why share data?

- it's part of good data practice
- cut down on academic fraud
- validate results
- encourages reuse
- a citation advantage

"It was *never* acceptable to publish papers without making data available."

The screenshot shows the Nature website interface. The main article is titled "Report finds massive fraud at Dutch universities" by Eben Callaway. It discusses an investigation into Dutch psychologist Diederik Stapel, who was found to have fabricated data in several papers. The article includes a photo of Stapel and mentions his work at Tilburg University. The website layout includes navigation tabs like "nature news home", "news archive", "specials", "opinion", "features", "news blog", and "nature journal". There are also sections for "Related stories", "Naturejobs", "Resources", and "external links".

who we are

figshare is a repository where users can make all of their research outputs available in a **citable**, **shareable**, and **discoverable** manner

The value of a DOI and an open platform for sharing data

Tom Whyntie, Queen Mary University of London

I am a particle physicist. I did my PhD on the Large Hadron Collider's search for dark matter, which we didn't find, but we still haven't, so that's fine.

even if you get past those things, you have issues with data access, data storage, and data management. And so, the reason I personally find figshare

Open Access funder compliance

The screenshot shows a Figshare poster titled "101 INNOVATIONS IN SCHOLARLY COMMUNICATION: THE CHANGING RESEARCH WORKFLOW" by Jeroen Bosman and Bianca Kramer. The poster features a central circular diagram with six segments representing research workflow phases: Assessment, Discovery, Analysis, Writing, Publication, and Outreach. Each segment is filled with various icons representing different tools and sites. To the right of the diagram, there are tables listing "Most important developments in 6 research workflow phases" and "Typical workflow examples". The Figshare interface below the poster shows the title "101 Innovations in Scholarly Communication - the Changing Research Workflow", the date "09.01.2015", and the authors "Bianca Kramer, Jeroen Bosman". It also displays "22528 views" and "3637 downloads". The poster is categorized under "Library and Information Studies" and has keywords "research workflow", "innovation", and "tools".

Abstract

Near-perfect adherence to antiretroviral therapy (ART) is required to achieve the best possible prevention and treatment outcomes. Yet, there have been particular concerns about the challenges of adherence among patients living in resource-limited settings in sub-Saharan Africa. The primary objective of this study was to explore adherence in a low-resourced, rural community of high HIV prevalence in South Africa and to identify specific individual and structural factors that can either challenge or support adherence in this context. We applied digital stories as a qualitative research tool to gain insights into personal contexts of HIV and ART adherence. Through an inductive thematic analysis of twenty story texts, soundtracks and drawings, we explored experiences, understandings, and contexts of the participants and identified potential barriers and facilitators for those on lifelong treatment. We found that many of the stories reflected a growing confidence in the effectiveness of ART, which should be viewed as a key facilitator to successful adherence since this attitude can promote disclosure and boost access to social support. Nevertheless, stories also highlighted the complexity of the issues that individuals and households face as they deal with HIV and ART in this setting and it is clear that an understanding of local realities is essential to ensure that this discourse

My research focuses on understanding how language and the societies can be interconnected, especially those that occur in Arabic in Indonesia's scope. I'm also passionate about educational technology, particularly on mobile learning. I've put together all my activities on this website to highlight my research and publication interests. If you're interested in my research, please feel free to get in touch. I'm always interested in collaborations and future funding opportunities. You can find me on <http://www.erickunto.com>

Q & A

- Mohon bimbingannya cara bagaimana mempublikasikan artikel jurnal ilmiah di figshare
- Apakah tidak beresiko untuk mengunggah data penelitian?
- Apakah manfaat dari program ini?
- Apakah plagiasi adalah sebuah kejahatan?
- Apakah dengan data yang sama diperbolehkan dianalisis dengan metode dan teori yg berbeda? Lalu, bagaimana dengan cek similaritasnya?
- Apakah sama FigShare dengan media lainnya? seperti ORCID, GS, dll??
- Apakah dengan mengunggah data penelitian kita, dapat menjadi salah satu jalan menghindari plagiarisme?
- How to protect our shared data?
- Apakah metode ini aman?
- FigShare ini bersifat free atau berbayar?

Thank you for your time

and let's keep in touch...
