How can a library make a contribution to its academic institution?

User Need #1

Awareness of the latest publications

From: Sribindu Pisupati <srp4001@med.cornell.edu>
Date: Tuesday, January 29, 2019 at 12:11 PM
To: Terrie Wheeler <tew2004@med.cornell.edu>
Subject: Recent Publications?

Hi Terrie,

I hope you're well! My name is Bindu and I work under Dr. Brown as the Office of Research's Communications Project Manager. We're currently working on getting out a newsletter every few weeks for all of WCM...and one of our goals for that newsletter is to summarize the recent research publications by WCM faculty. Dr. Brown said you could be of help!

I was wondering if you (or any of your colleagues) would be able to send me a list of the January 2019 publications by WCM faculty—we'd like to put the title, name of faculty, and short link to the publication itself, if possible. Could you let me know if that's doable? Thank you so much.

Bindu

From: Kristen E. Bloom <kebloom@med.cornell.edu>
Sent: Wednesday, August 28, 2019 8:23 AM
Subject: Research paper highlights for "What's New In Medicine"

Please let me know of **up to three** research papers published in your division from July–August 2019, if you would like to include them in the next edition of "What's New In Medicine." We will need the following information:

- Name of Author(s)
- Title of Paper
- Journal
- Date
- PMID Number

Please send me your submissions by **Friday, September 6 at 5 pm.**

Best regards,
Kristen

Kate Carbonell 
Publication Report
To: Paul J Albert

March 11, 2019 at 11:12 AM

KC

 Siri found new contact info in this email: Kate Carbonell kac2051@med.cornell.edu [add to Contacts...](#) 

Hi Paul,

I hope this email finds you well. I wondered if I may be able to get a report on publications for 2015 - current. The previous reports we have received were organized by:

- a. By author: CWID, surname, givenName, authorRank[first/last], program
- b. By article: publicationType, authors, articleTitle, journal, doi, pages, volumes, issue, coverDate, pmid, HighImpactJournal, Program1(#), Program2(#), Program3(#), Program4(#)

Given the reporting period is over a few years, it would be helpful to also have the report organized by year.

I have an additional request, which I'm not sure will be feasible, however, would it possible to indicate whether each publication is inter- or intra- programmatic? An inter-publication would be defined as a publication where there are two or more authors from different Research Programs and an intra-publication would be defined as a publication where there are two or more authors from the same Research Program. In addition, if a publication meets both inter- and intra- criteria, it should be counted as both. I'm happy to explain this over the phone, if it is not clear.

Also attached is the membership list, including program affiliation that we would like to use to run the report.

User Need #3

Lists of publications written by individuals who are loosely affiliated, e.g., residents in a department, alumni, members of our CTSC

Paul J Albert

PA

Publications by Pediatrics residents

[Details](#)

To: Erika Abramson, Cc: Terrie Rose Wheeler, Michael Eliot Bales

Hi Erika,

It looks like our source database has 63 publications on record by Pediatrics residents, past or present. And we have 625 Pediatrics residents although I'm not certain we successfully excluded west campus / Columbia users. (This is harder to do for inactive residents.)

Attachment #1 are the publications. Attachment #2 are the residents themselves.

There are a lot of different directions we could go, so we'd be interested in your feedback.

thanks,
Paul

User Need #4

Lists of publications written by a unit for a grant renewal

Anna Smyth

Inbox - Exchange Yesterday at 3:30 PM

AS

RE: I need last three years publications of Dr. Choi labs needed for three years renewal ORGAN INJURY IAC... [Details](#)

To: Shivraj Tyagi, Cc: Michelle LoPiccolo, Paul J. Albert

Hi Shiva,

Michelle and I can check prior progress reports to find publications assigned to the grant but we would need to know exactly which grant/project you need the information for.

Perhaps Paul Albert from library copied here may better assist with this request as his team is working on creating more comprehensive publications list per PI.

Also, Pub Med is a good source to start.

Anna

Fwd: [CARDIOCLINICALFACULTY] Publication from FY18 (July 1, 2017 – June 30, 2018)

To: Paul Albert

Hi Paul,

Periodically, I (and other faculty) receive emails like the following. Seems like Dr. Lerman should know that there is now a way to get this information automatically ... right?

Would you mind sending me a brief snippet that I can use to send to Julie Rodriguez on how they can do this automatically going forward, as long as they have a list of faculty?

Thanks.

-David

Subject: [CARDIOCLINICALFACULTY] Publication from FY18 (July 1, 2017 – June 30, 2018)

Date: January 16, 2019 at 3:05:56 PM EST

To: <CARDIOCLINICALFACULTY@MED.CORNELL.EDU>

Reply-To: "Julie A. Rodriguez" <jap2024@MED.CORNELL.EDU>

Dear Faculty,

On behalf of Dr. Lerman, please send directly to me your publications from **FY18 (July 1, 2017 – June 30, 2018)** by Friday, January 25th, 2019. Thank you in advance.

Best Regards,

Julie Rodriguez

**ReCiter is an open source
enterprise publications
management system.**

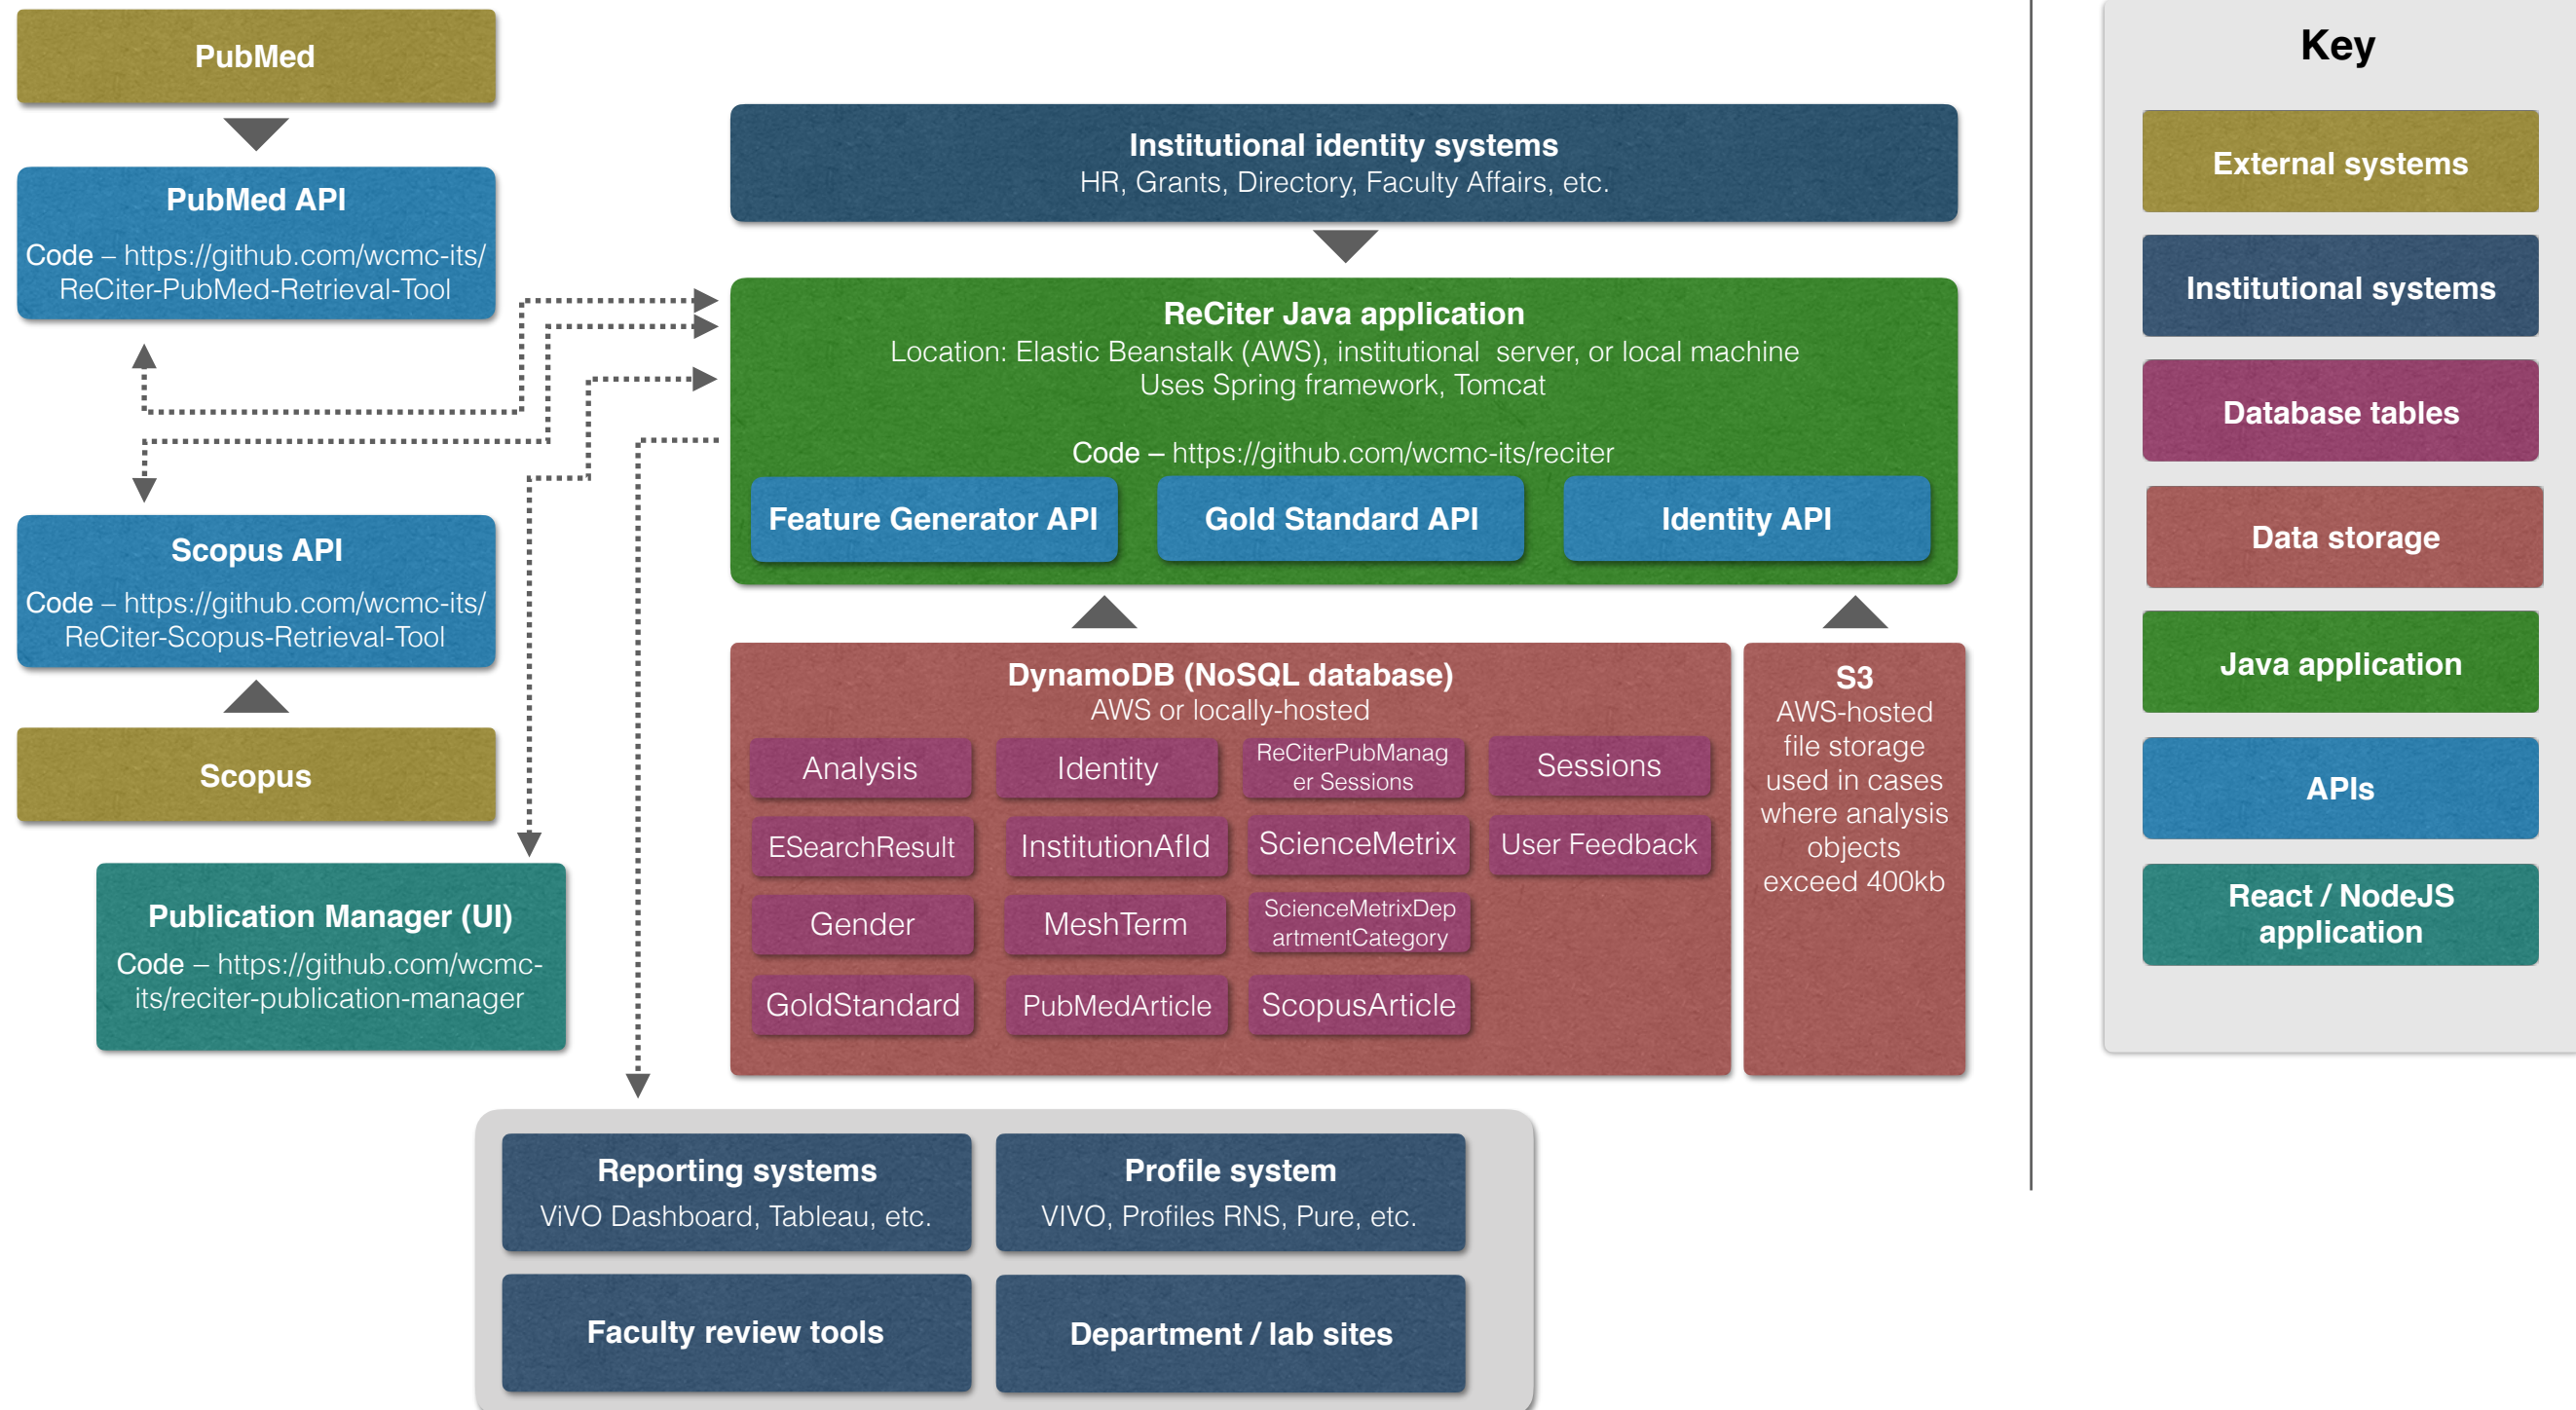

Demonstration!

Components

Component	Function
Harvesting engine	Retrieve and store records by name, identifier, etc. from various sources
Source connectors	Set of functions for transforming and standardizing raw data from a source system
Author disambiguation service	Use what is known about target individuals to compute suggested records associated with them
Citation disambiguation service	Use some combination of identifiers or other logic to prevent the creation of duplicate citations in a single system that exist in multiple source feeds
Curation interface	Improve metadata as needed
Author feedback interface	User interface for collecting feedback from target individuals or administrators

What is next? (cont'd)

- Work on UI
 - Manually add/edit pubs
 - Better search for individuals
 - Bulk review of suggestions
 - Reporting view / migrate VIVO Dashboard to AWS(?)
- Manage data from multiple bibliographic sources
- Build additional connectors and improve the ease of adding additional connectors (WorldCat, Web of Science, Microsoft Academic, ORCiD, CrossRef, Dimensions, etc.)
- Use machine learning for clustering
- Write a scholarly paper
- Get a grant to further develop and increase adoption
