
Gene Function Classification (GO)
Number of genes
29
288
2879
28794
biological adhesion
biological regulation
cellular component organization or biogenesis
cellular process
developmental process
growth
immune system process
localization
locomotion
metabolic process
multicellular organismal process
multi−organism process
negative regulation of biological process
positive regulation of biological process
regulation of biological process
reproduction
reproductive process
response to stimulus
signaling
single−organism process
cell
cell junction
cell part
extracellular matrix
extracellular matrix part
extracellular region
extracellular region part
macromolecular complex
membrane
membrane−enclosed lumen
membrane part
organelle
organelle part
symplast
virion
virion part
antioxidant activity
binding
catalytic activity
channel regulator activity
enzyme regulator activity
guanyl−nucleotide exchange factor activity
molecular transducer activity
nucleic acid binding transcription factor activity
protein binding transcription factor activity
receptor activity
structural molecule activity
transporter activity
Biological Process
Cellular Component
Molecular Function
