

## Erratum

---

In the original article by He et al. entitled “Roles of  $1,25(\text{OH})_2\text{D}_3$  and Vitamin D Receptor in the Pathogenesis of Rheumatoid Arthritis and Systemic Lupus Erythematosus by Regulating the Activation of  $\text{CD4}^+$  T Cells and the  $\text{PKC}\delta/\text{ERK}$  Signaling Pathway” [Cell Physiol Biochem 2016;40:743-756 (DOI: 10.1159/000453135)] is necessary for authors to add the funding:

“This study was supported by a grant from National Natural Science Foundation of China (No. 81560275), Social Development Science and Technology Special Project of Hainan Province (No. 2015SF39) and Association for Science and Technology Youth Science and Technology Academic Excellence Innovation Project of Hainan Province (No. 201515).”

The authors terribly apologized for this carelessness.
