

# What Does Research Look Like Based on REF 2021 UoAs?

External (left) and internal (right) collaboration patterns are presented here. Researchers are coloured by the Unit of Assessment (UoA) that they most commonly publish in, and sized by total number of publications that they have published (relative to the network). To create the networks, publications published in the current REF 2021 time frame between January 2014 and September 2019 were analysed. UoAs cover 34 disciplinary areas defined for REF 2021

## Unit of Assessment

<b>A</b>	Physics	Law	English Language & Literature
Clinical Medicine	Mathematical Sciences	Politics & International Studies	History
Public Health, Health Services & PrimaryCare	Computer Science & Informatics	Social Work & Social Policy	Classics
