Securely store all your research on Figshare

while making it discoverable and citable

• Showcase your papers, supplementary materials, and data in a single online collection with a citable DOI or handle.

• Measure the impact and reuse of your research through citation trackers and views, downloads and Altmetric data.
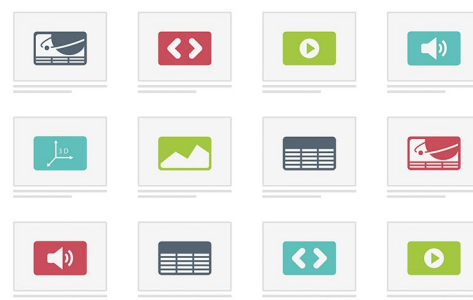

Secure

Figshare is a cloud-based system for storing all your research from papers to supplementary material. Anything stored on Figshare is accessible anytime and anywhere.

Discoverable

Content stored on Figshare is discoverable on search engines including Google Scholar and Google Dataset Search.

Citable

Public content is assigned a Digital Object Identifier (DOI) or a handle for citing. Keep track of where your research has been cited alongside other usage statistics.

Figshare accepts any file type and previews most in the browser

Store and share your papers, spreadsheet data, images, media, code, posters, reproducibility documentation, such as readme files, and more...

For more information about storing your supplementary material and making it discoverable and citable, contact your institution's Figshare administrator.
