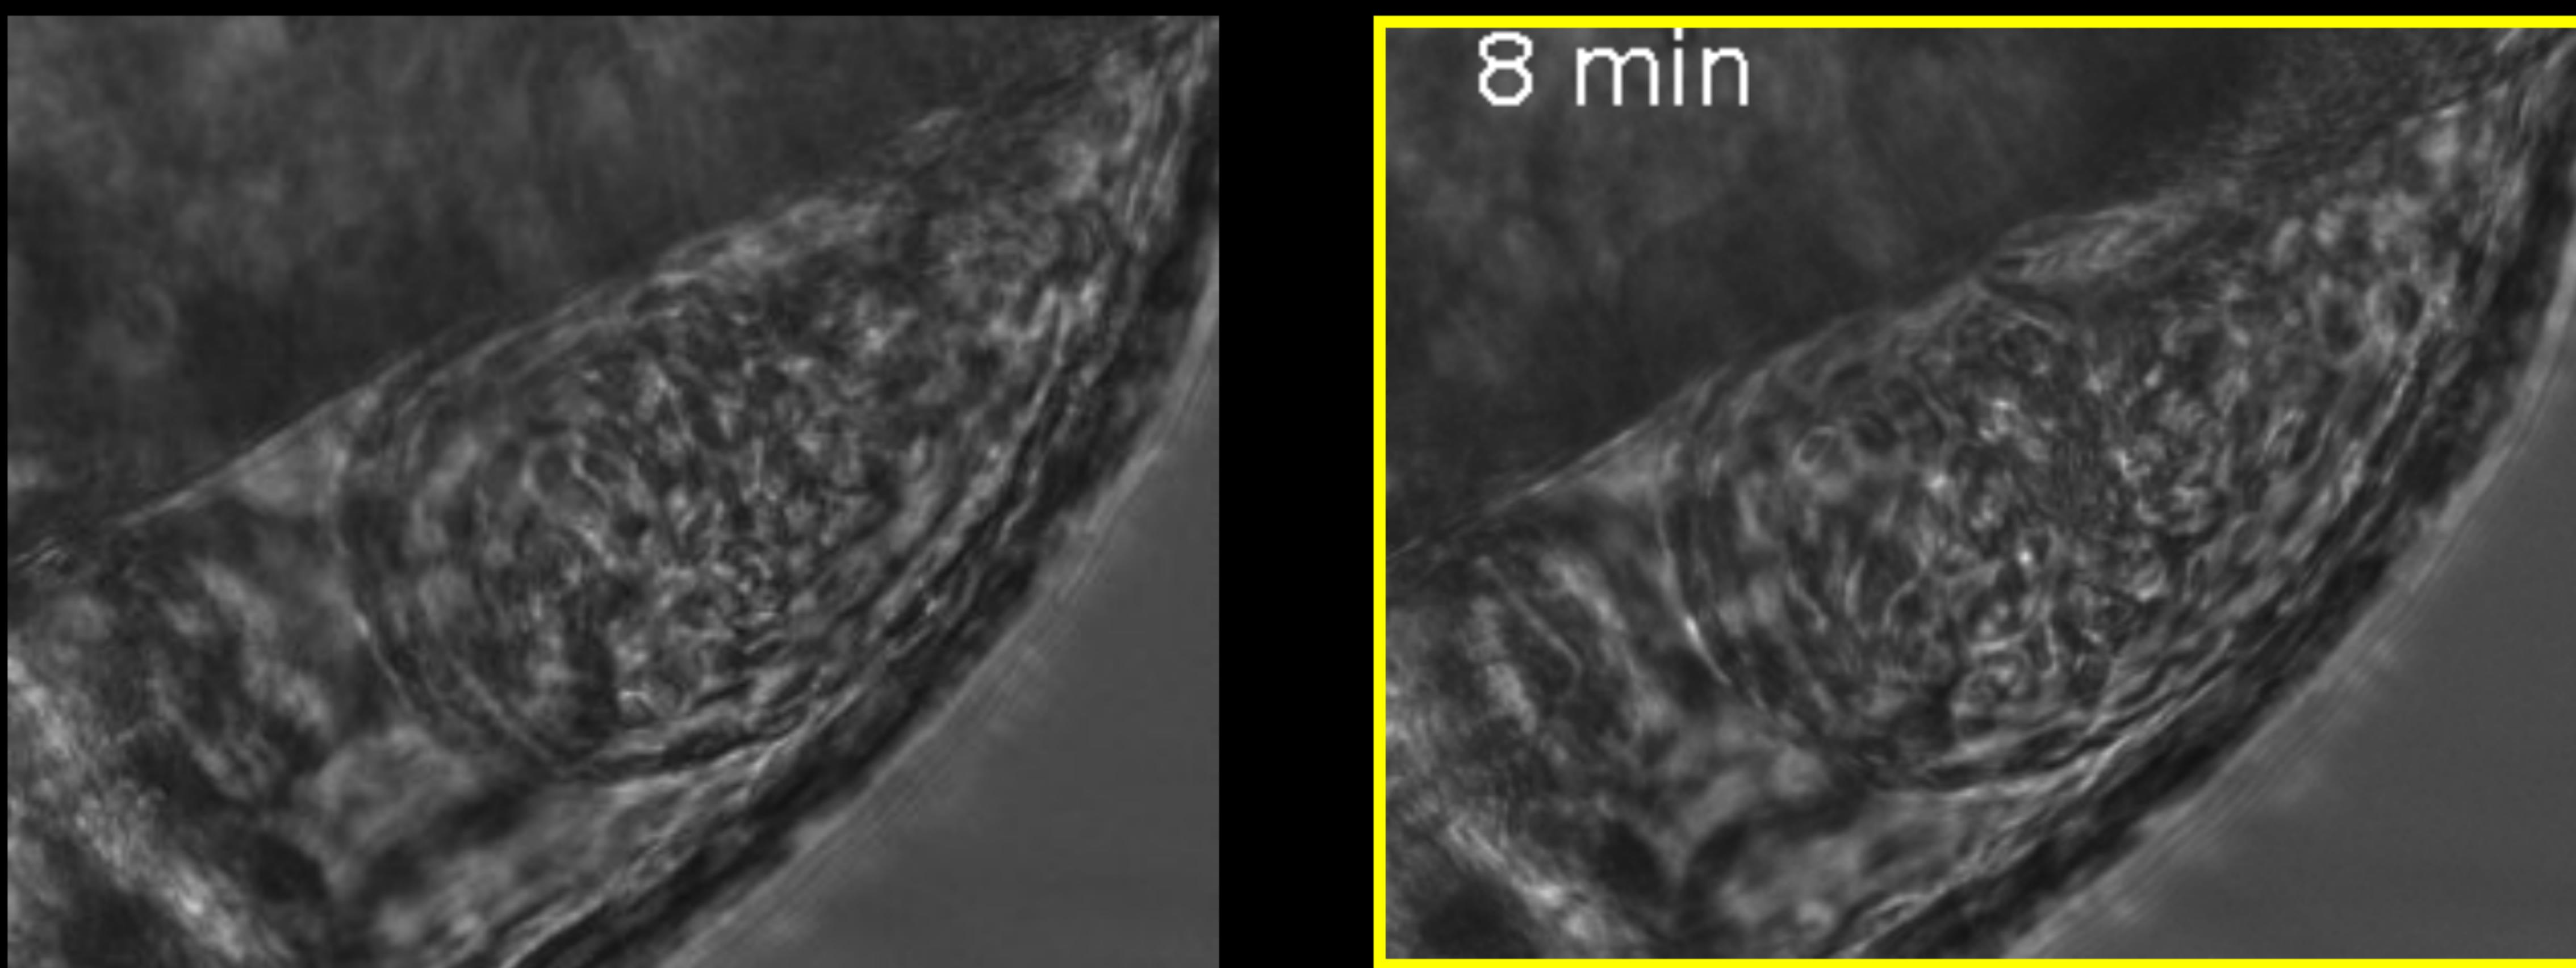

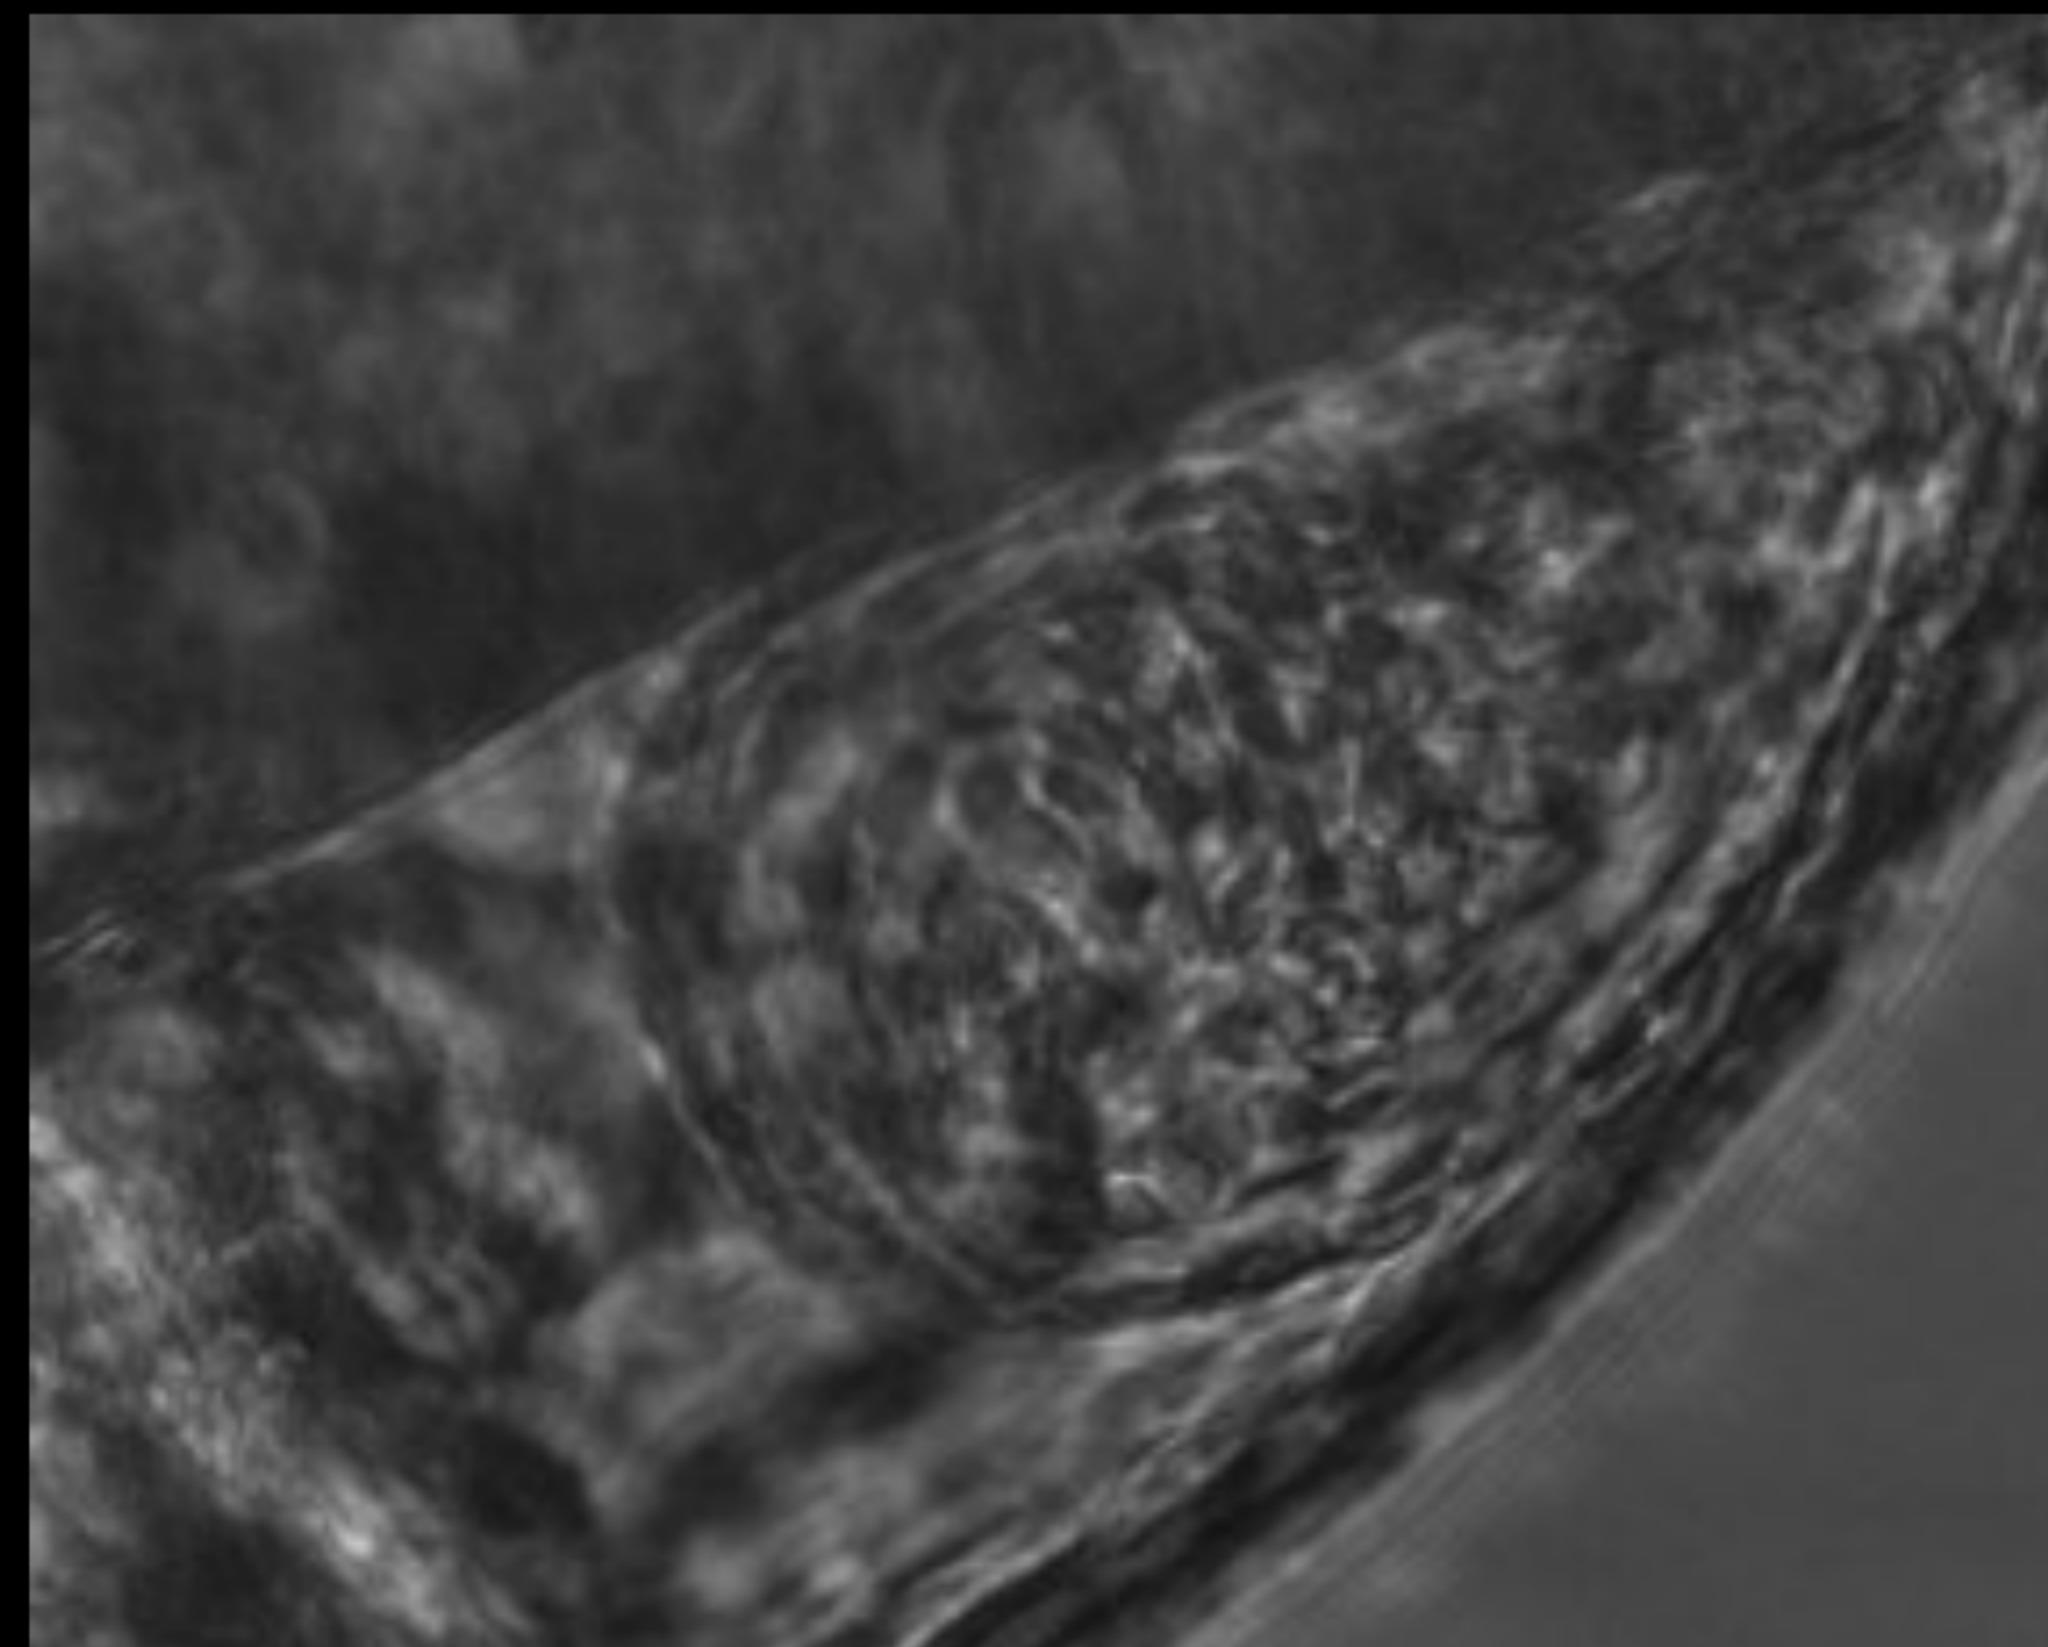

Taylor *et al.* J. of Biomedical Optics (2011)

BUT...

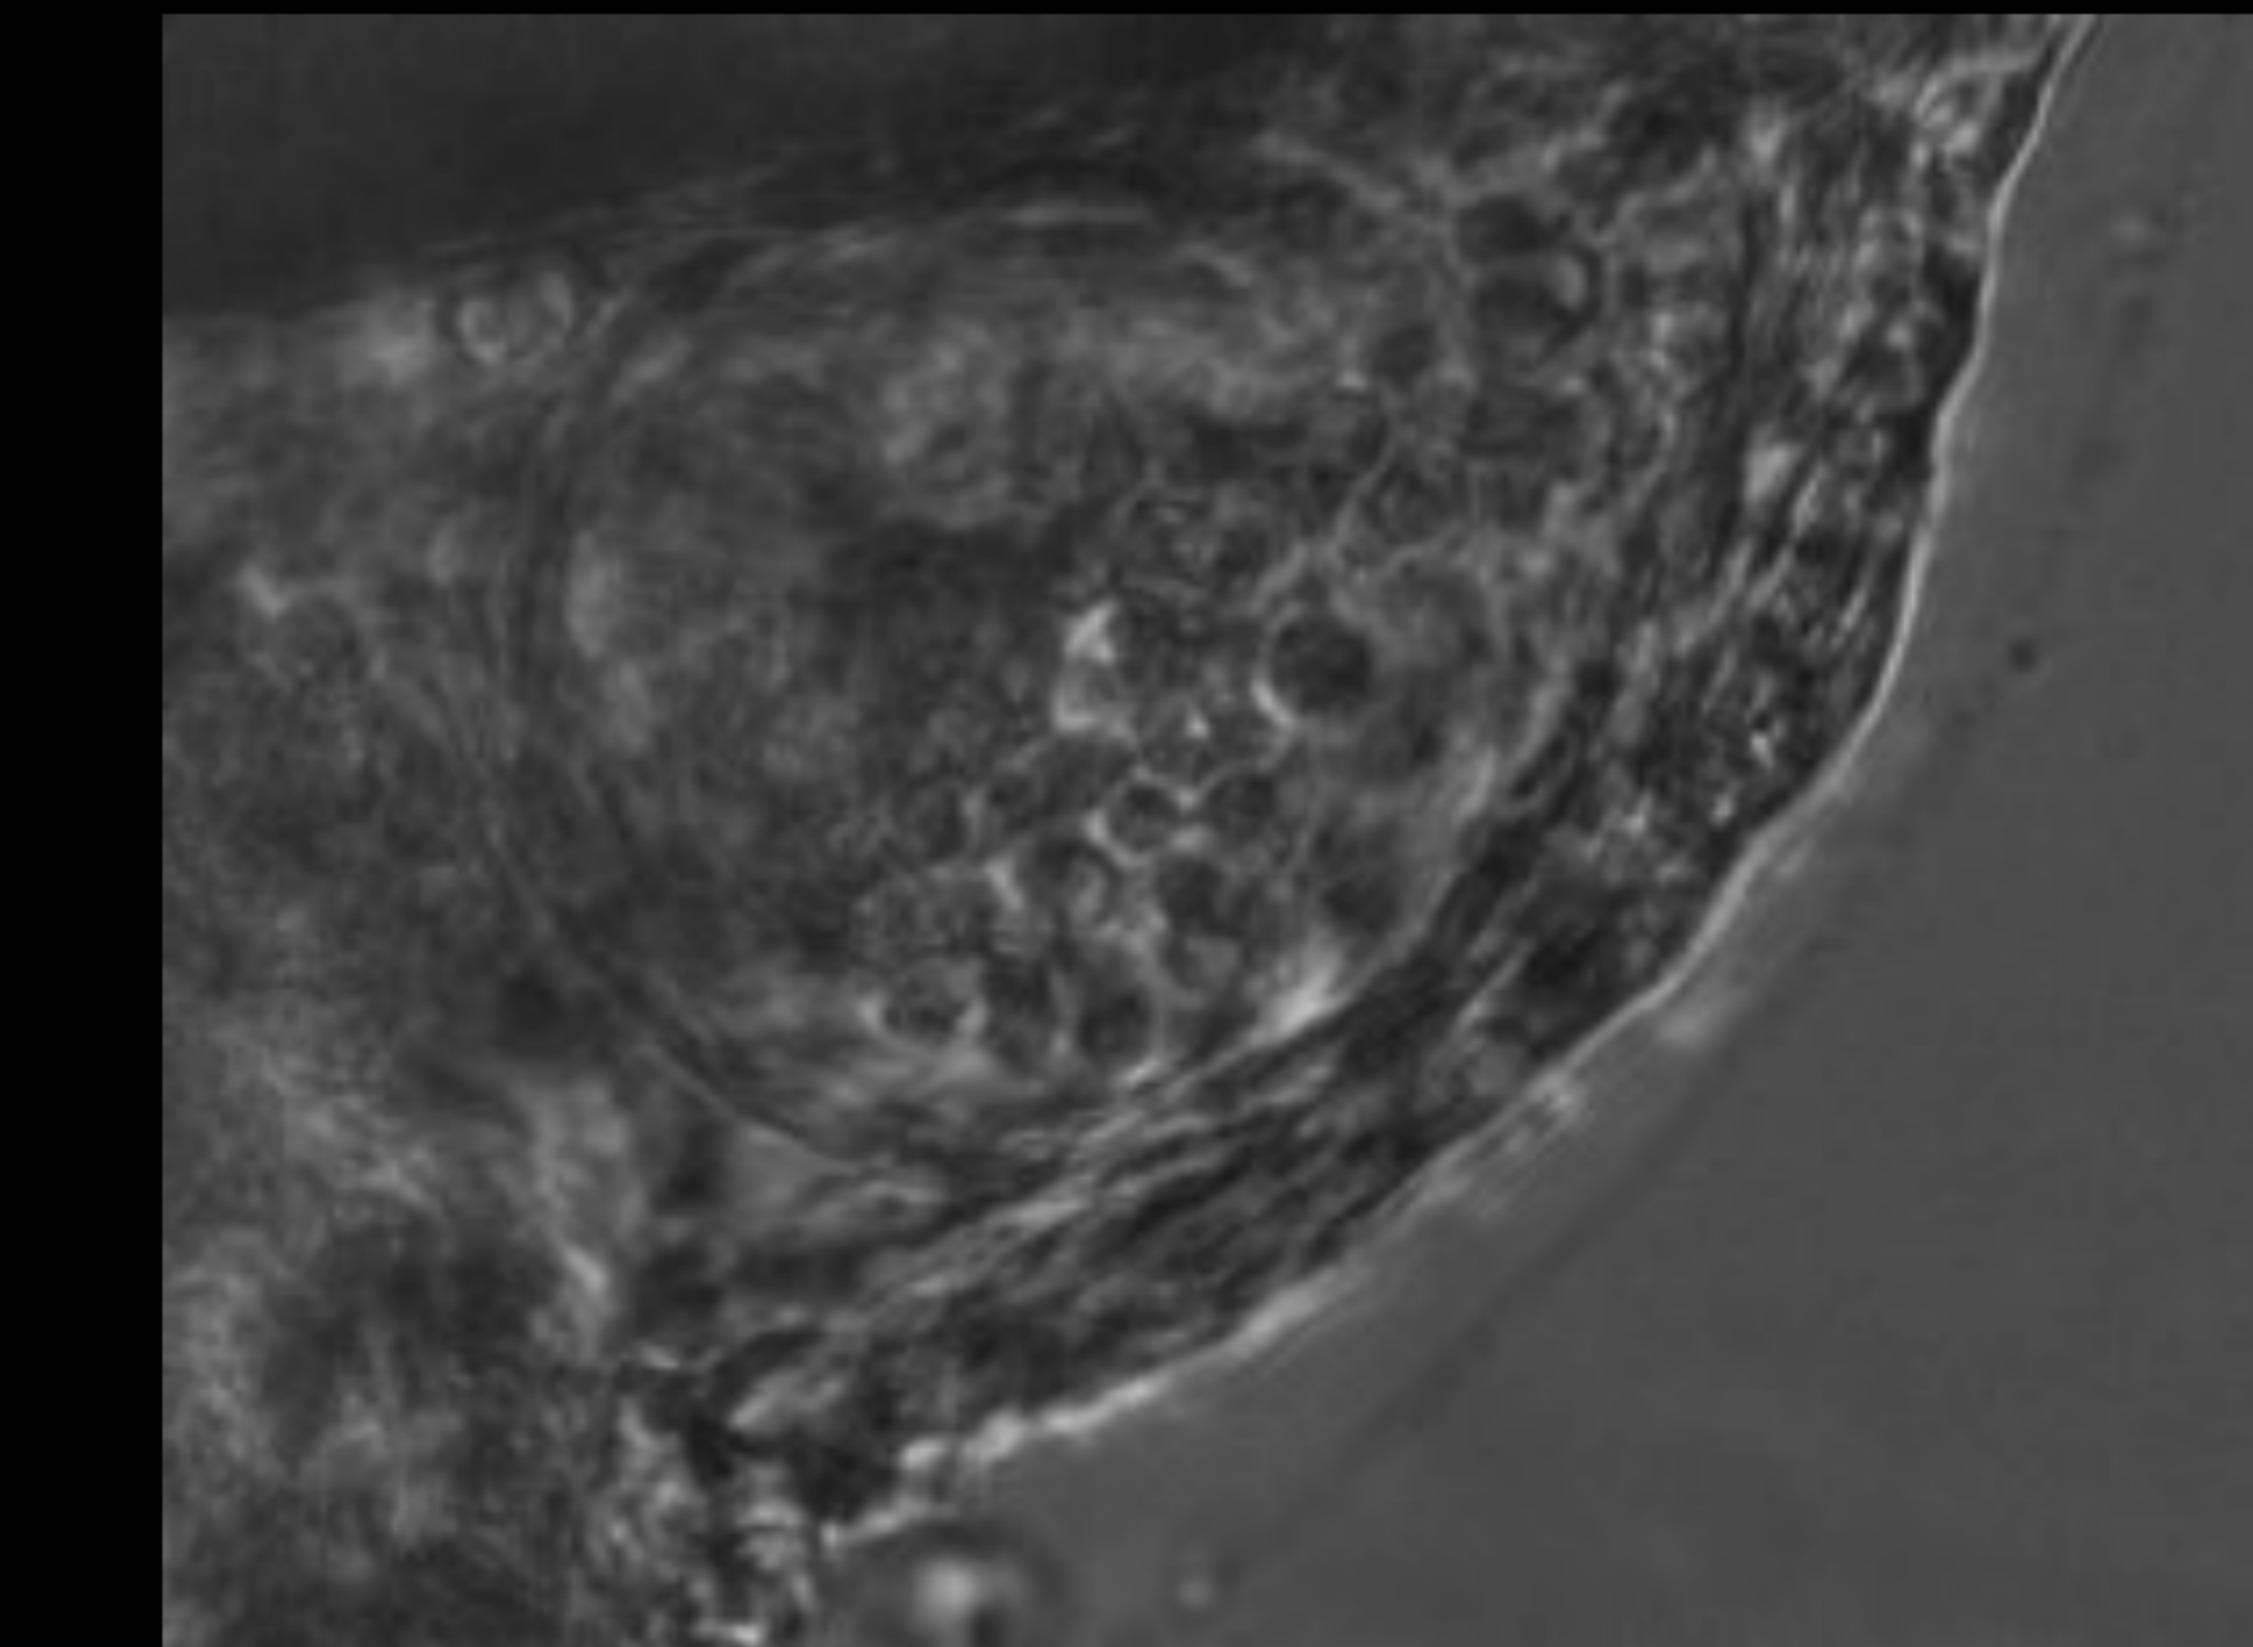

Initial Target Frame

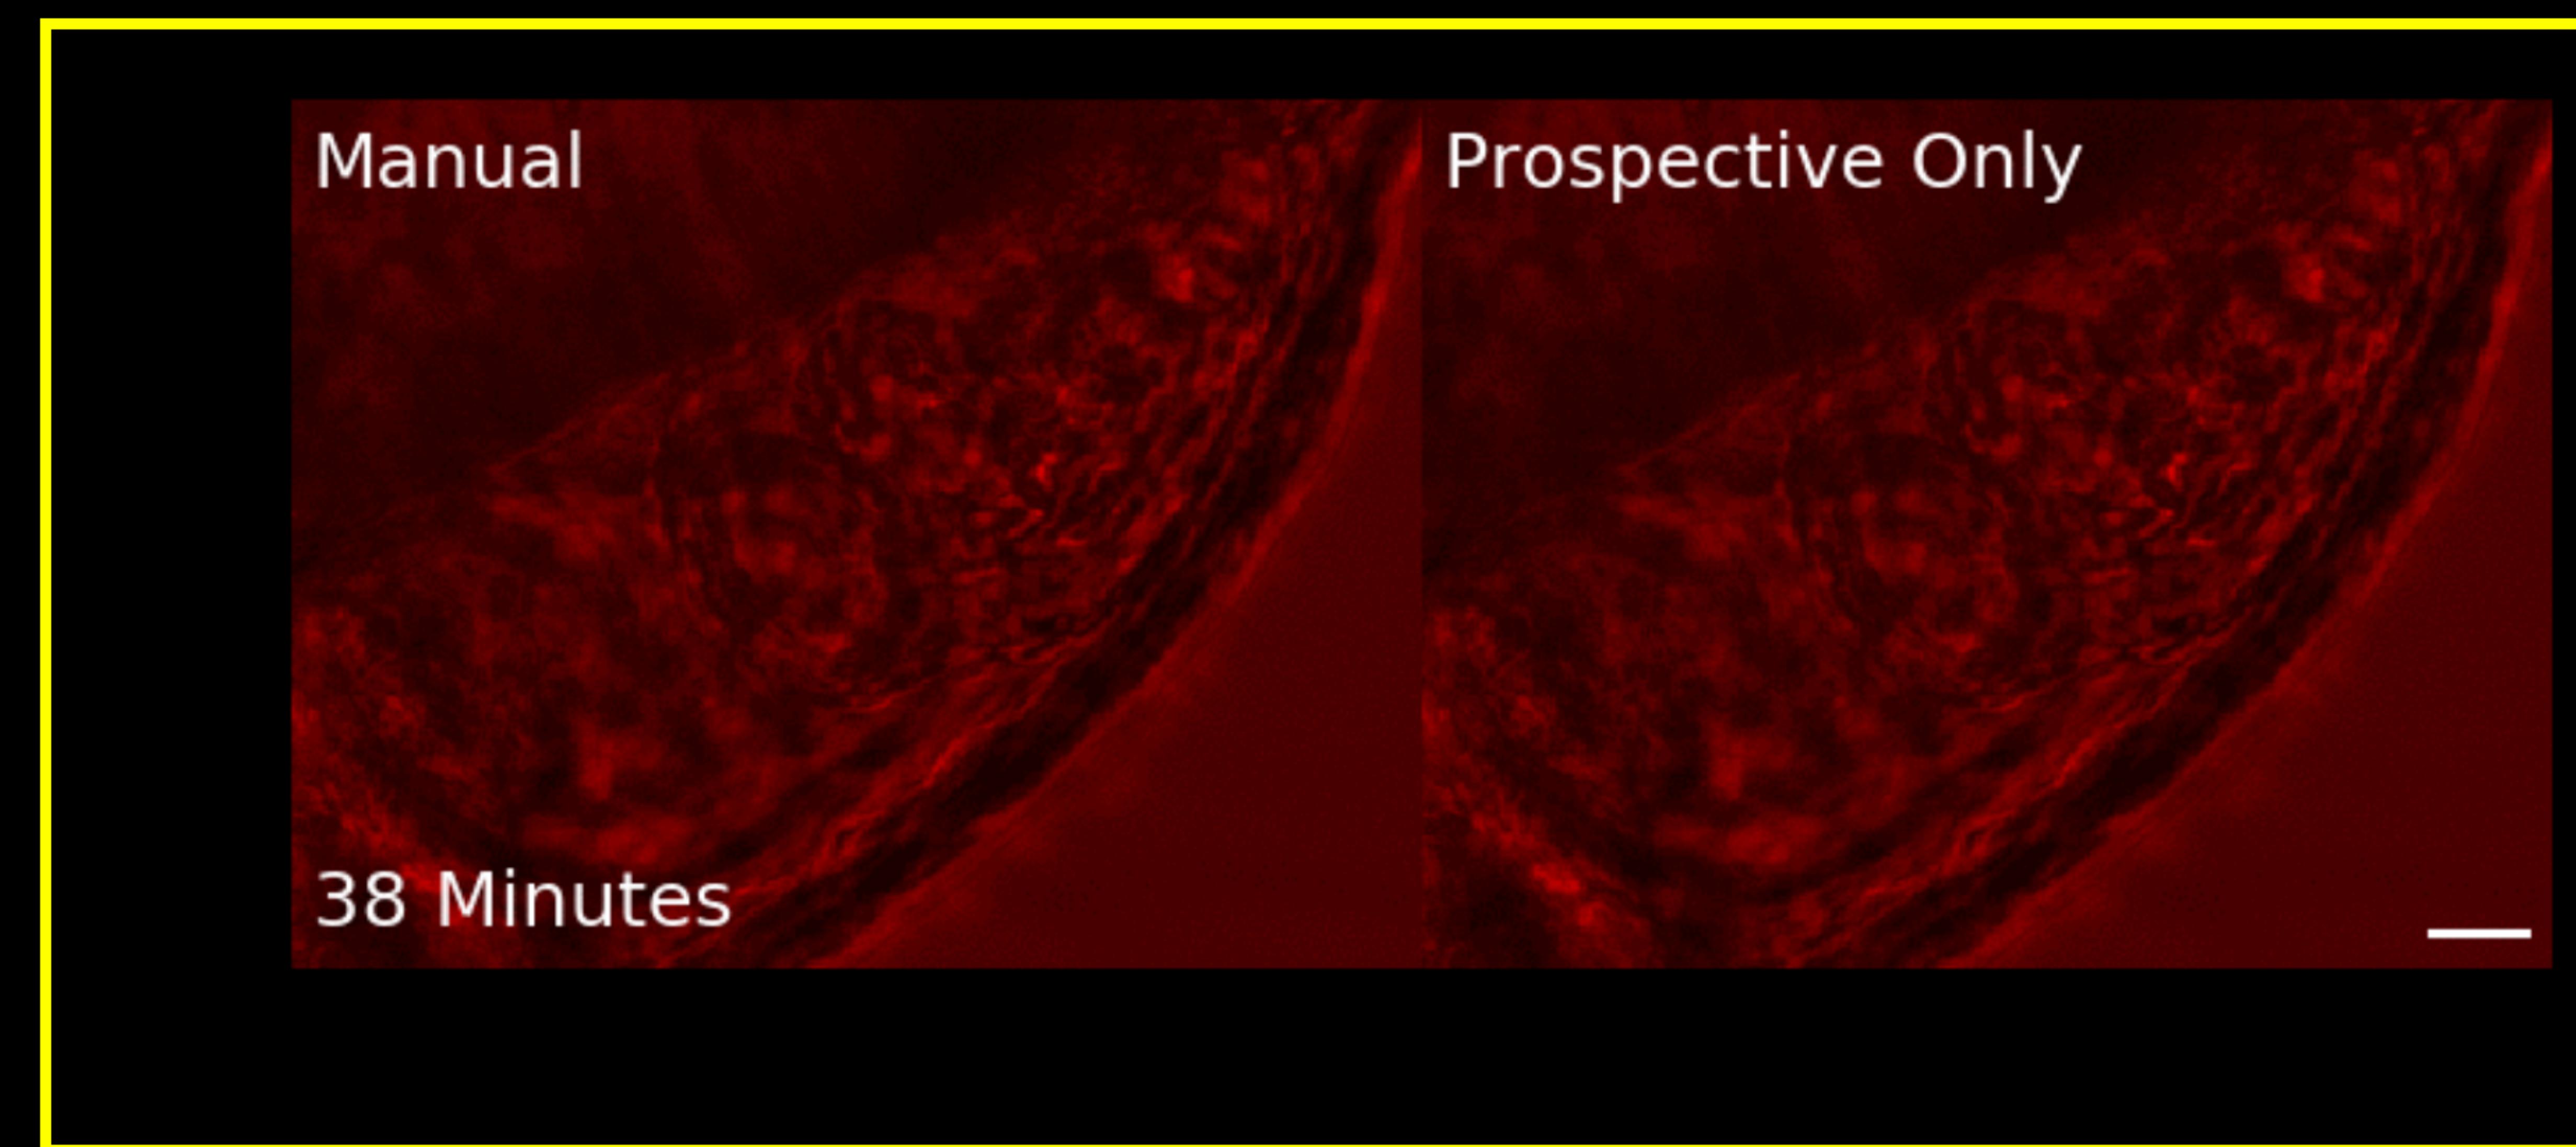

Initial Target Frame

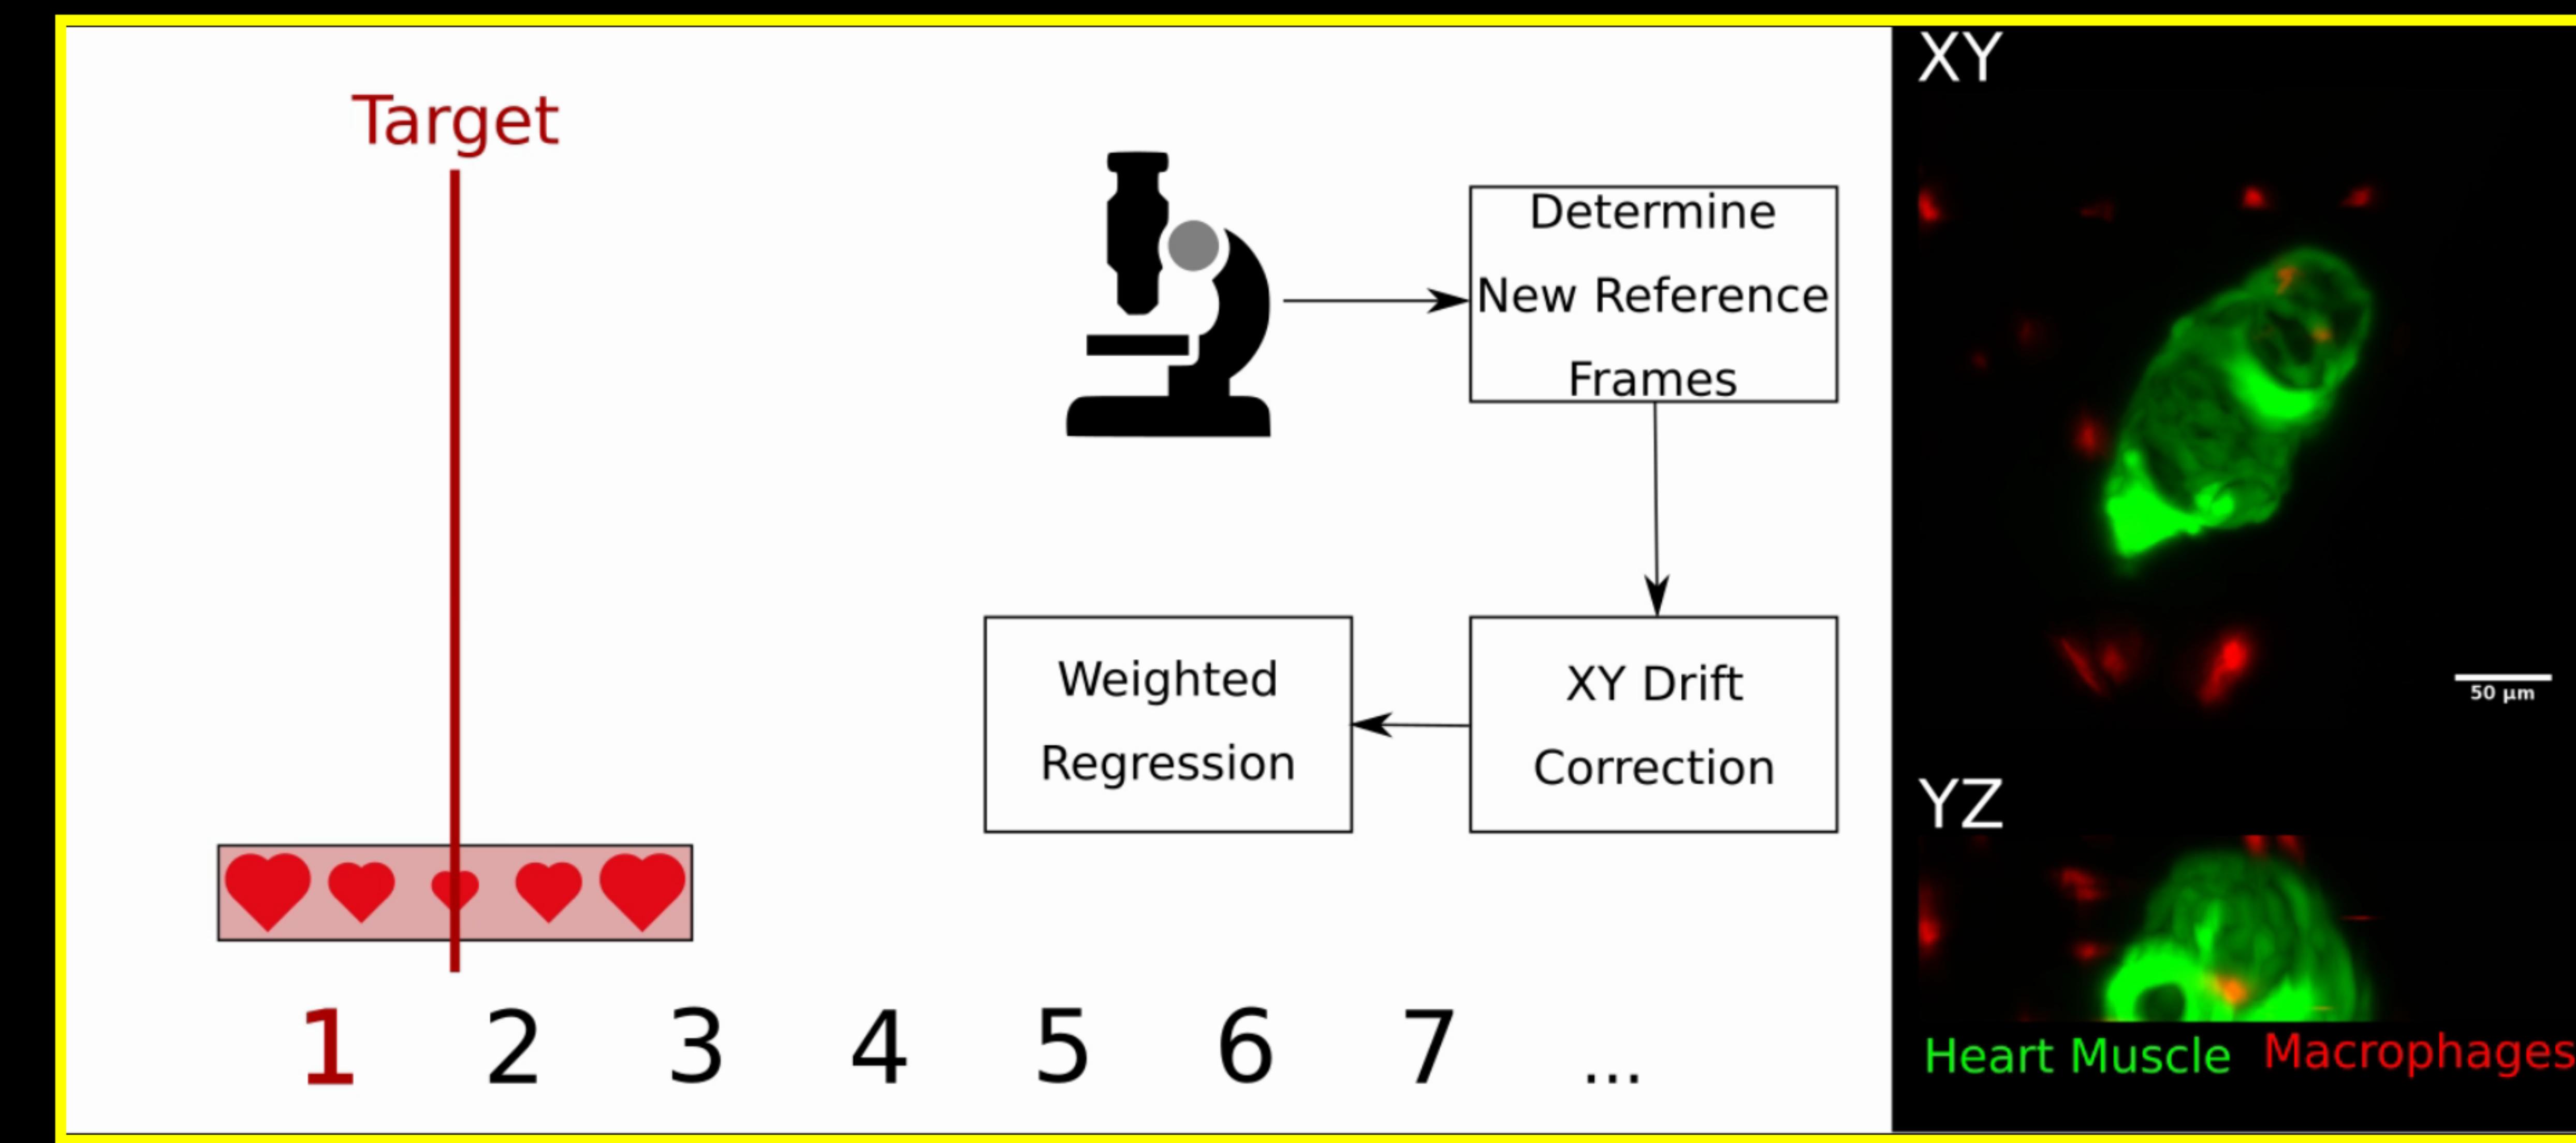

Final Target Frame

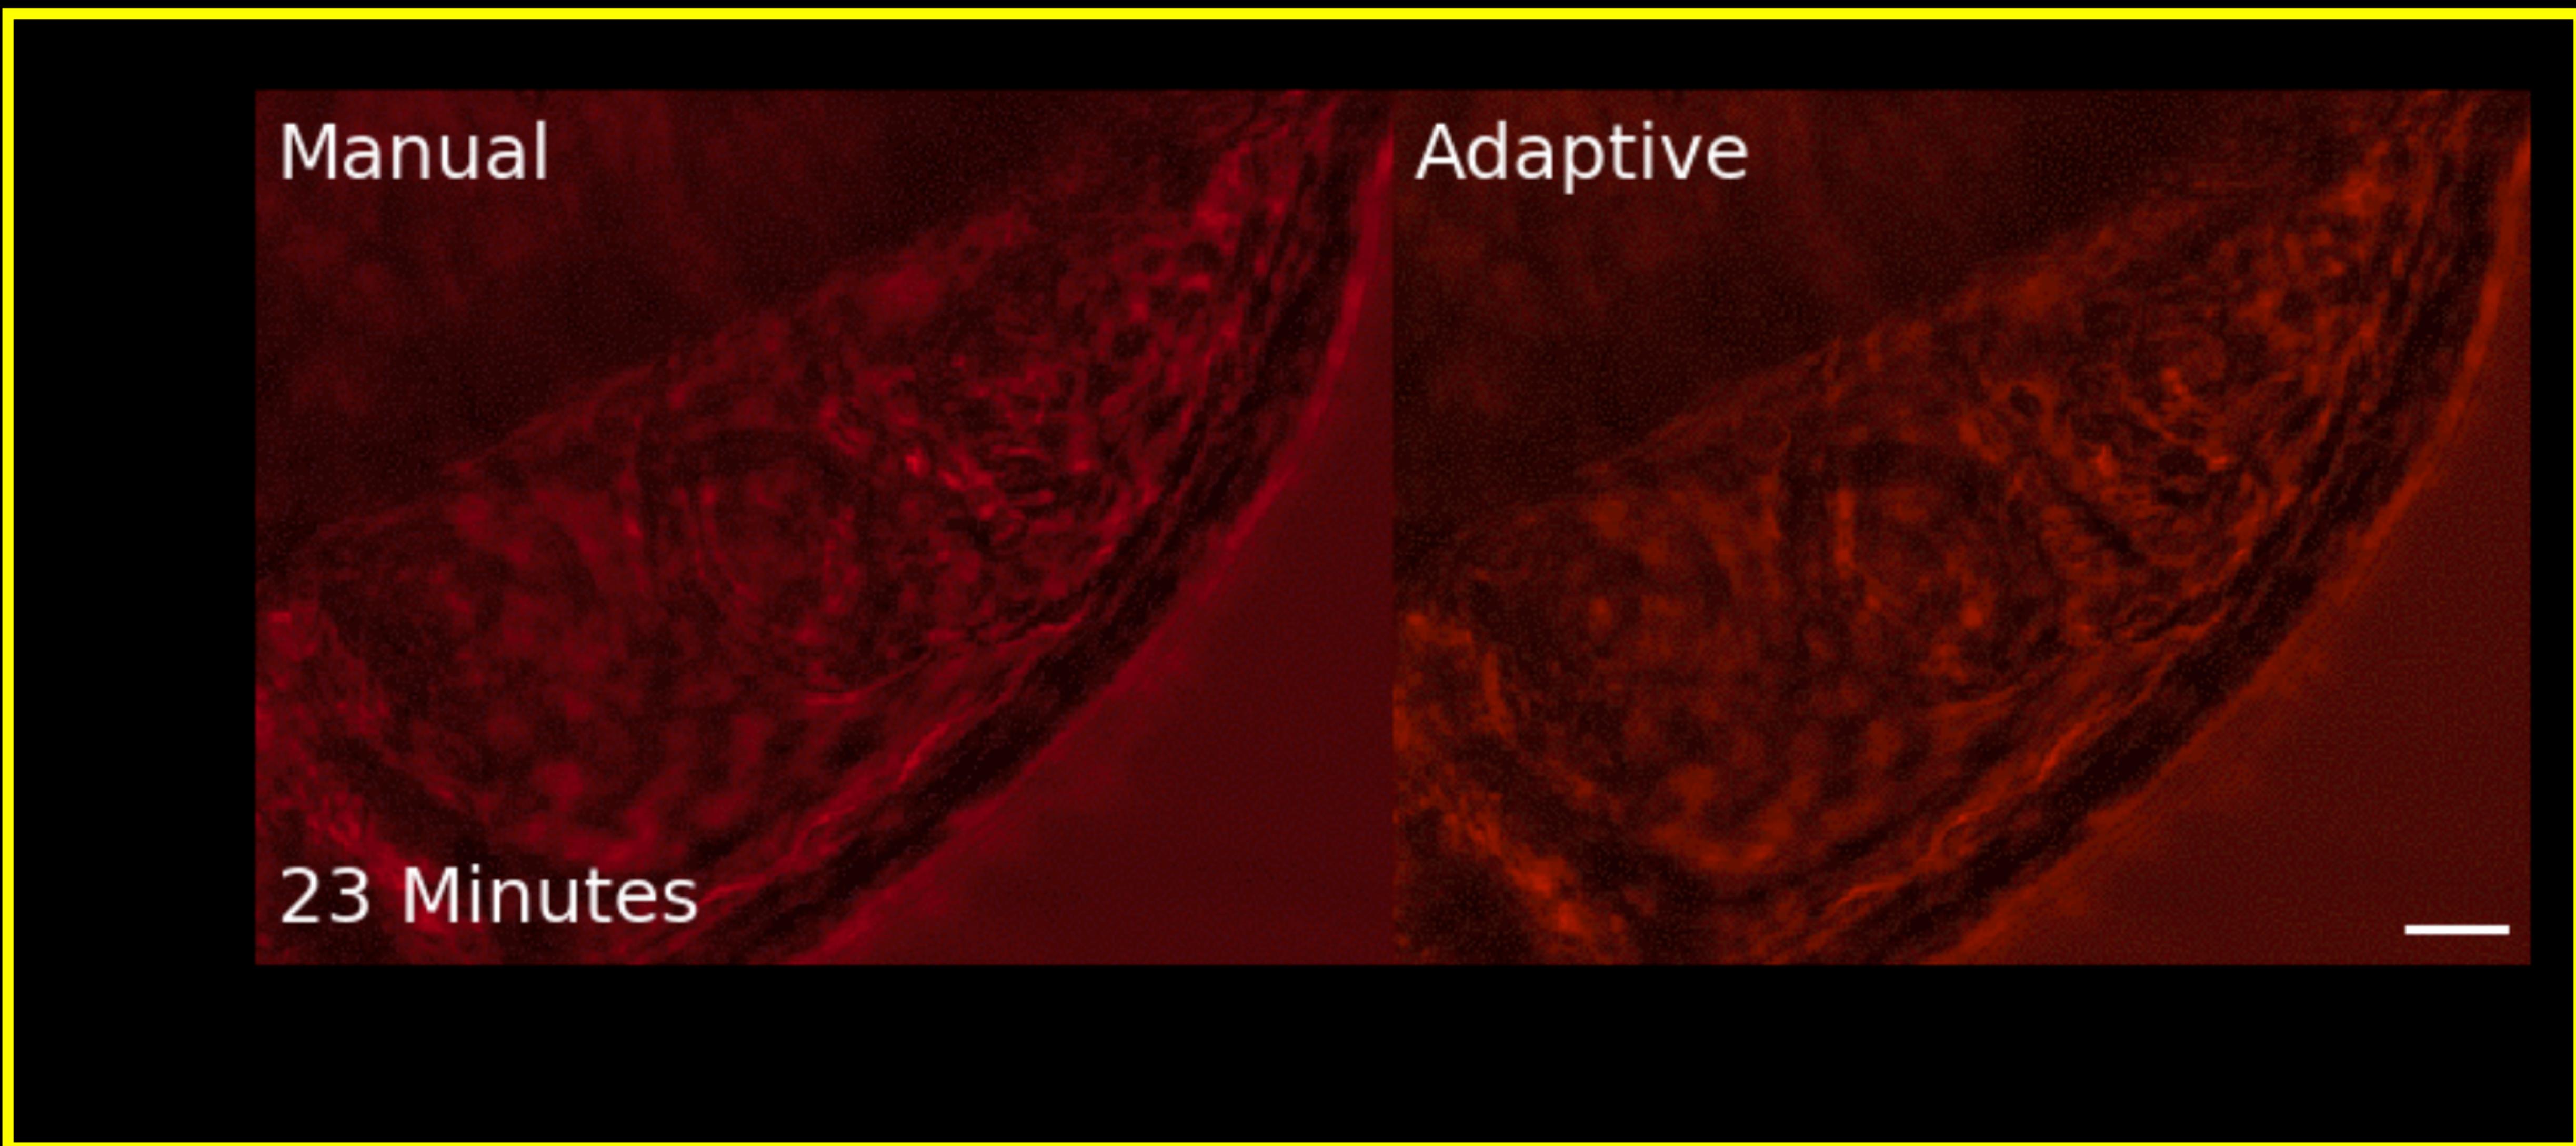

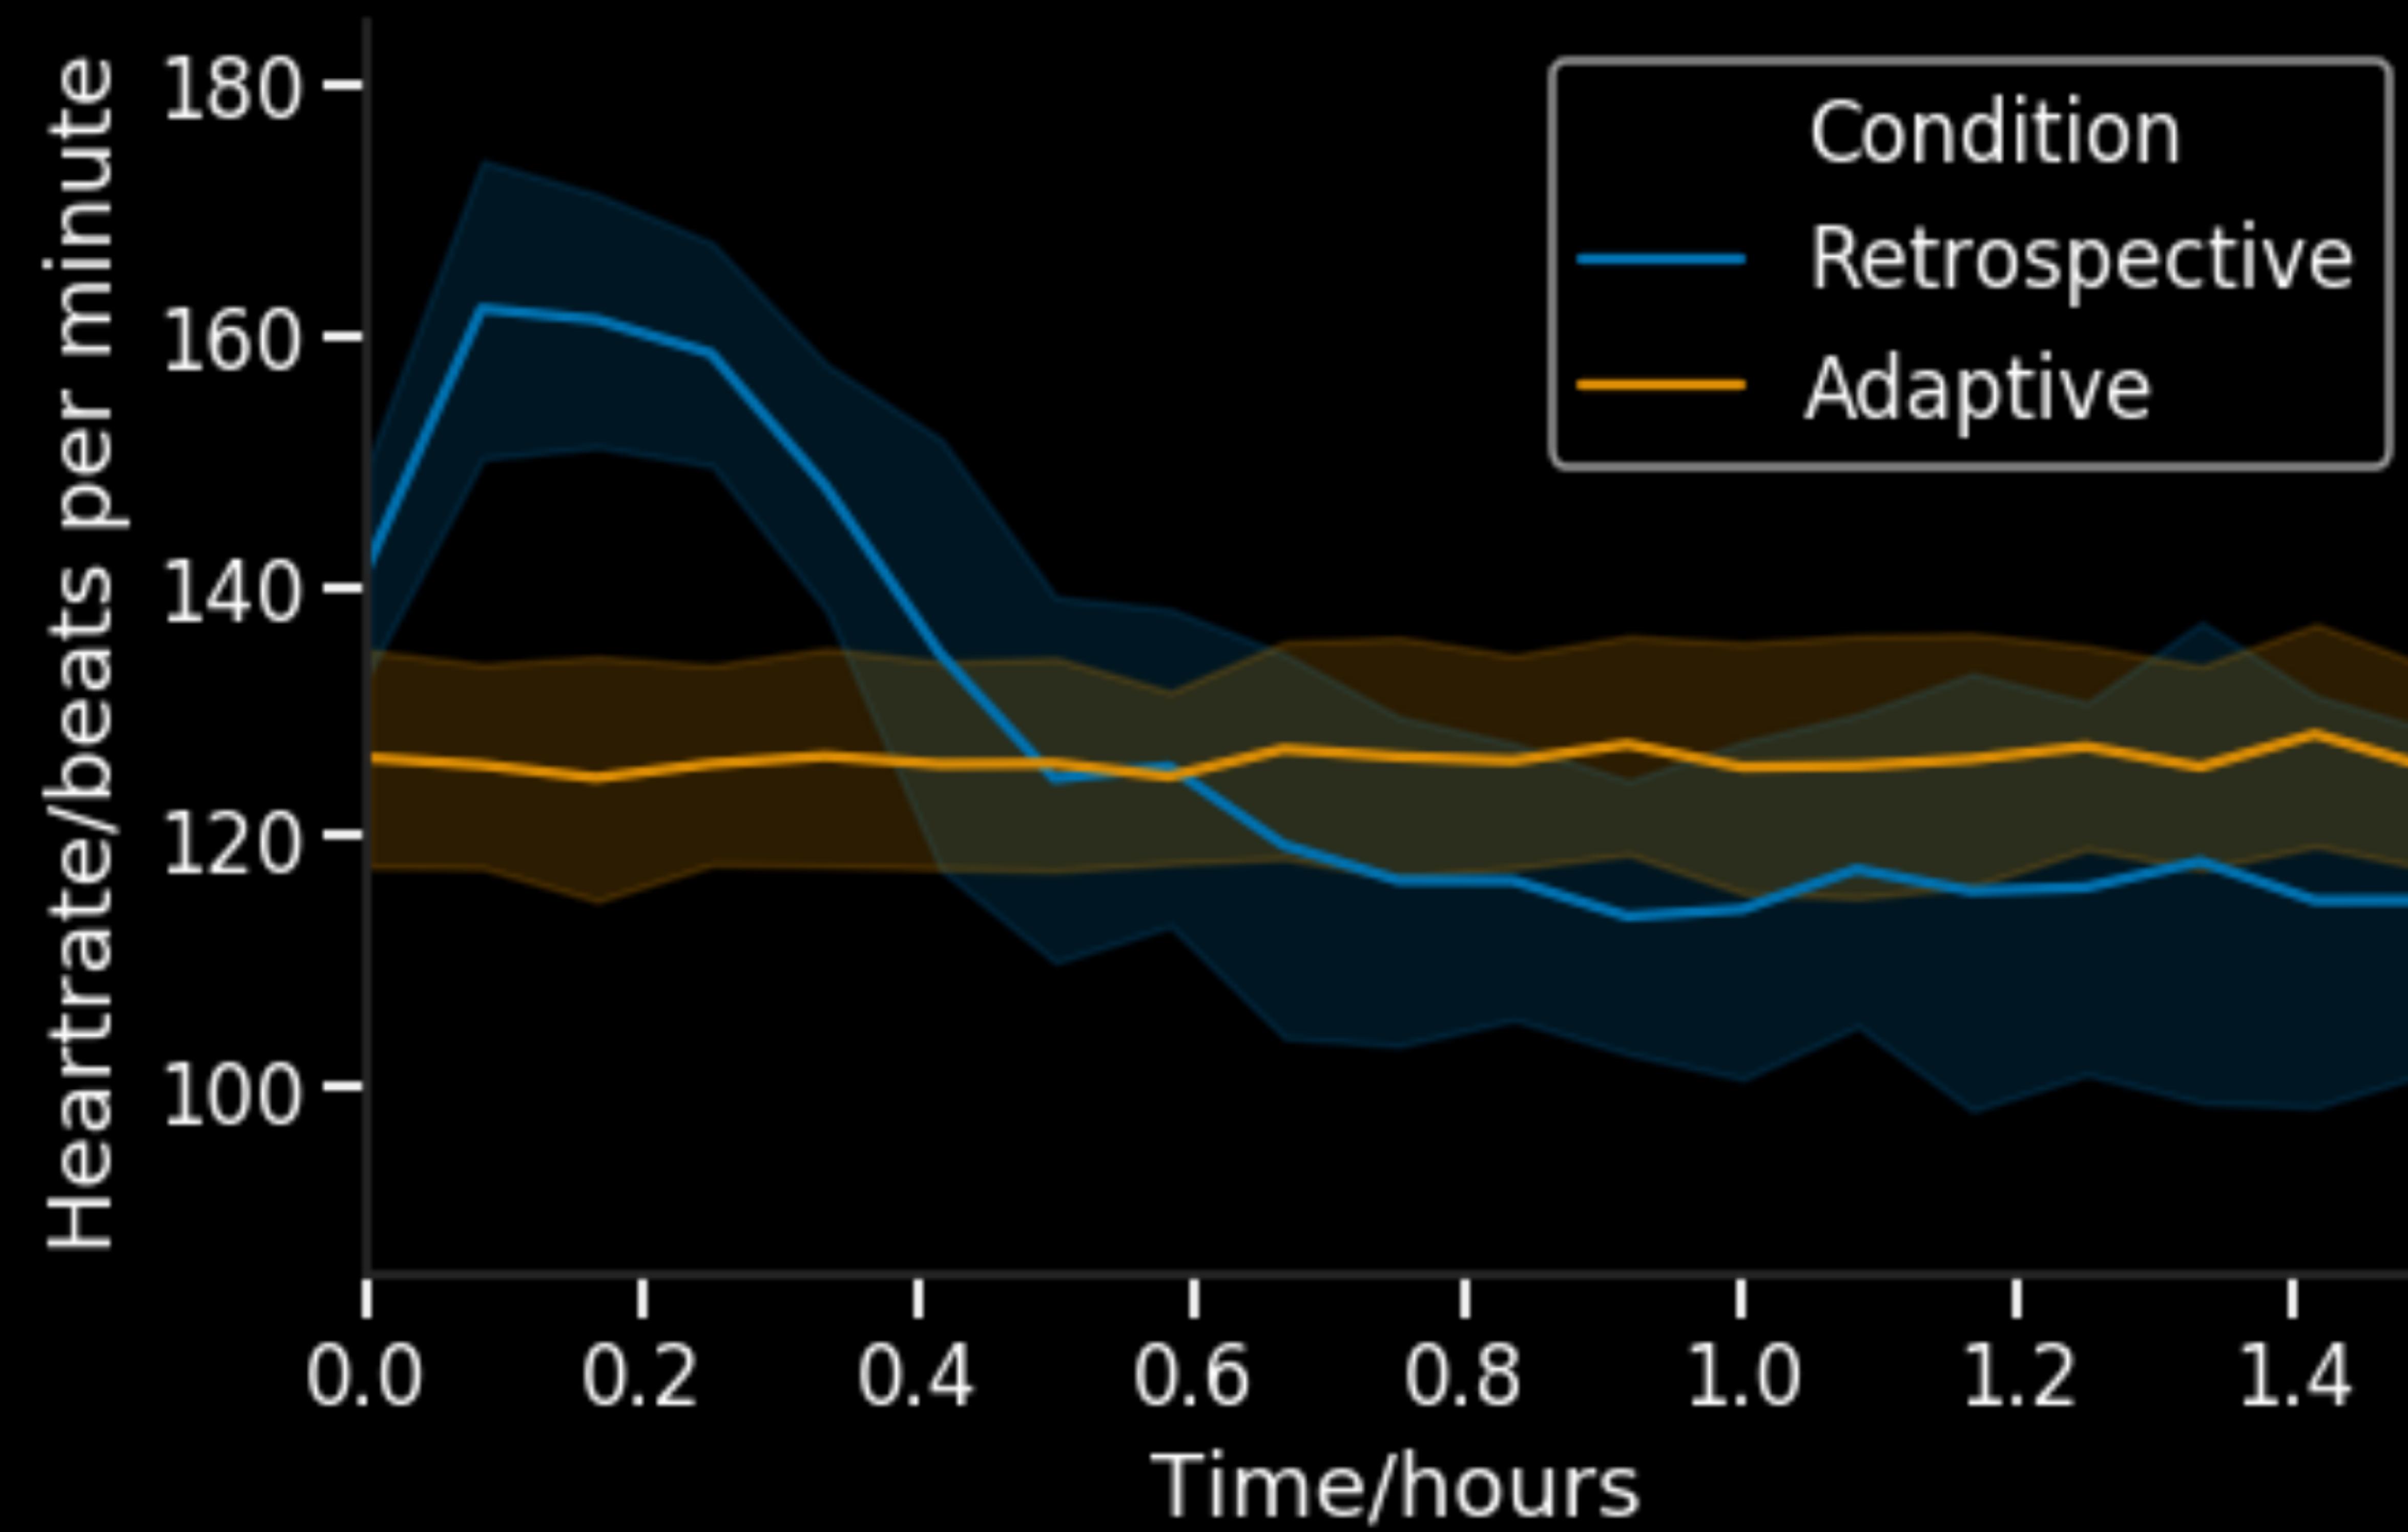

ADAPTIVE PROSPECTIVE OPTICAL GATING

Taylor *et al.* bioRxiv 526830 (2019)

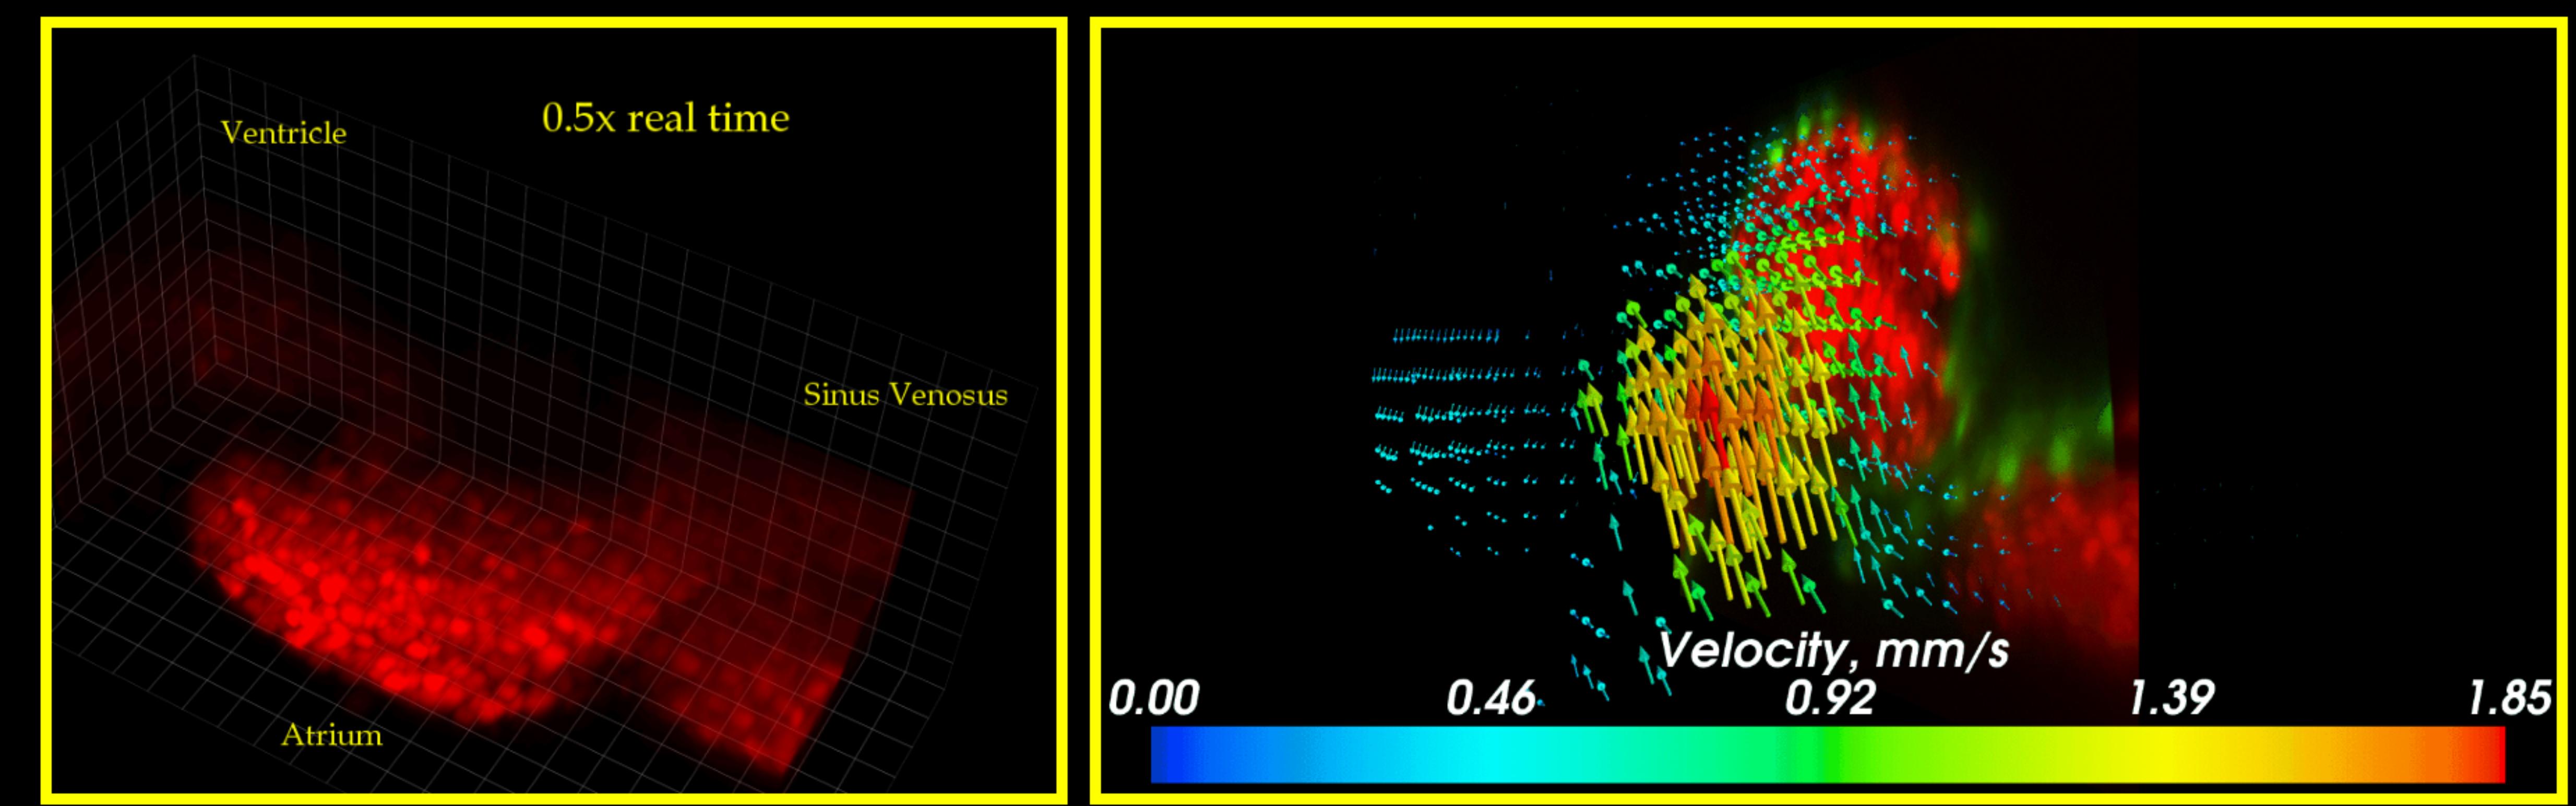

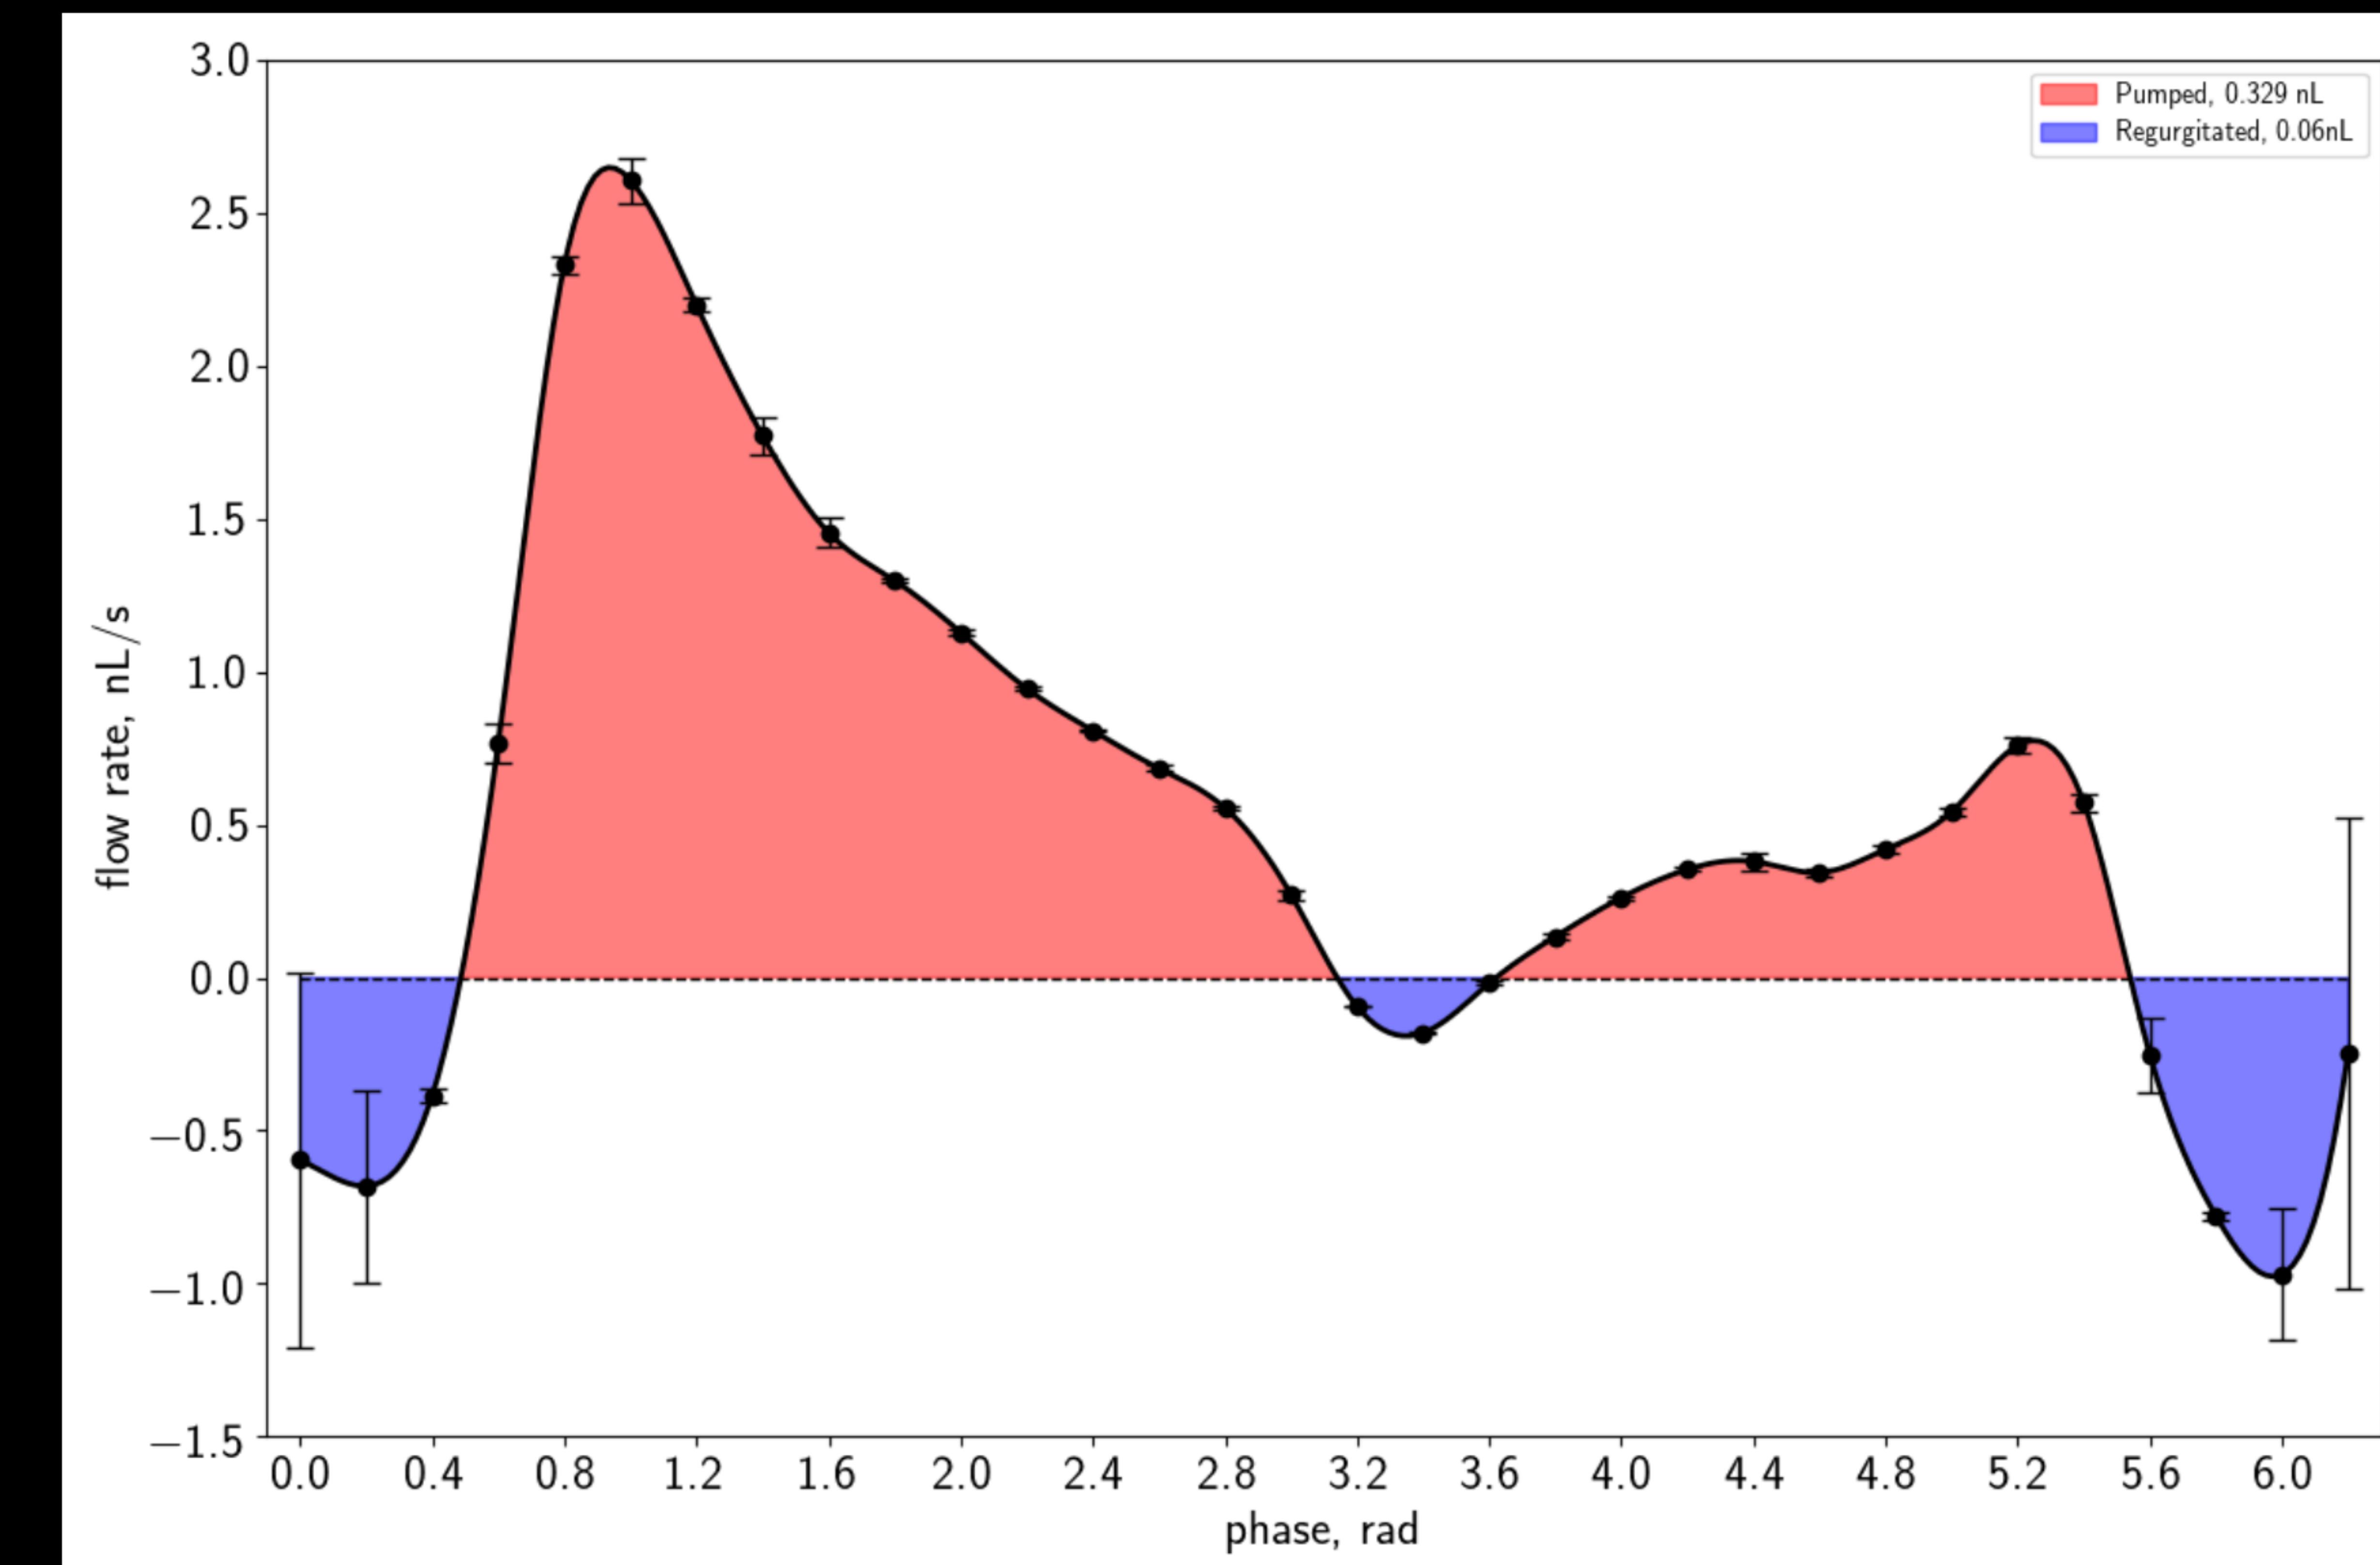

WHAT?

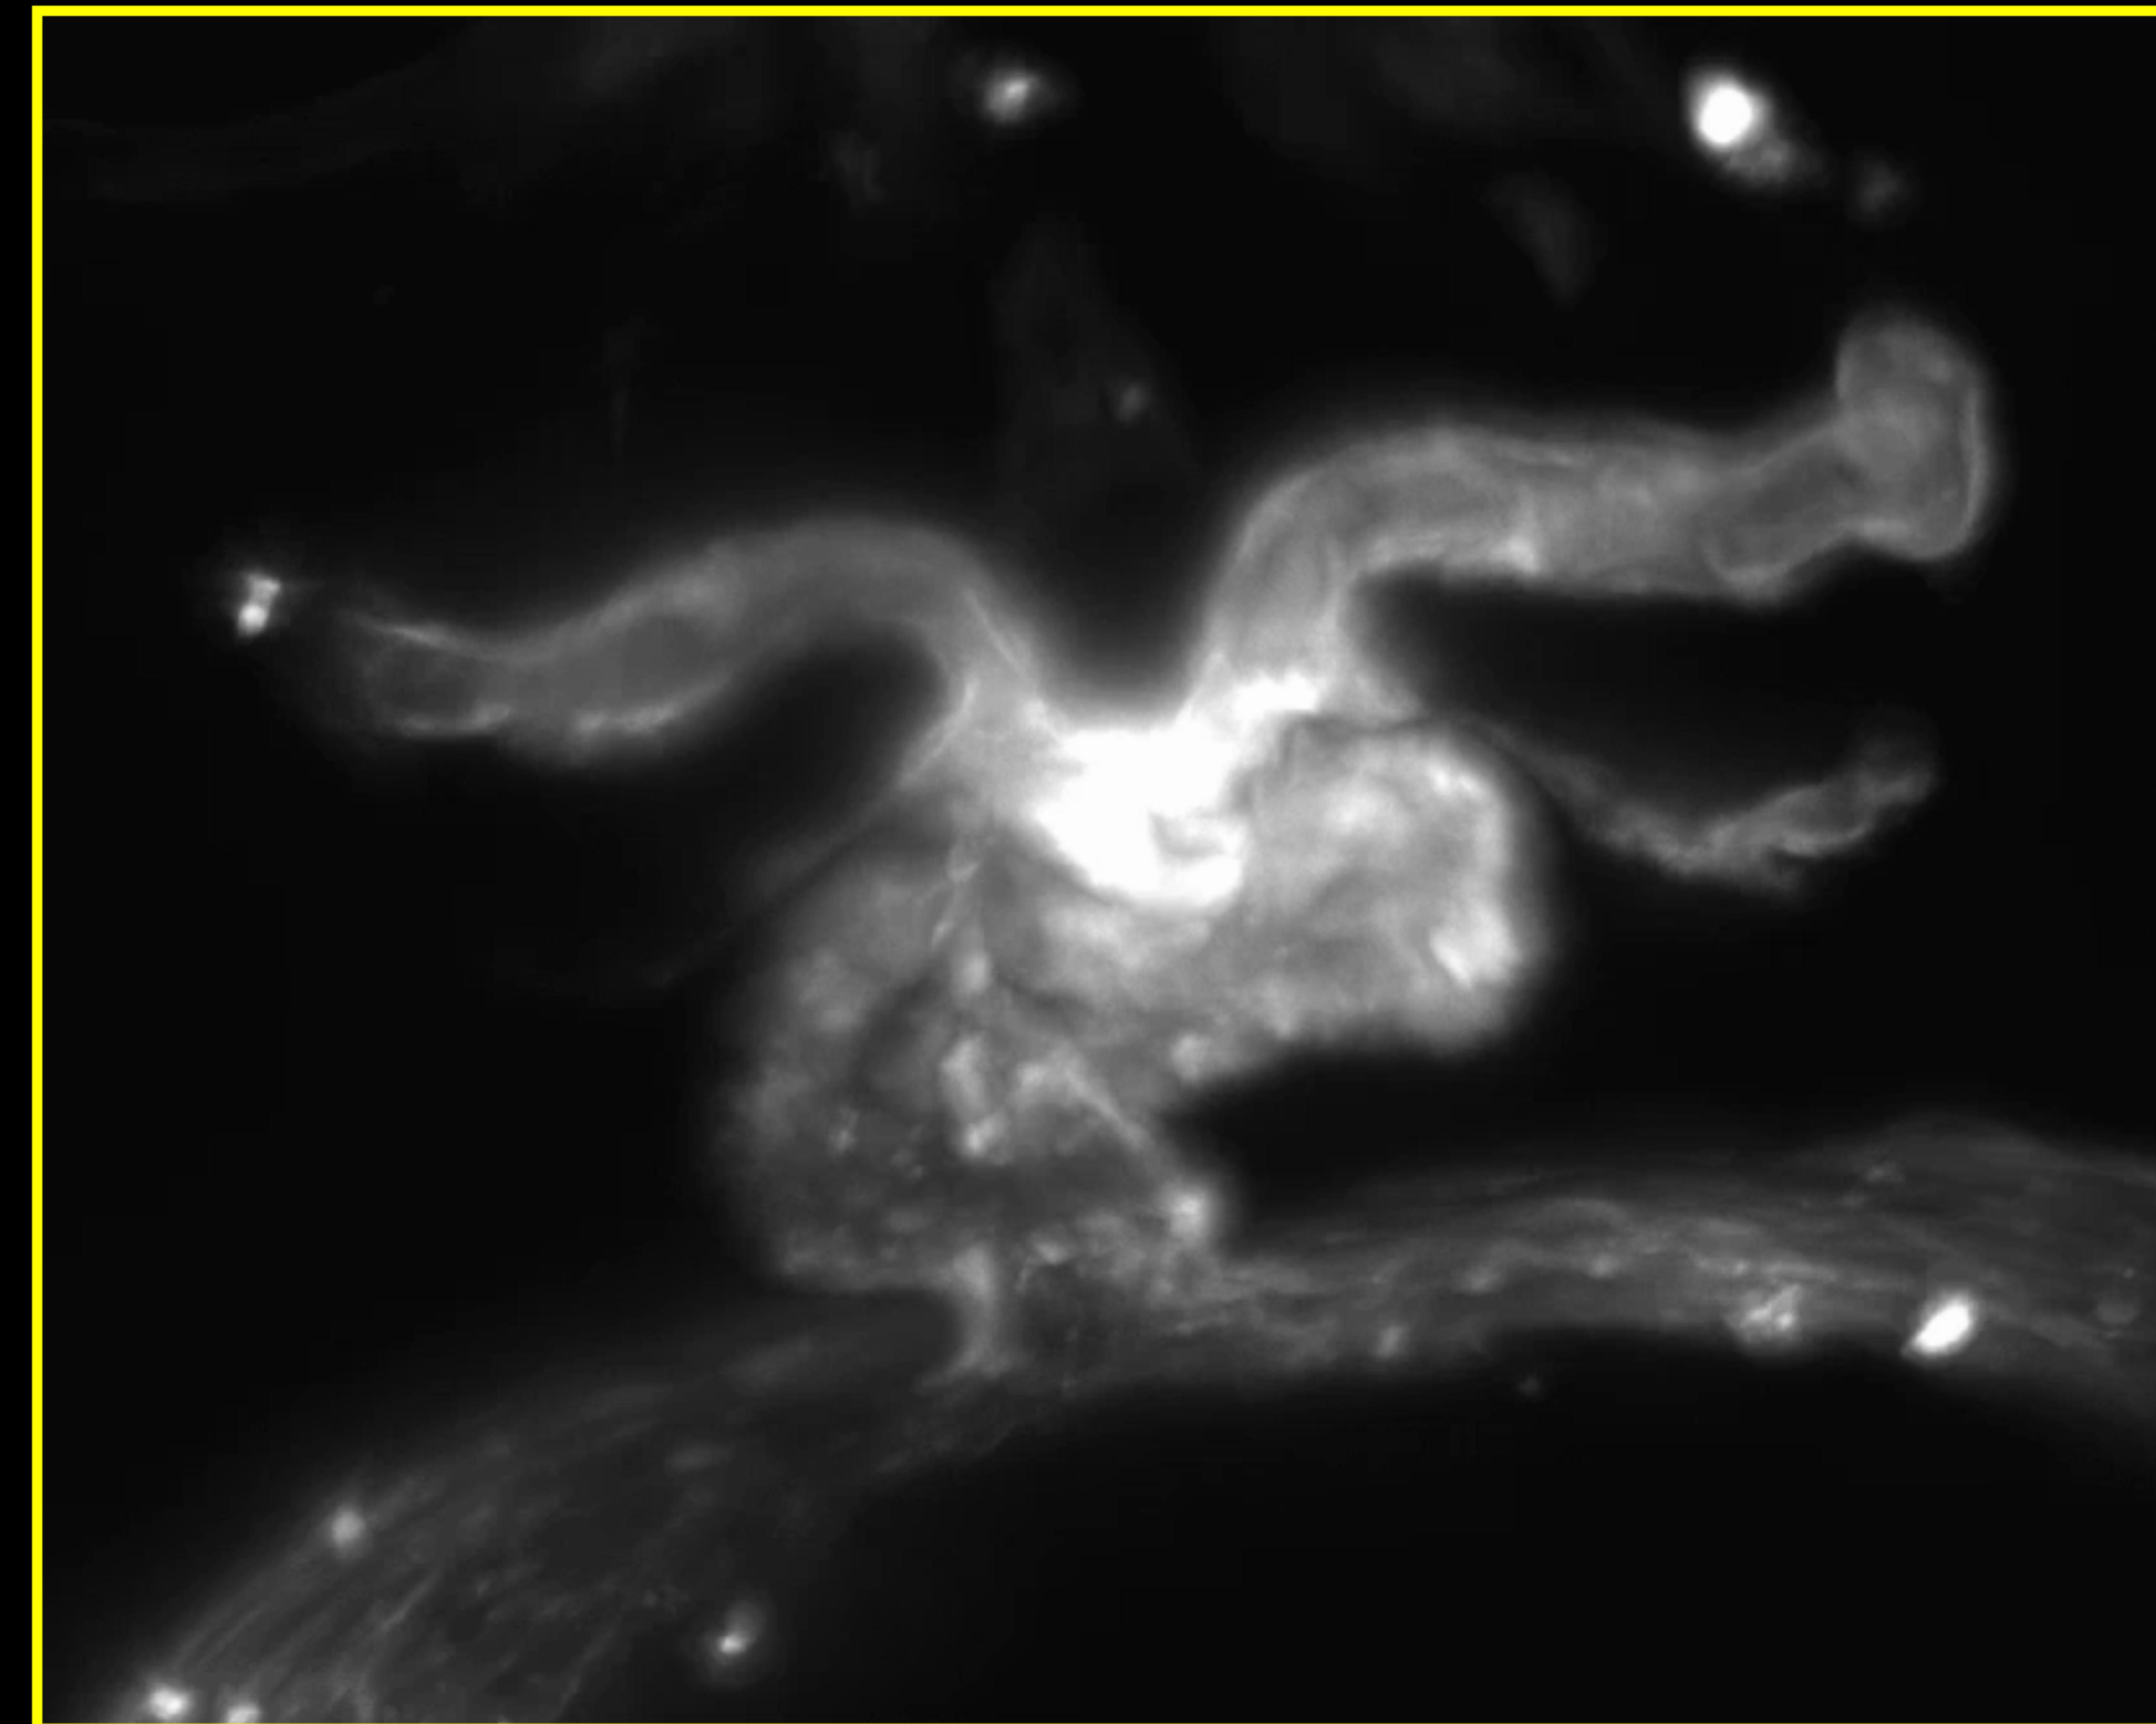

QUANTIFYING BLOOD FLOW

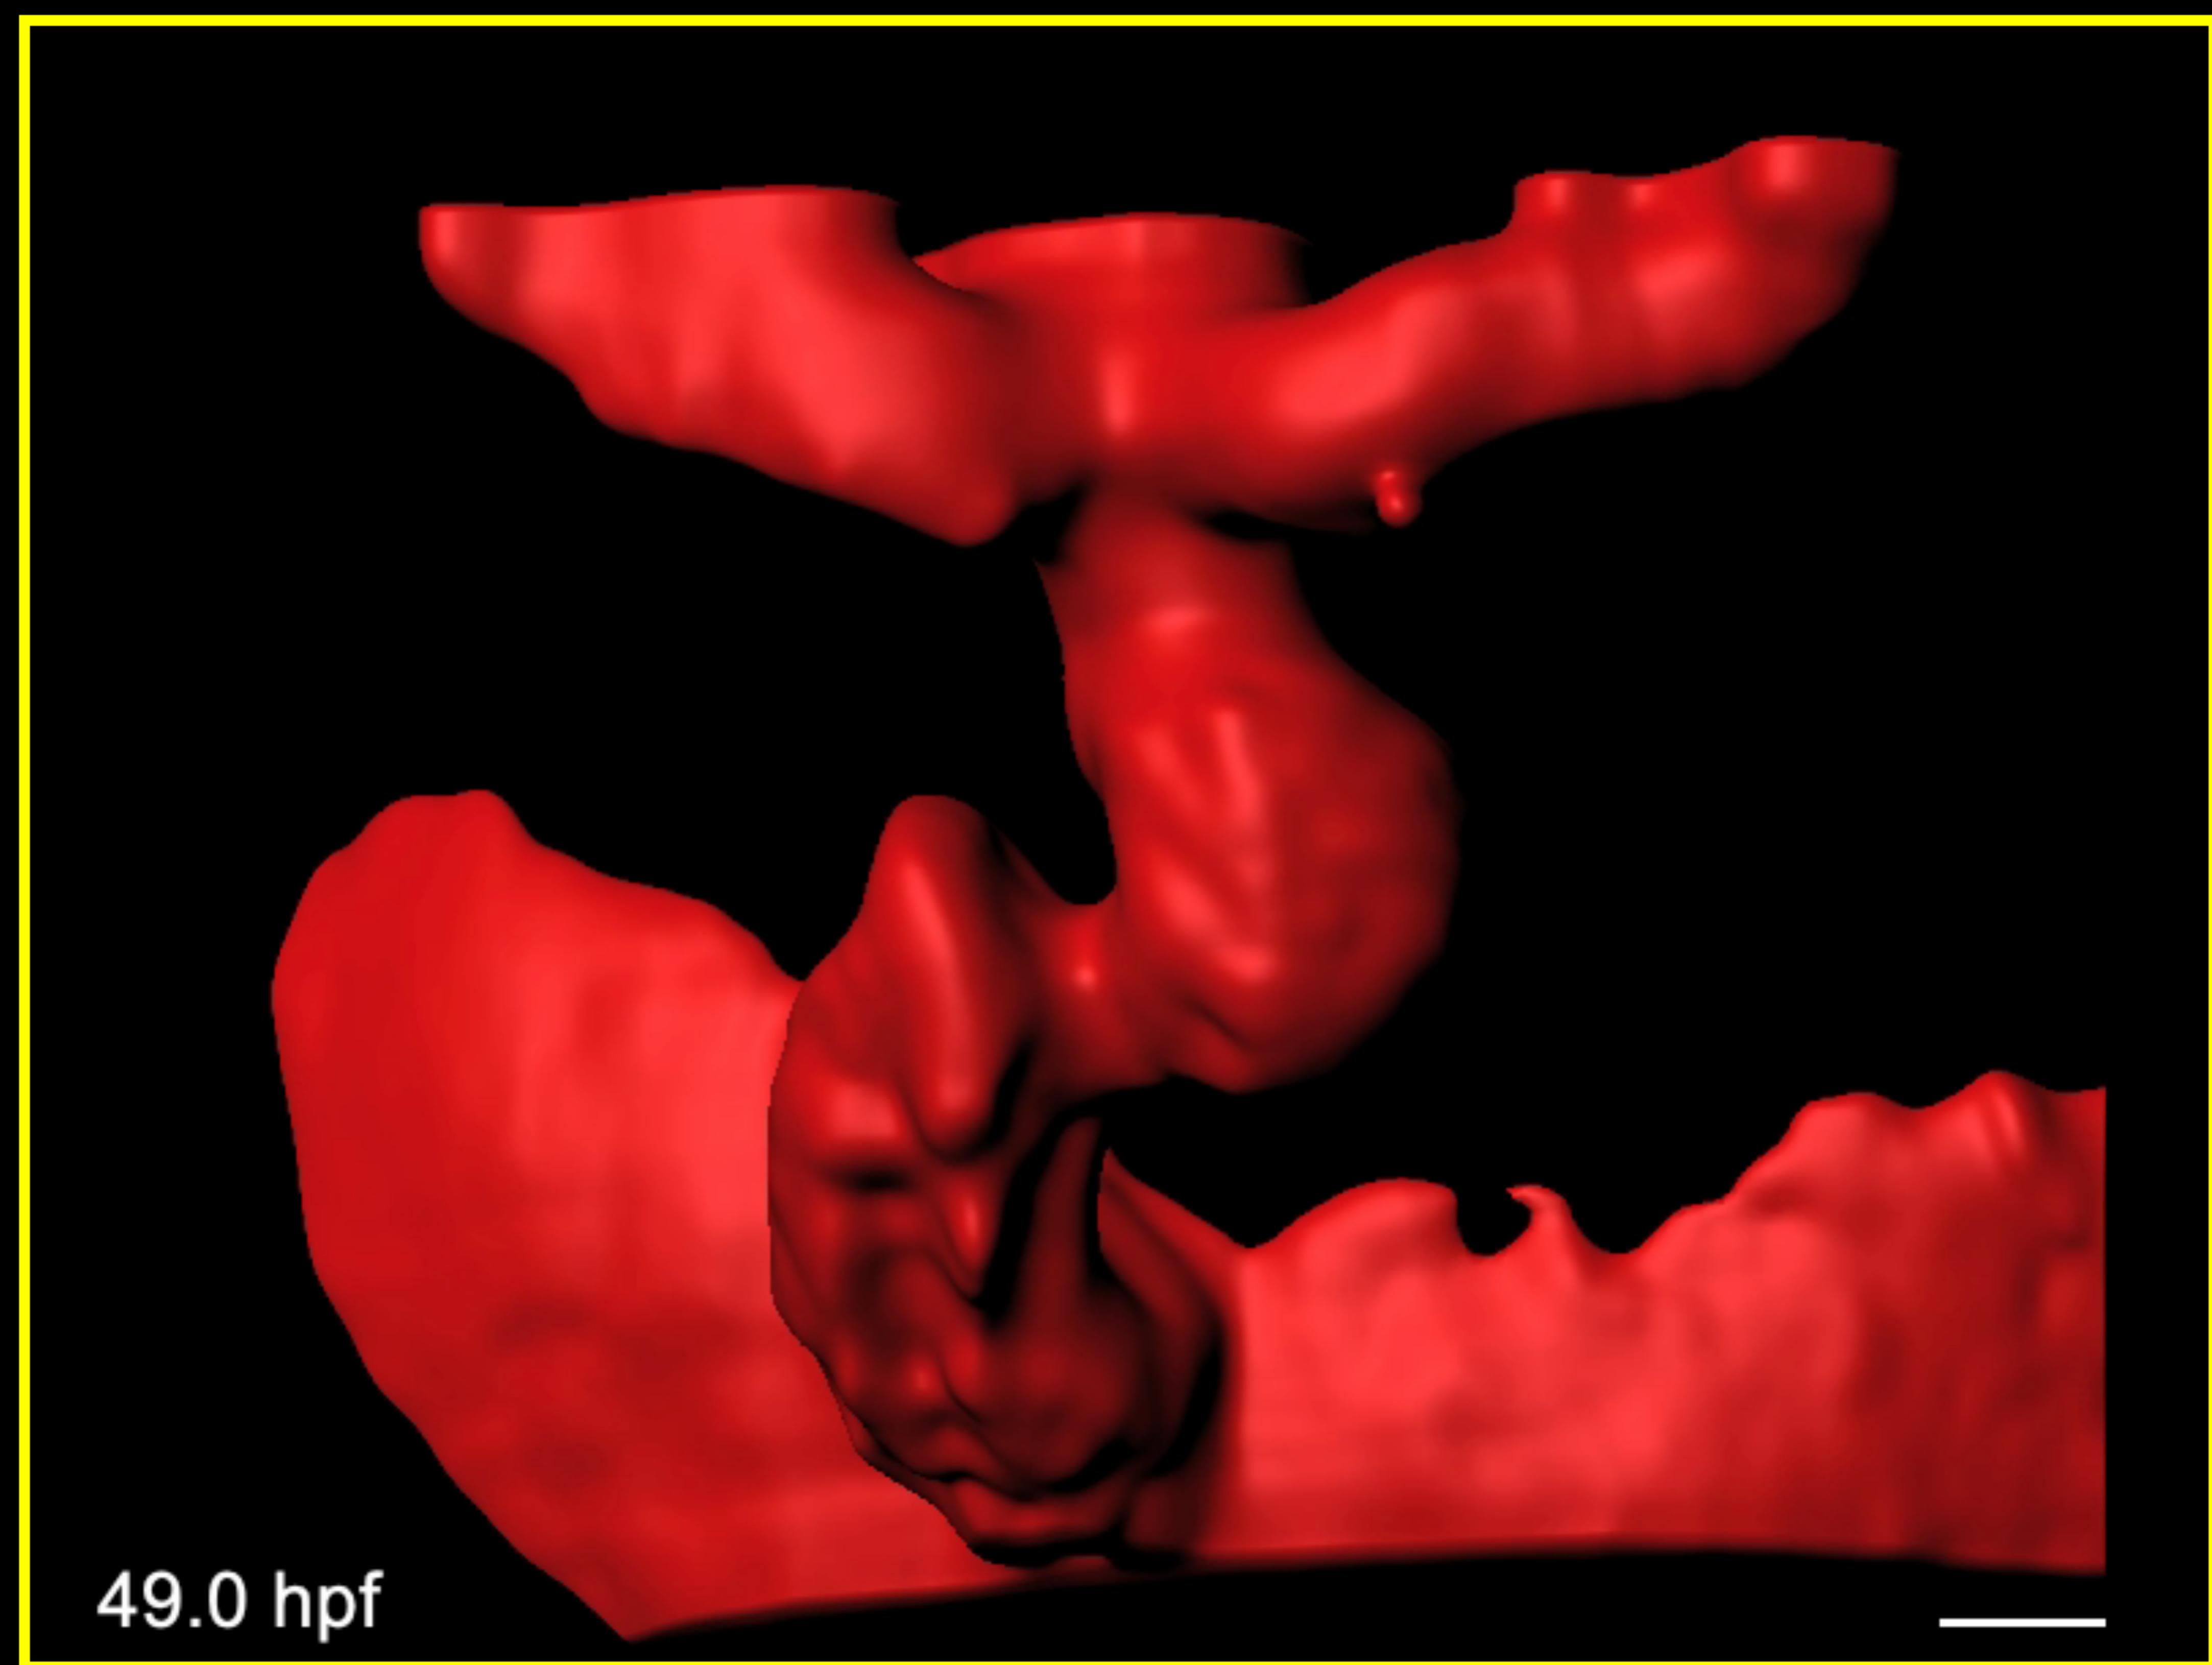

Zickus & Taylor Biomedical Optics Express (2018)

DEVELOPMENTAL BIOLOGY

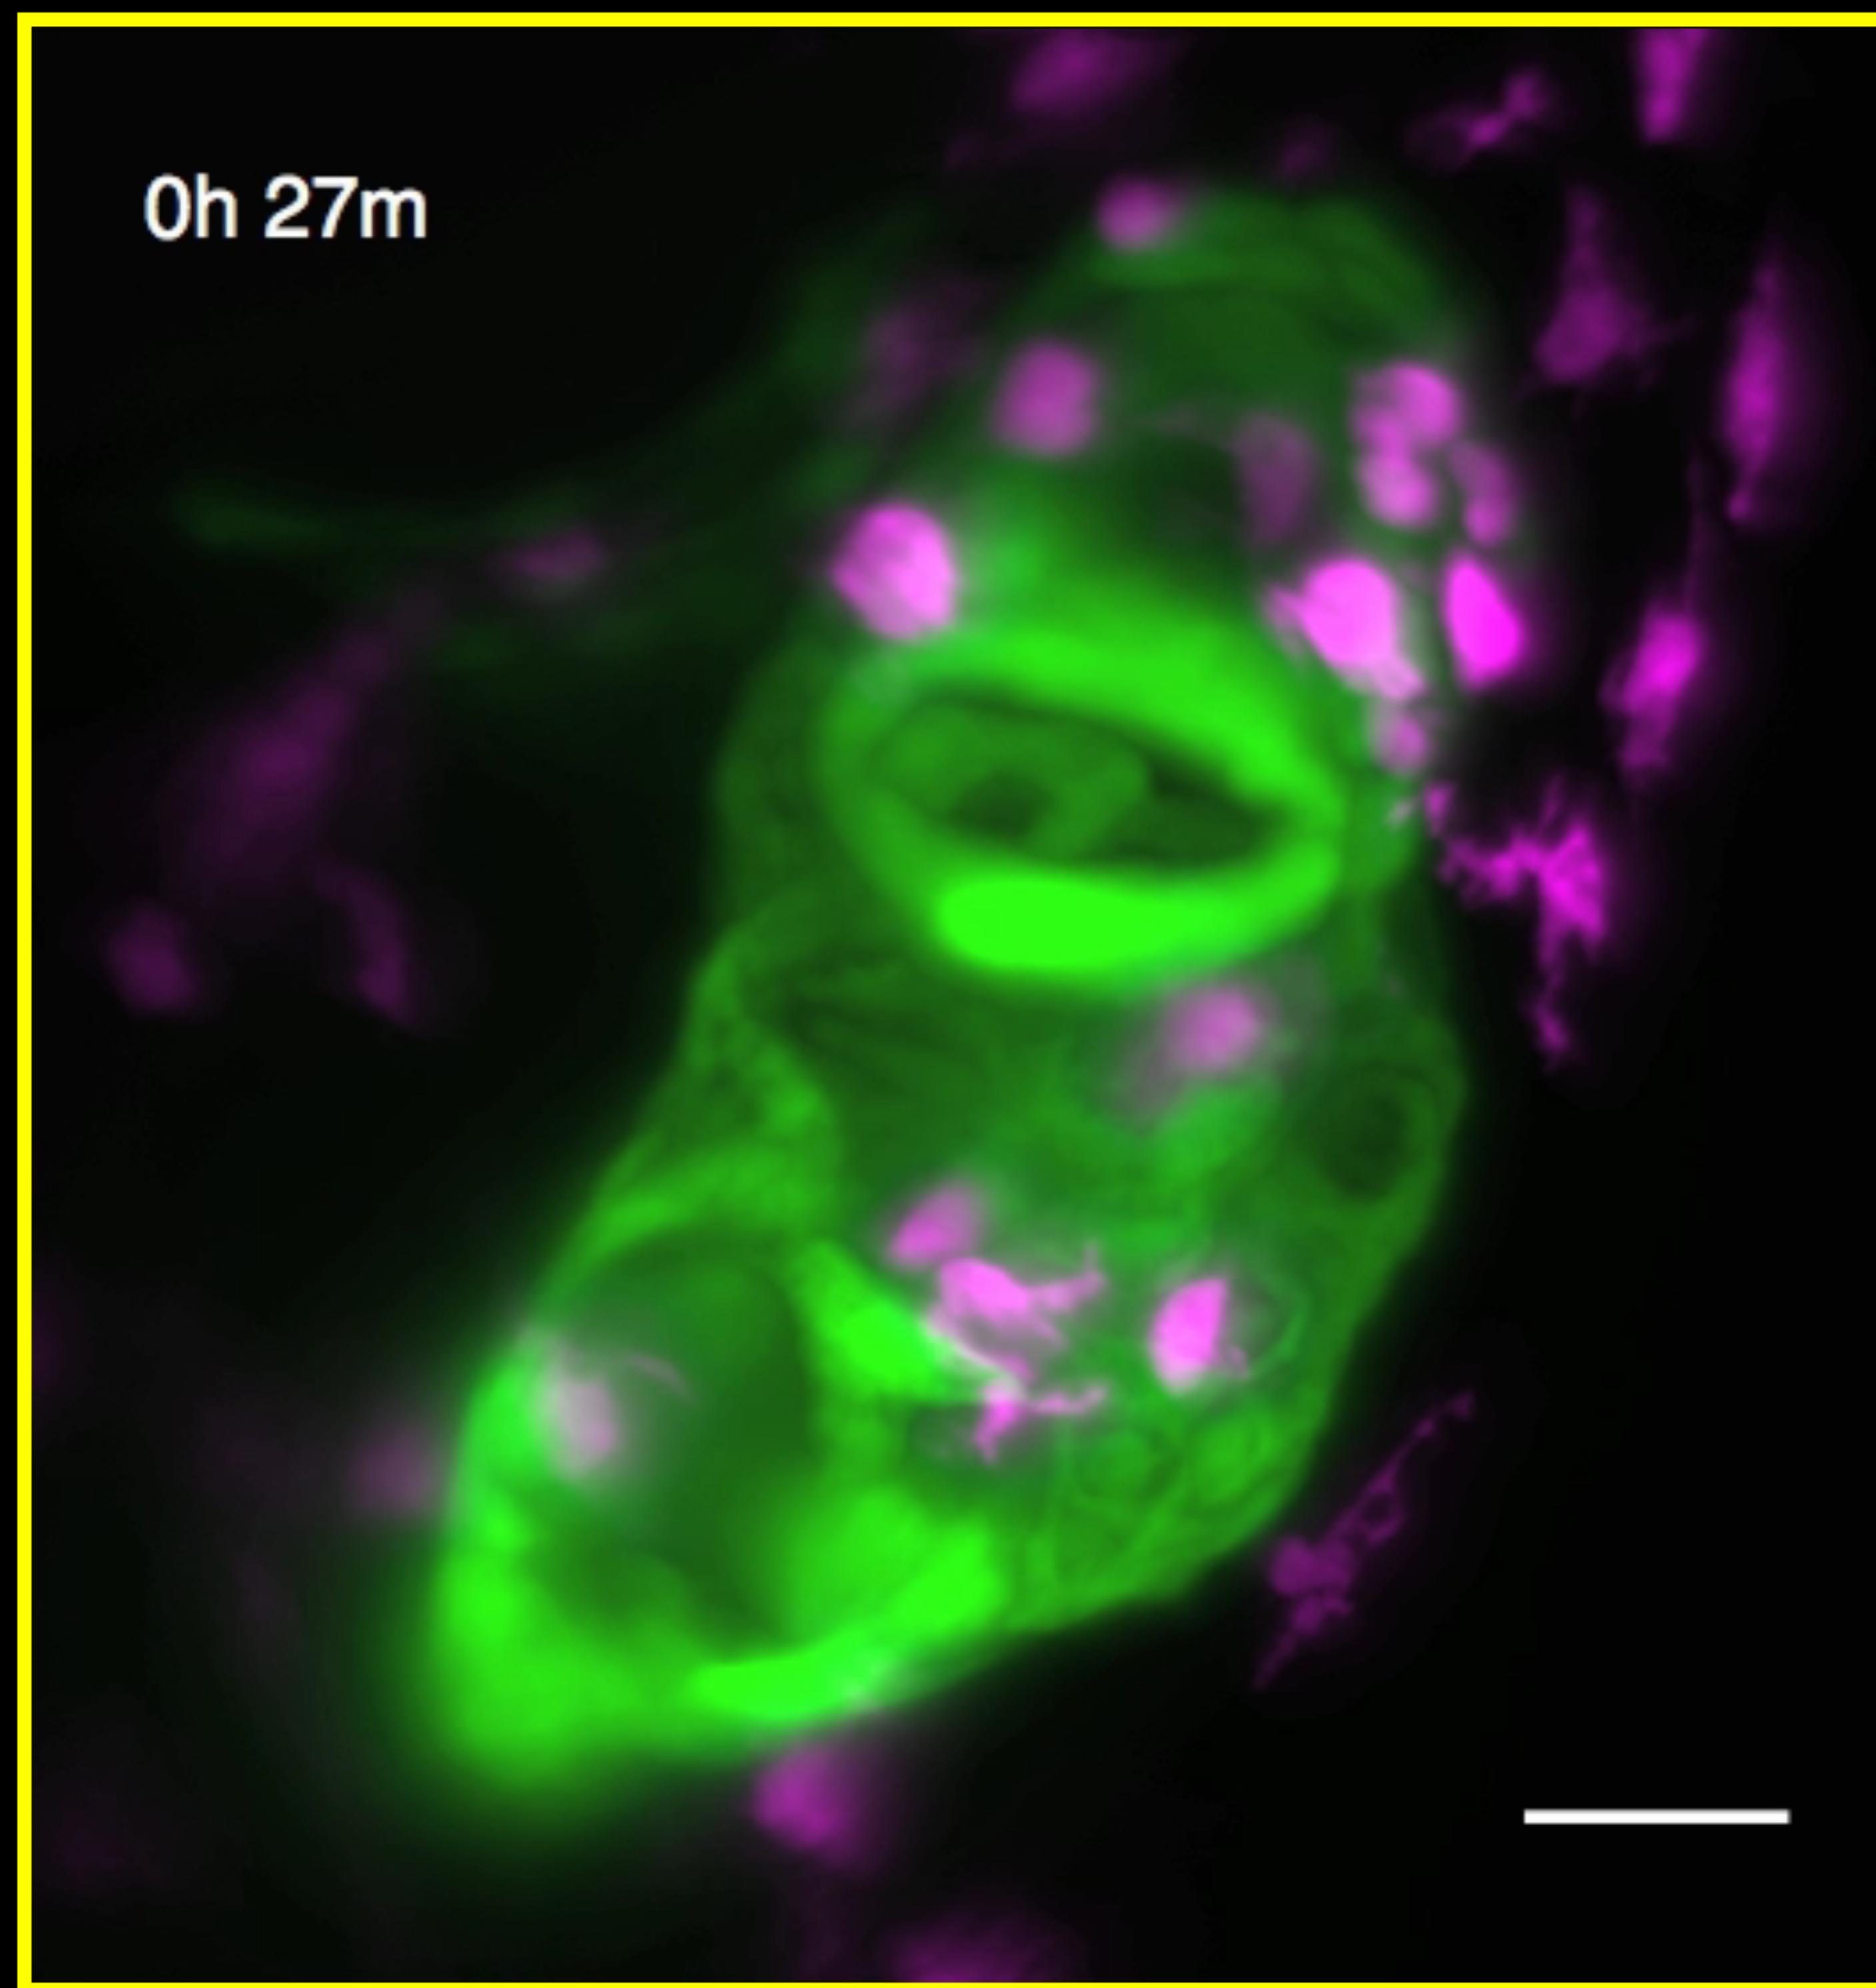

24h 3D timelapse
imaging of
trabeculation
in the beating heart

INJURY RESPONSE

0h 12m

0h 27m

FUTURE RESEARCH

SEEING GRAPHS

COMBINING GRAPH THEORY AND MICROSCOPY TO UNDERSTAND HOW VISION DEVELOPS

What?

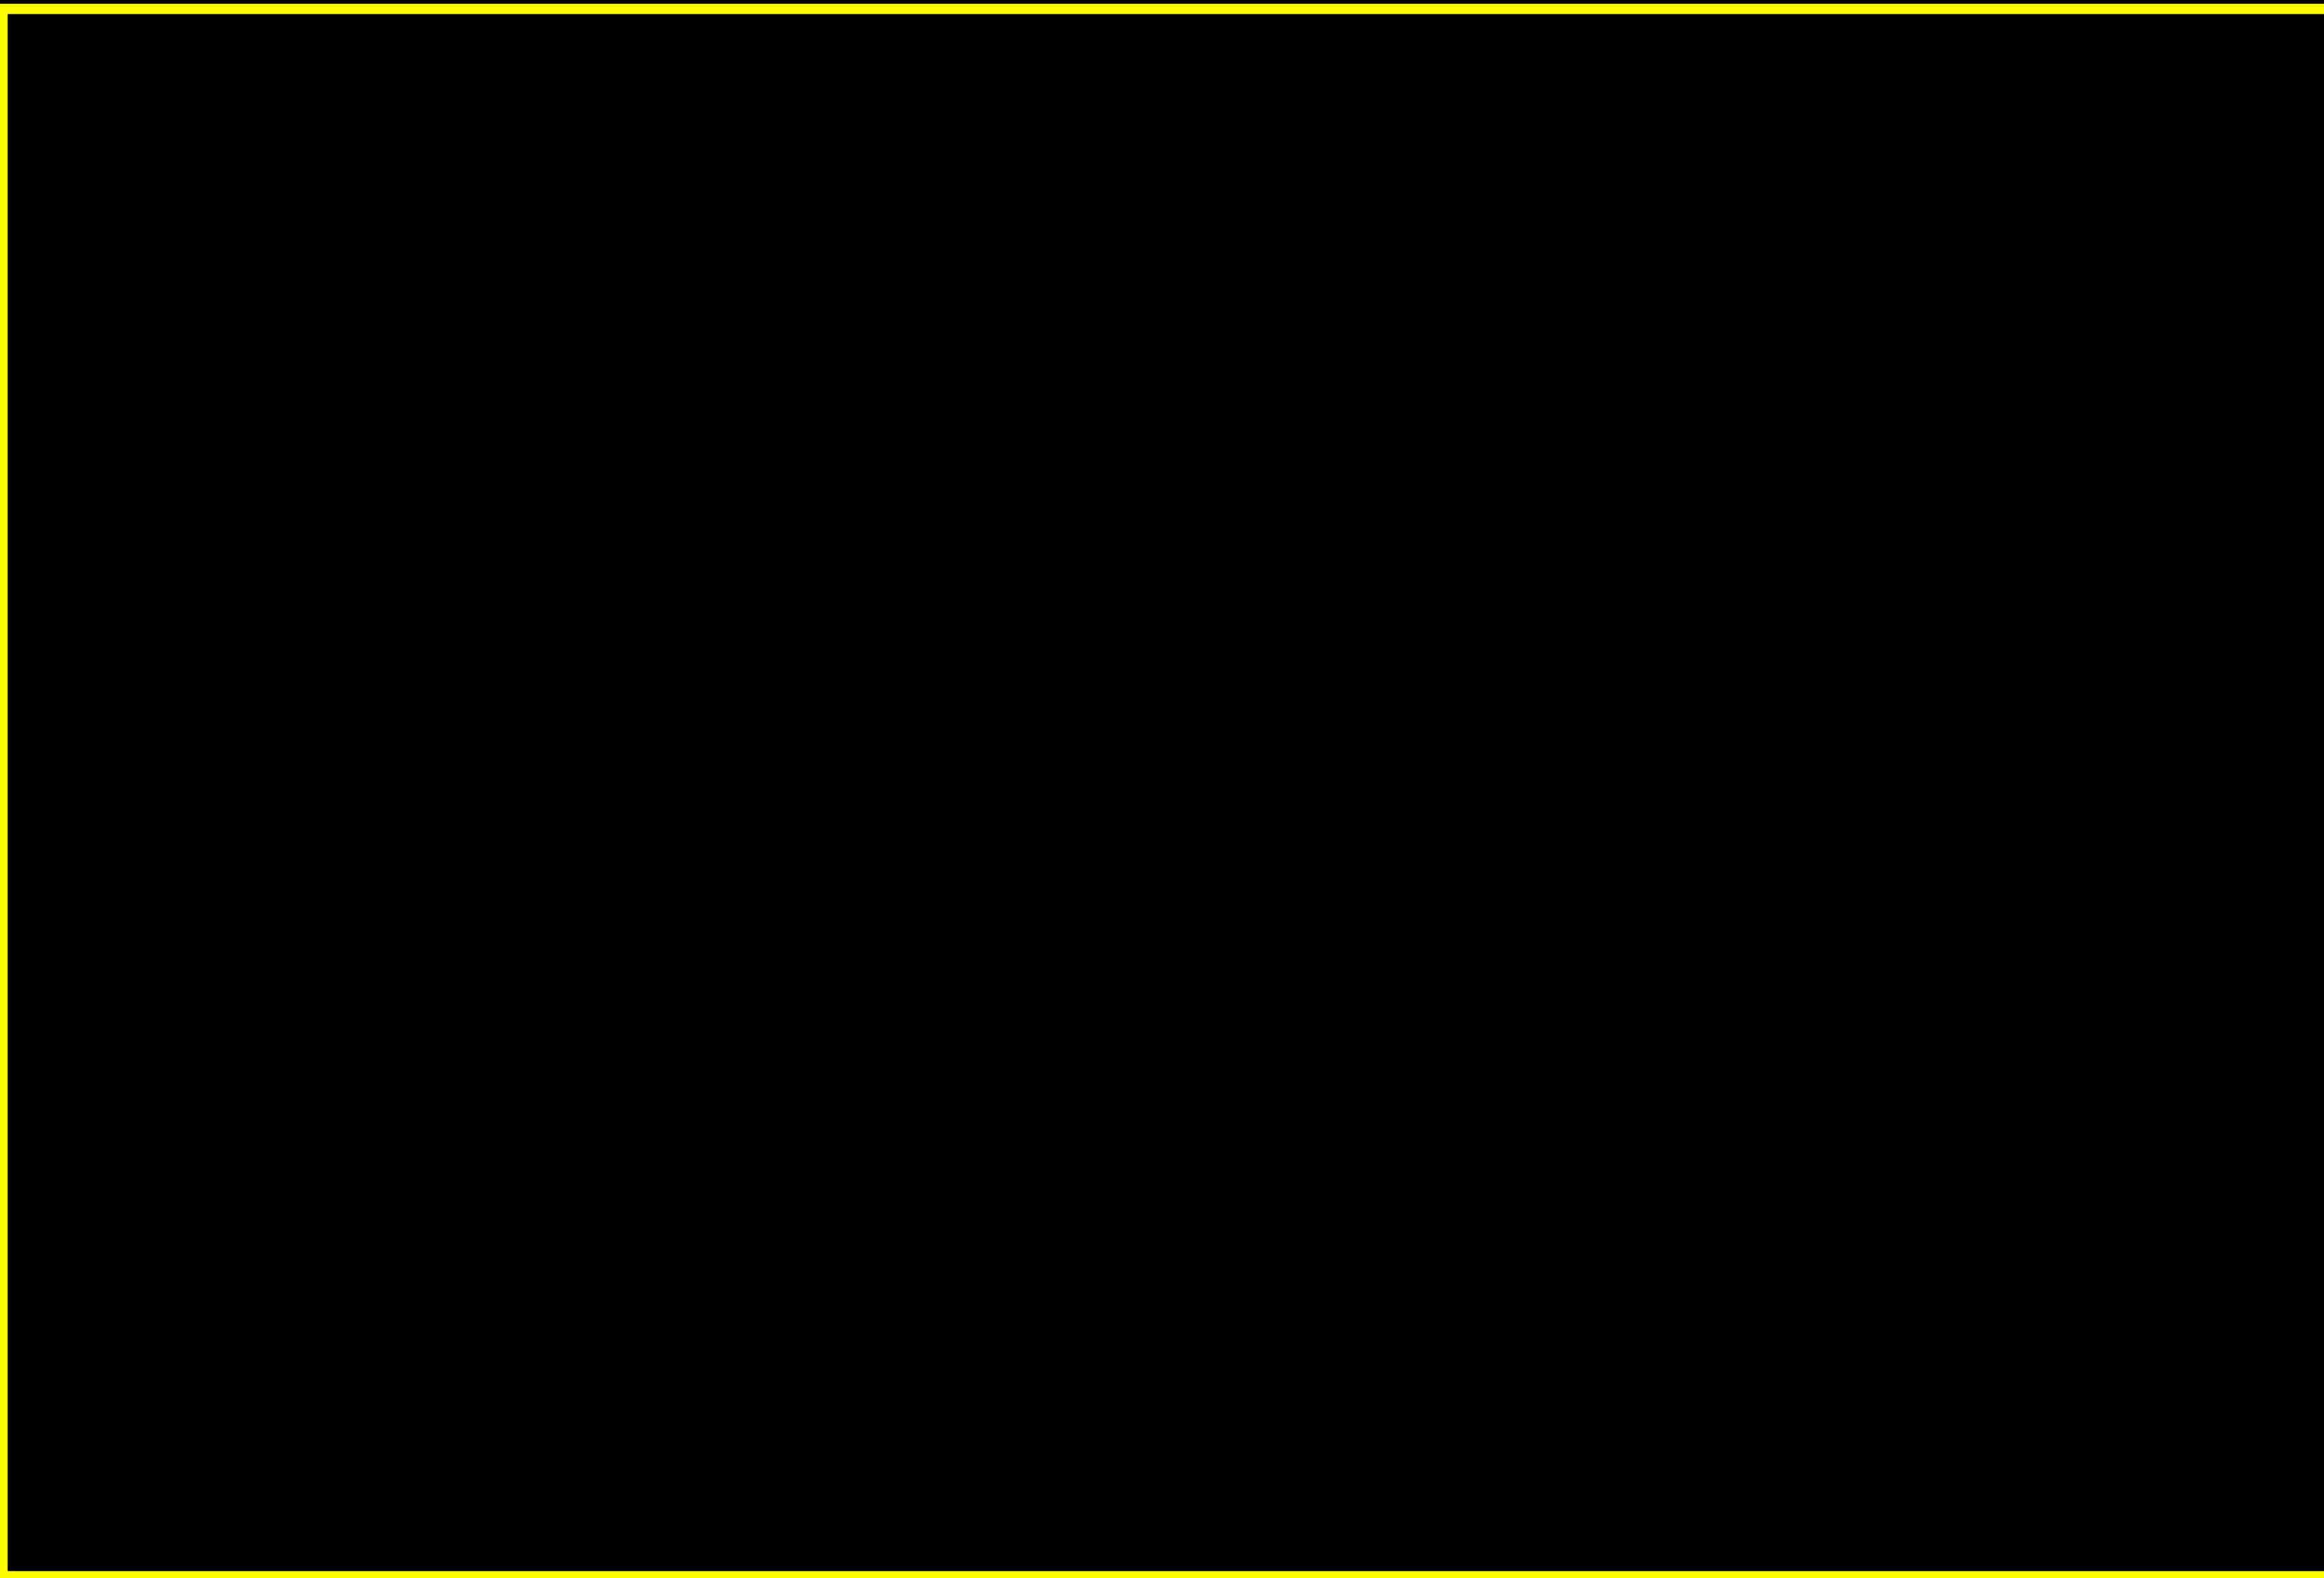

Quantify how spontaneous activity is able to 'teach' the retina to process stimuli at birth.

Why?

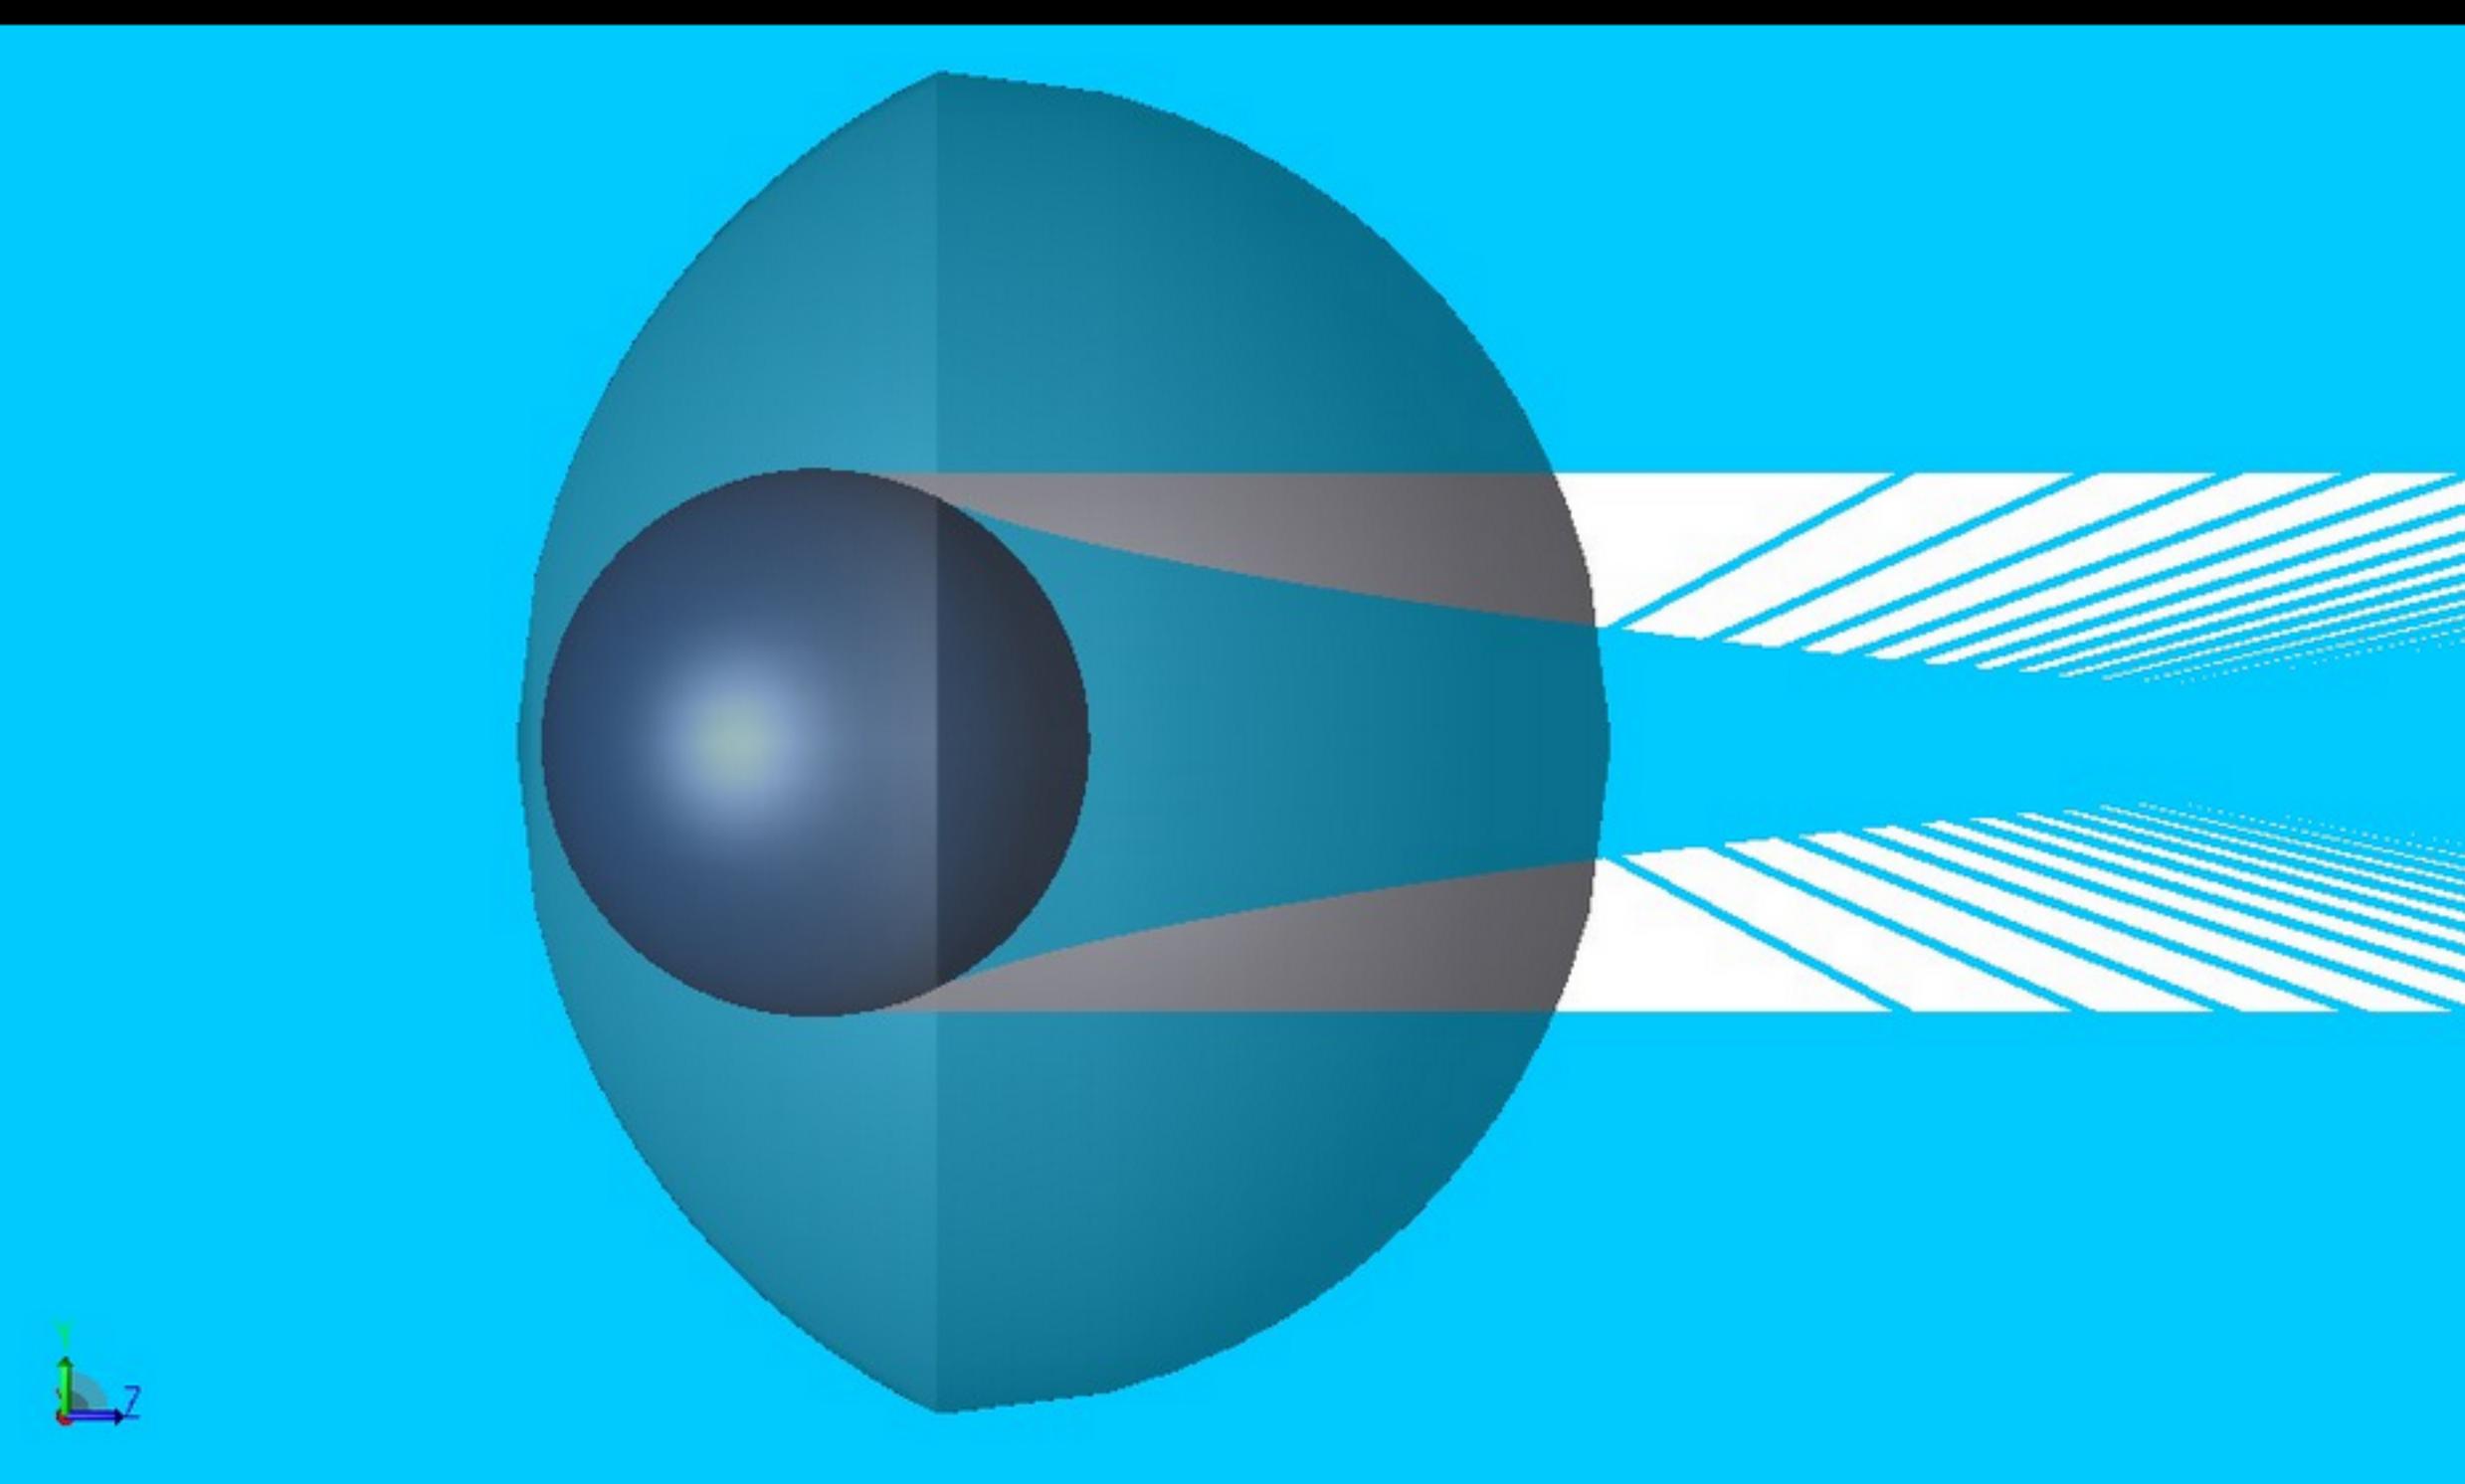

Further fundamental understanding of vision, the brain and biological computations.

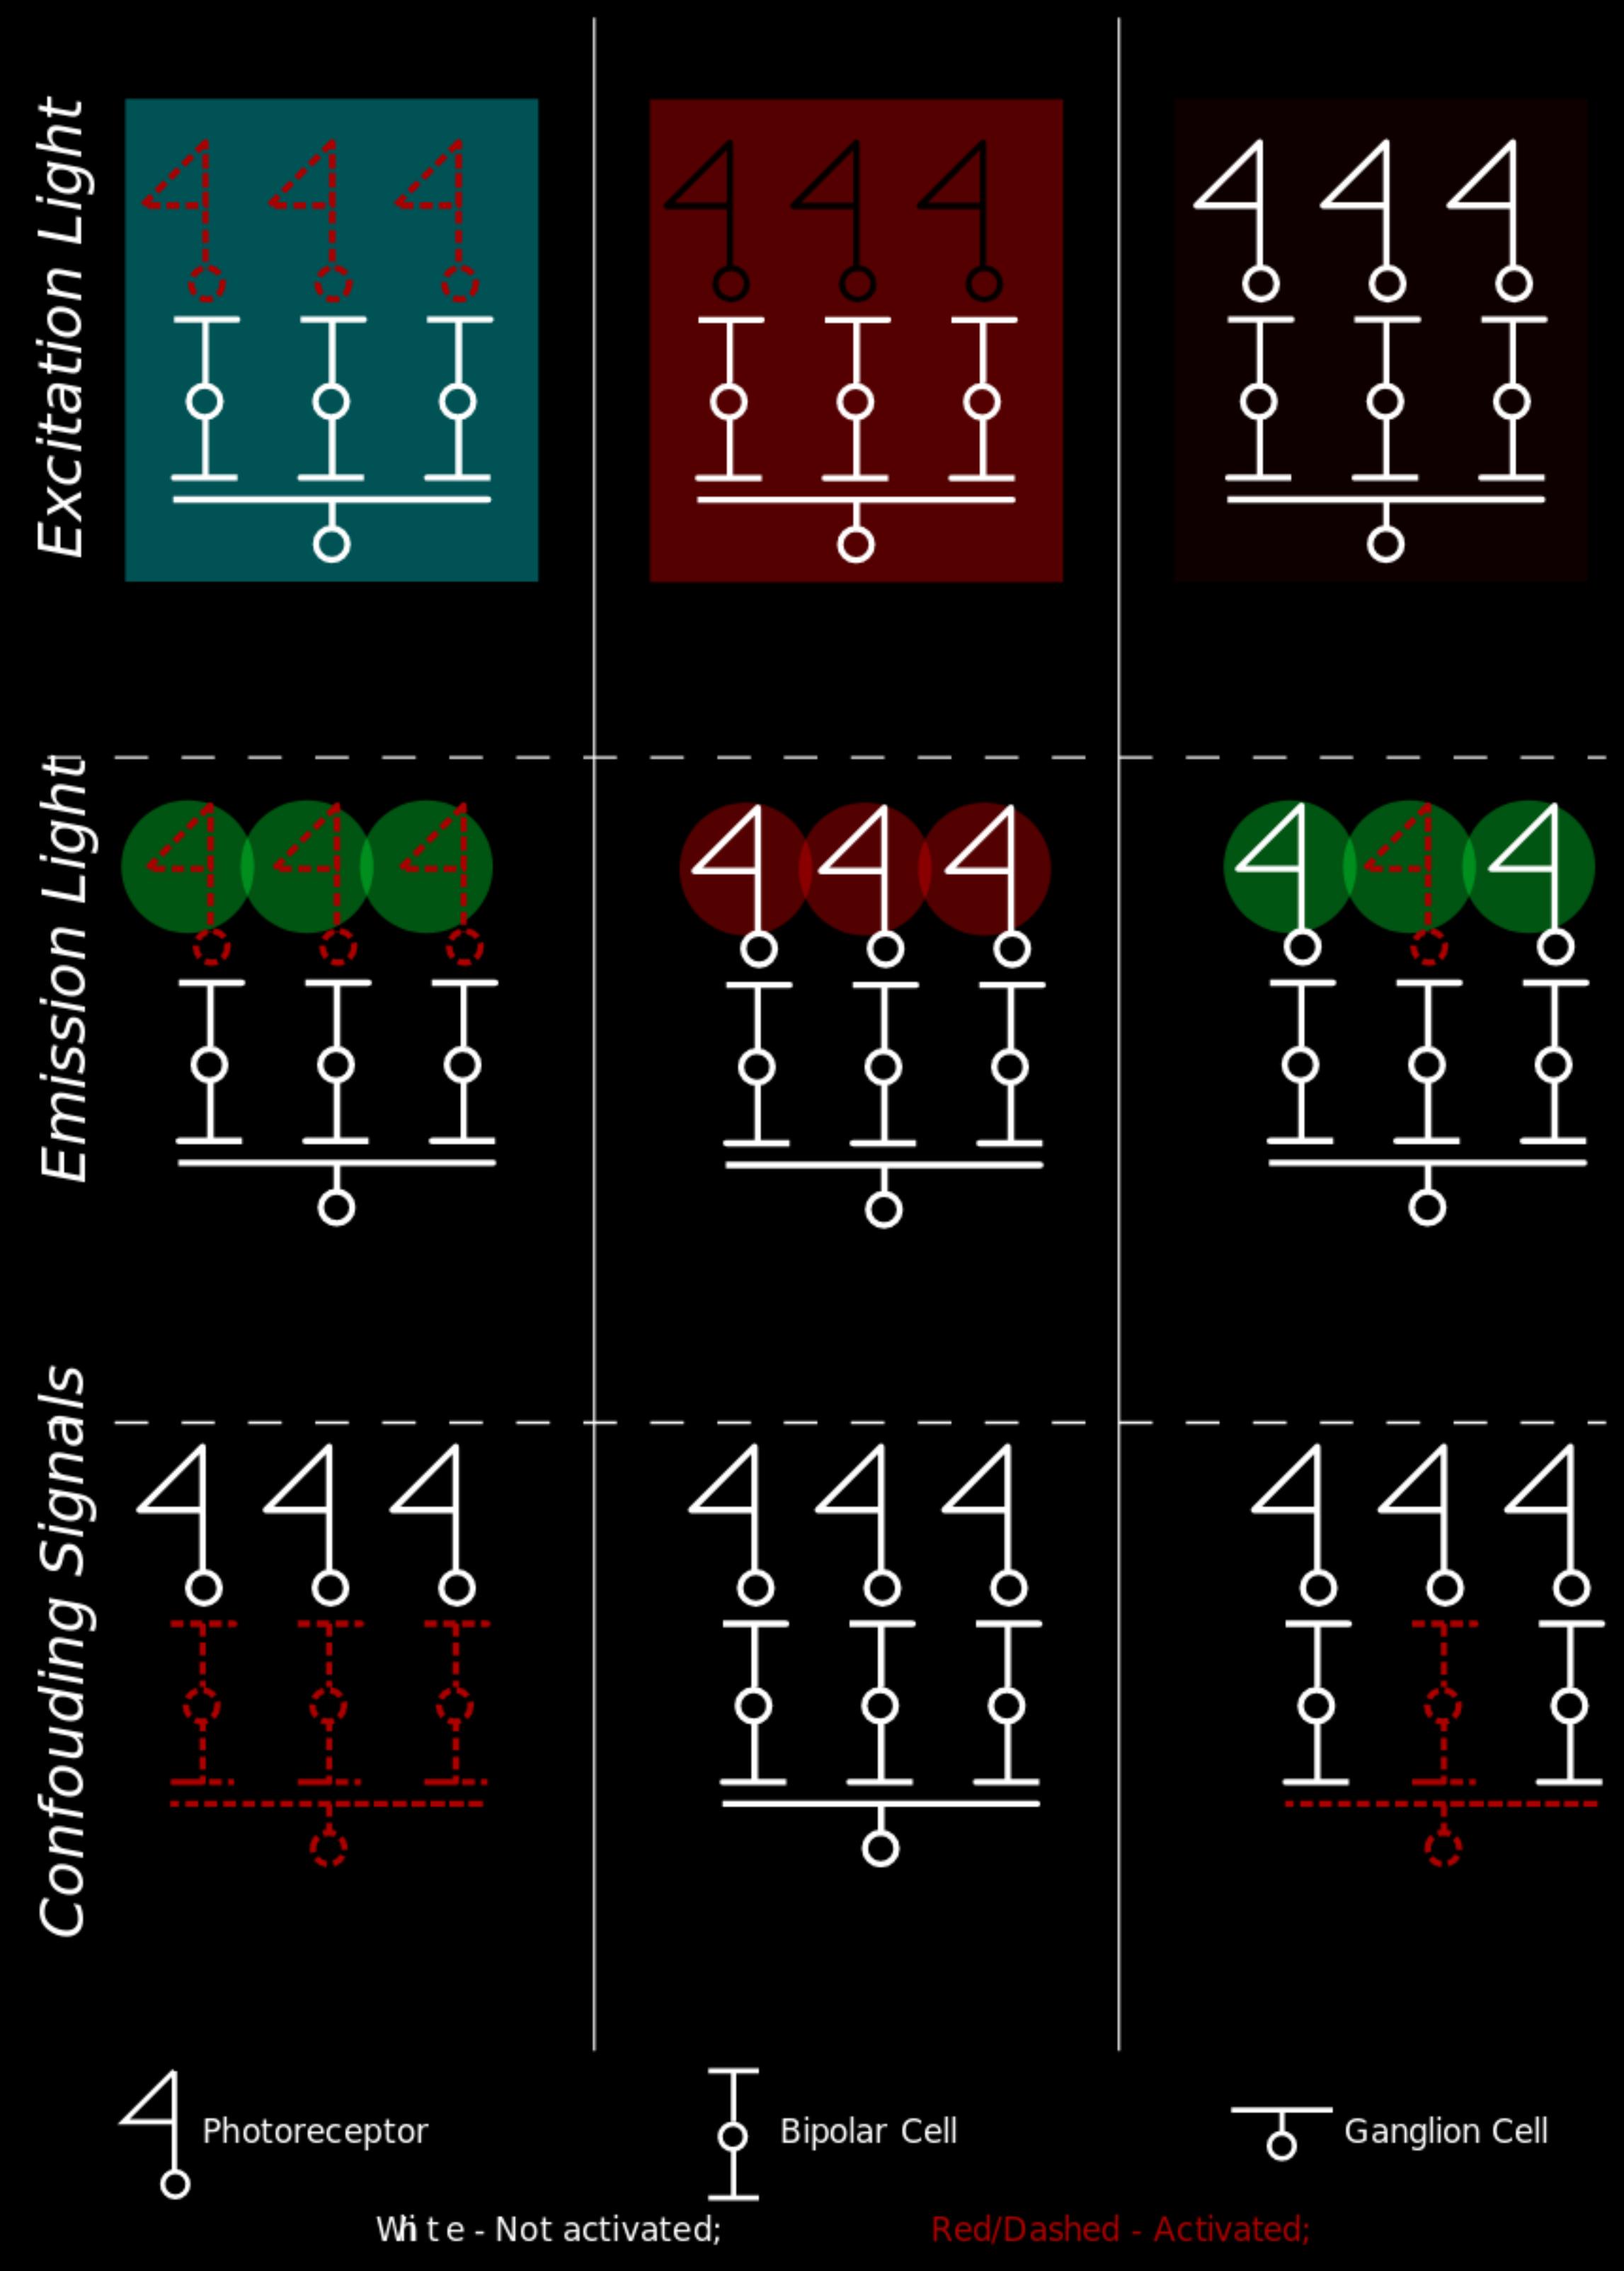

How?

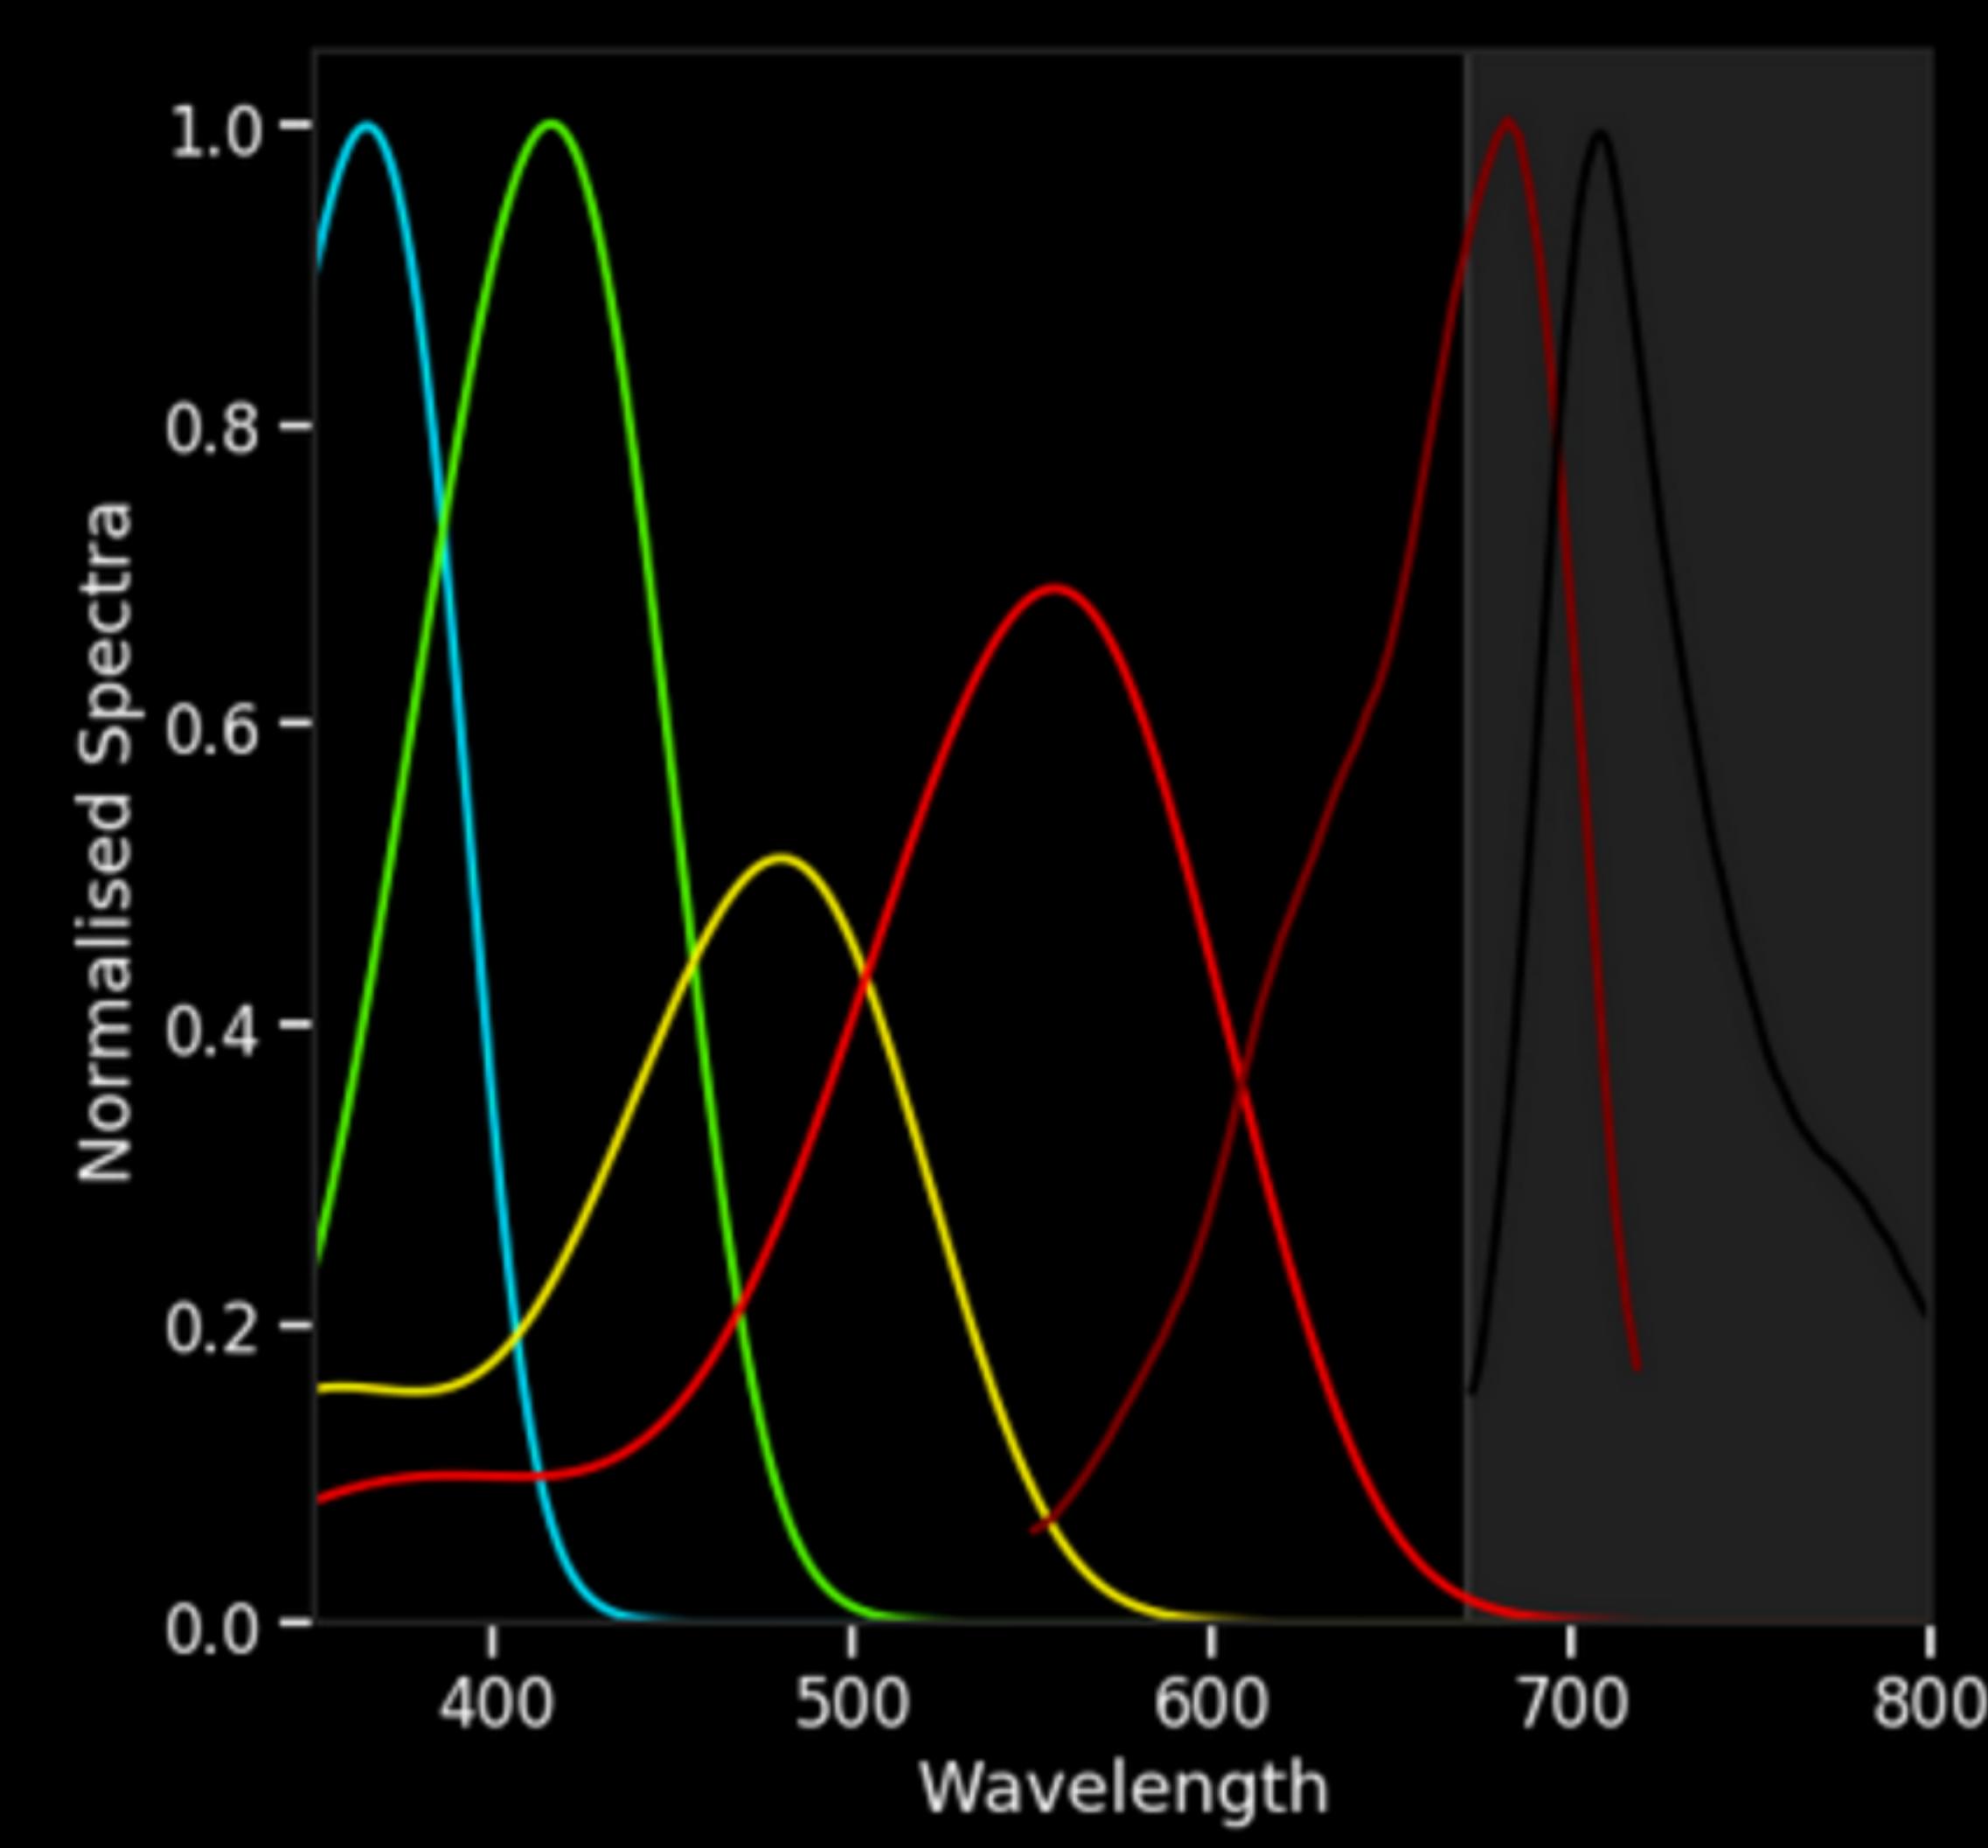

- 4D specialised *light sheet microscopy*,
- graph theory *analysis of extracted networks*
- and information theory models.

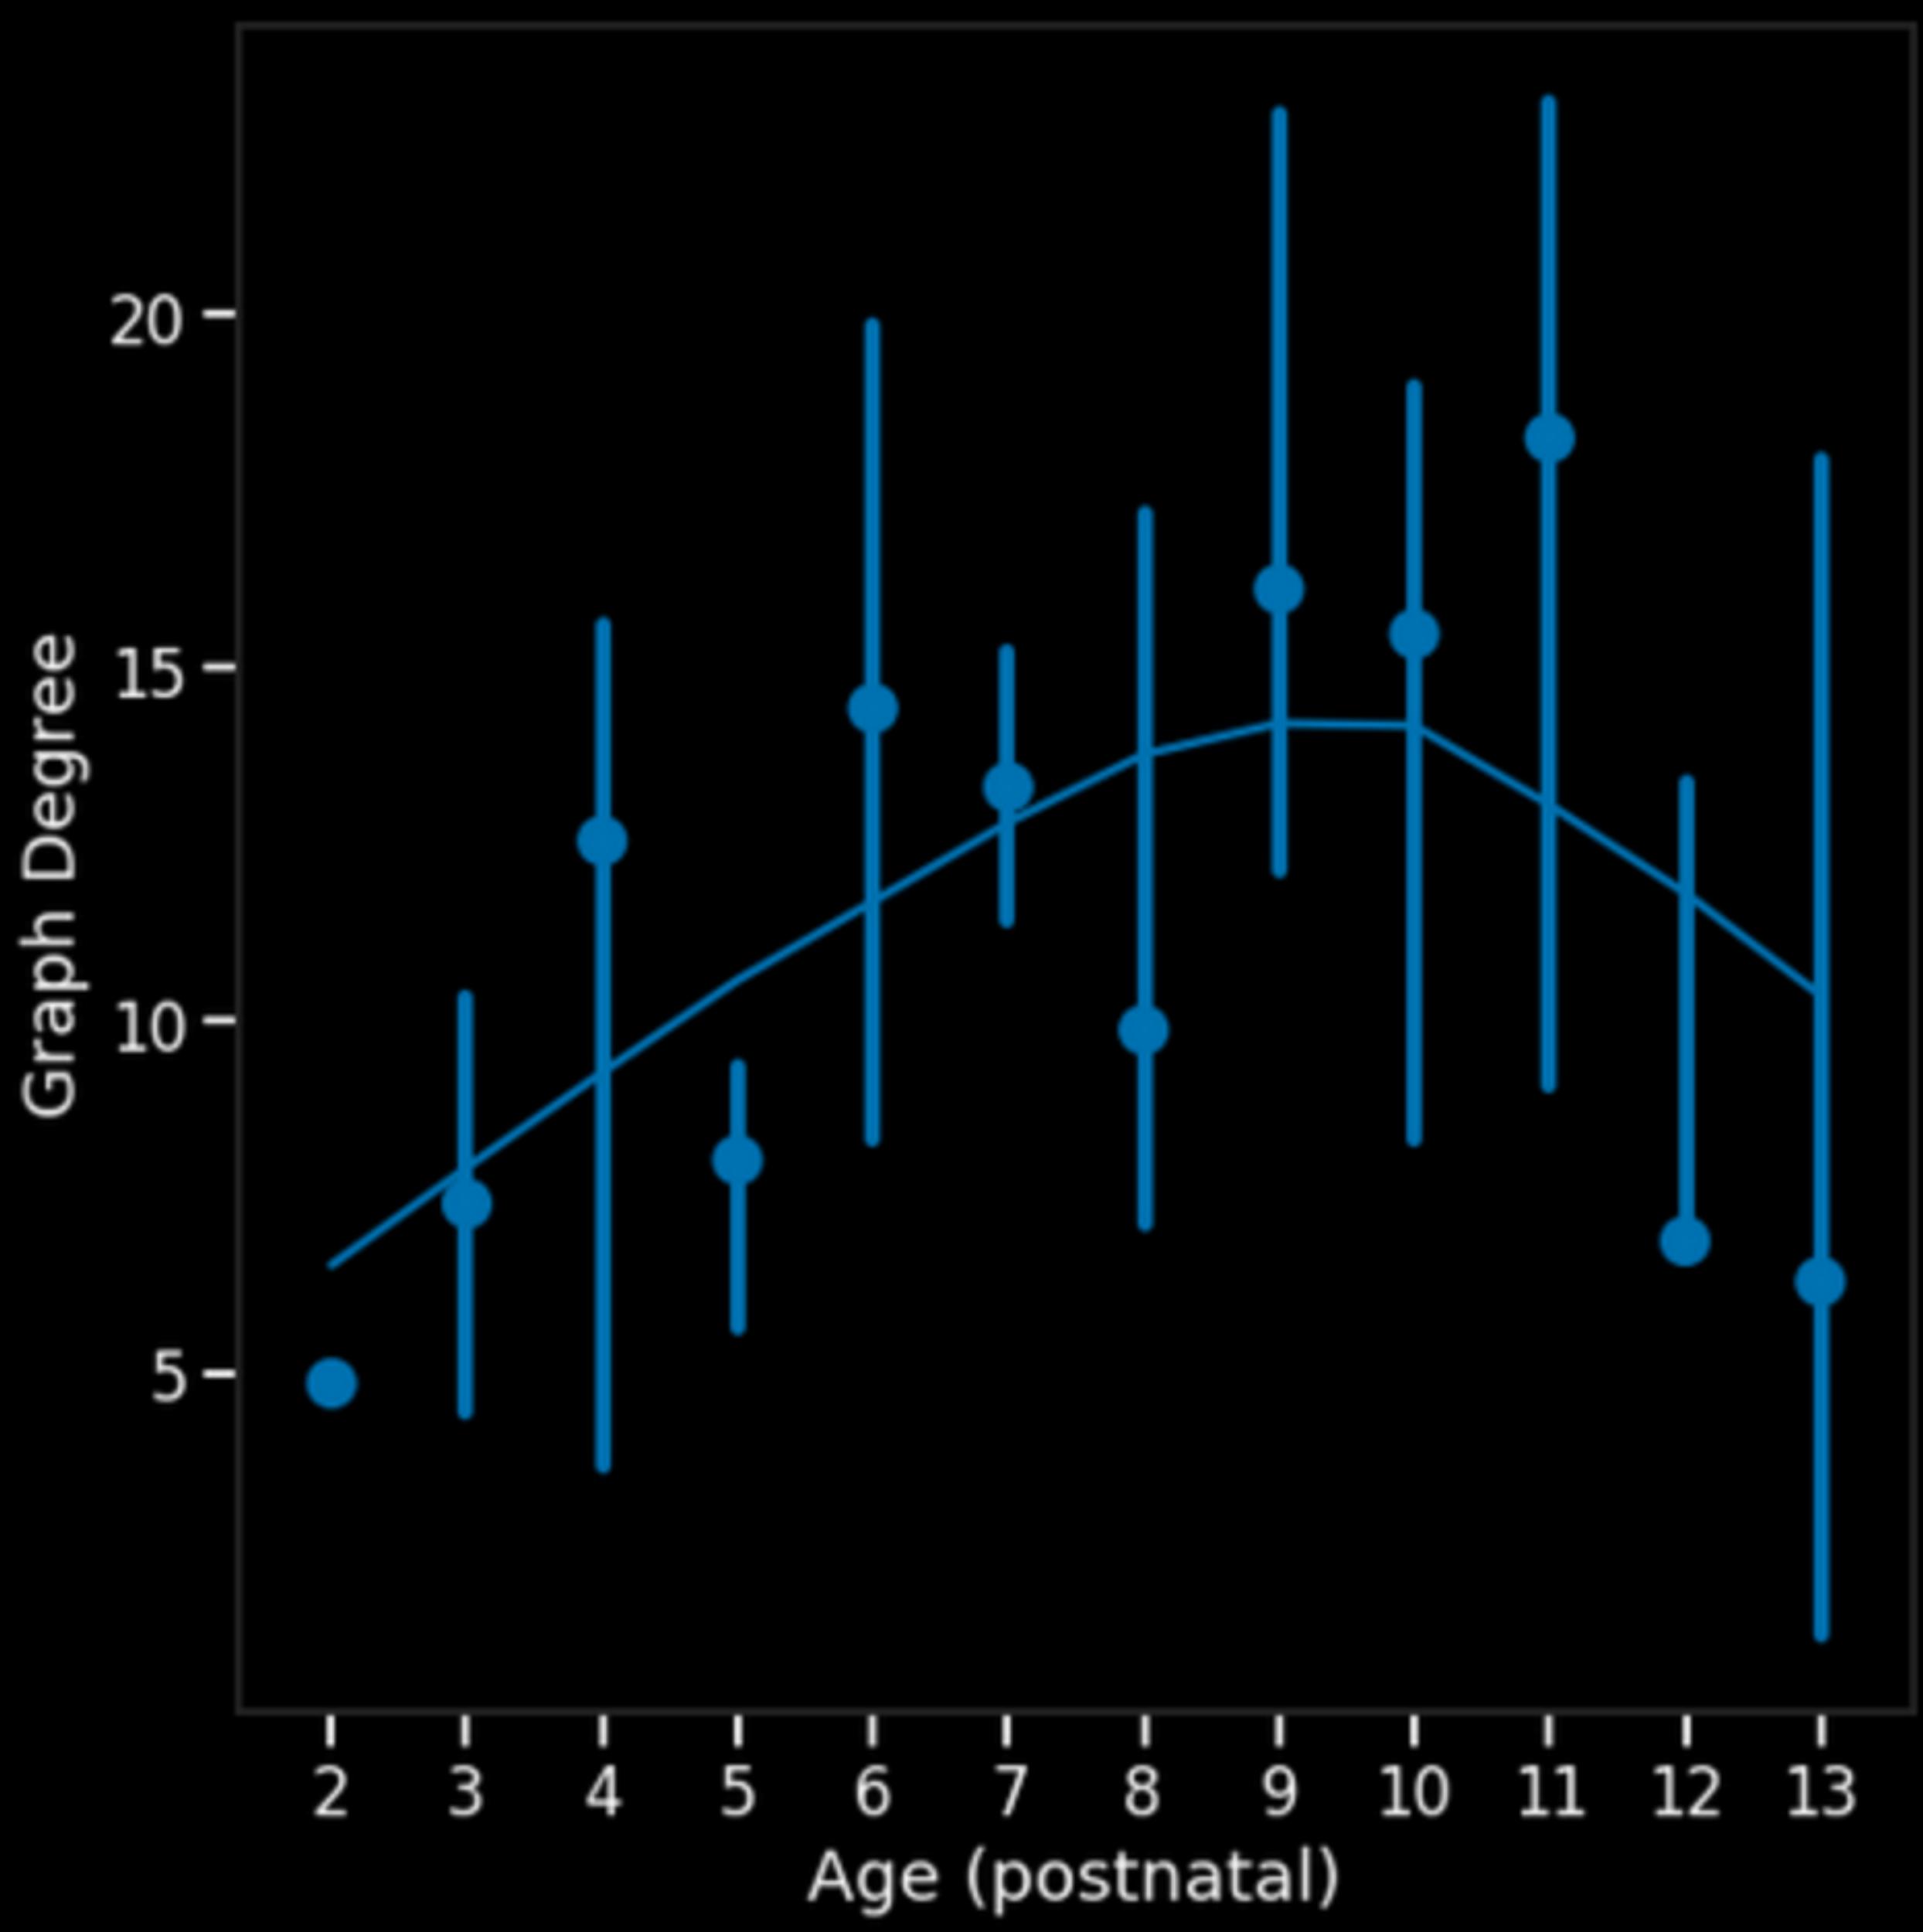

- 4D specialised *light sheet microscopy*,

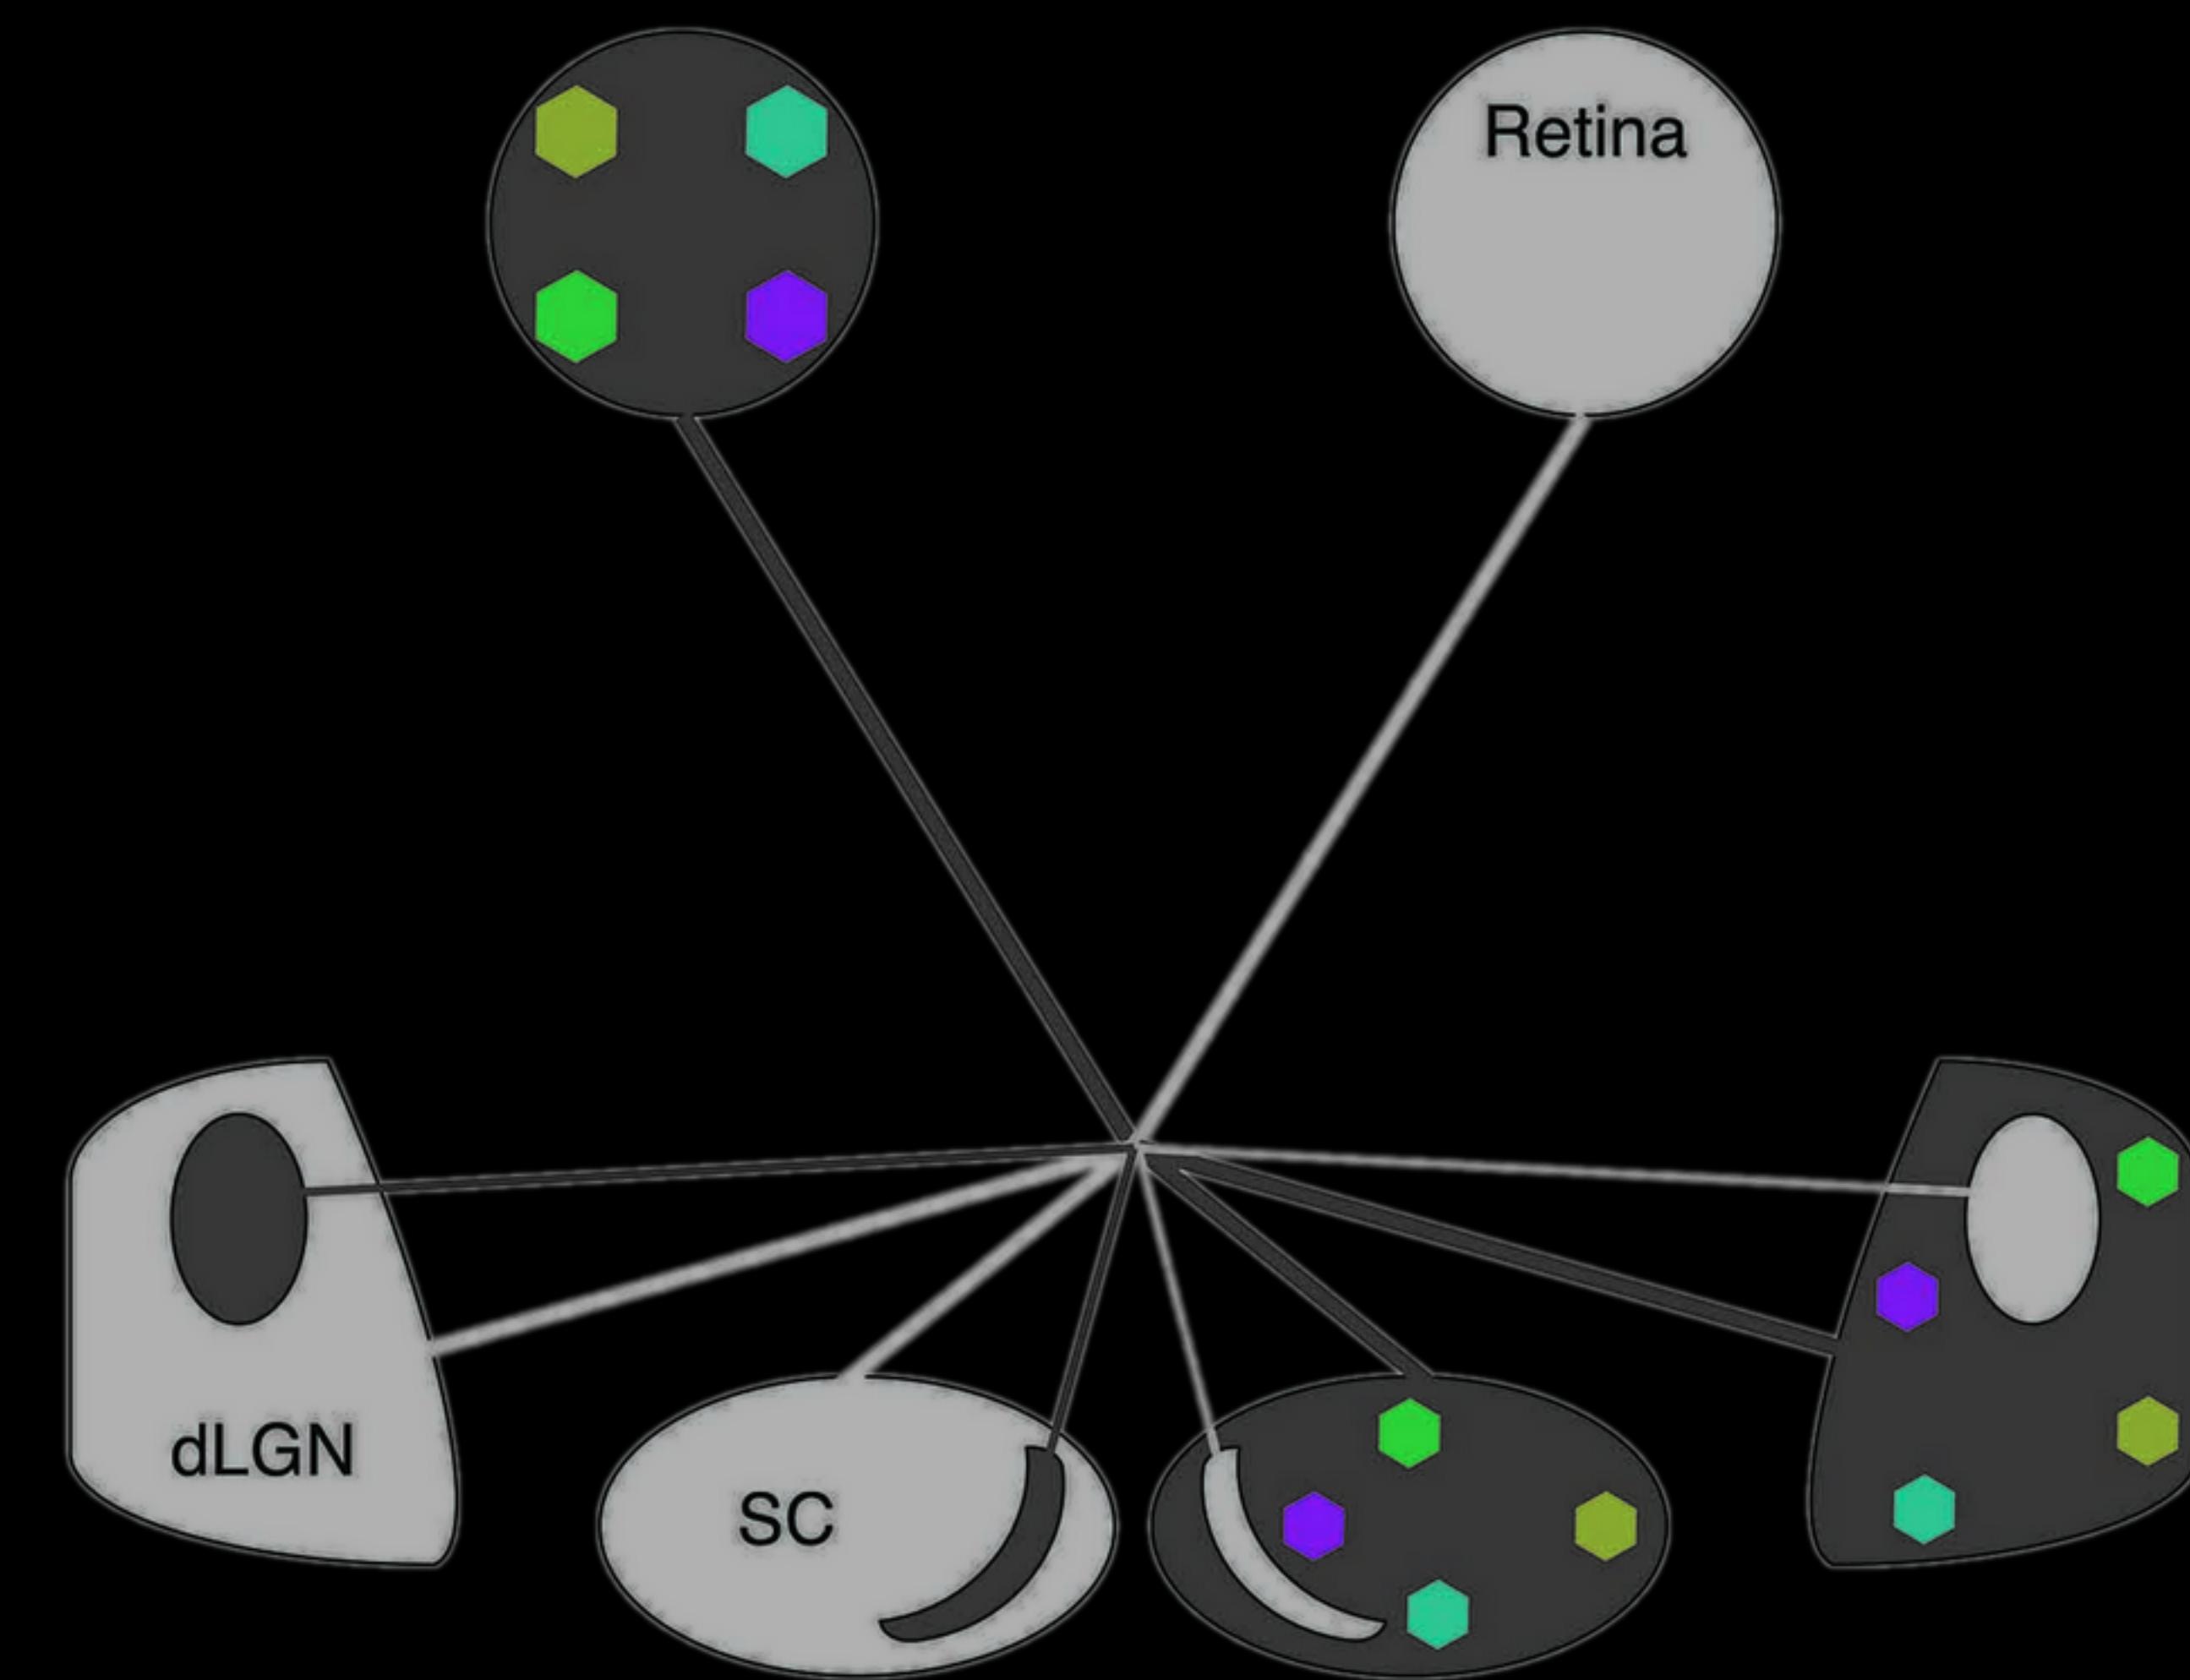

- Graph theory *analysis of extracted networks,*

- Information theory models,

THE TEN YEAR PLAN
