

figshare for institutions

figshare is a web based platform to help academic institutions manage, disseminate and measure the public impact of all their research outputs

Our light-touch and user-friendly approach focuses on 4 key areas:

- Research data management
- Reporting and statistics
- Research data dissemination
- User group administration

figshare for institutions

Reporting and statistics

Plan your institutional data management strategy based on real data about system usage, data types and attention levels

✓ Show the attention gained by your data

Choose to share your attention statistics publicly: views, shares, downloads and altmetrics can all be part of your institution's profile on figshare.com.

✓ Manage your research data

View workflow statuses, quota thresholds and usage statistics at any level of your institution in a simple and intuitive interface.

✓ Mobilize your data

Use our powerful API to access and reuse: size, attention and collaboration data in other systems in your institution.

✓ Gain insight

Understand how much data your institution produces, in which fields and of what type. Explore your collaborative data-based relationships.

figshare is already the best tool to store, share or discover research data. Please get in touch to tell us how we can make it even better for you or to arrange a demo.

Research data management

Full control of your institution's research outputs with private storage, public storage and collaborative spaces

✓ **Integrate with your systems**

Easy integration with Shibboleth or LDAP makes logging in simple. figshare works with major CRIS providers to ensure a joined up experience for researchers. A user-friendly web-based interface as well as desktop software to handle file uploads intuitively.

✓ **Visibility**

Monitor your live projects and be aware of new comments, file uploads and new versions.

✓ **Metadata management**

Extend figshare's metadata requirements to meet institutional, departmental, lab-based or personal needs: Include provenance data; customize metadata structure.

✓ **Collaboration**

Share files securely and easily with colleagues around the world. Collaborate with colleagues in any institution.

figshare for institutions

Research data dissemination

Showcase your institution's research with a customizable portal of all public research outputs

✓ Maximize the discoverability of your research

Centralize all your research outputs and make them citable, sharable and discoverable on figshare. We offer custom look and feel to your institutional portal on figshare, custom URLs and DOIs that include your institution's brand through DataCite.

✓ Control access when you need

Embargo files and handle metadata-only records for files that cannot be released due to commercial or ethical sensitivities. If you can't share your content openly, figshare supports request workflows and attention statistics.

✓ Attention statistics

Measure the number of views, shares and downloads for every research output. Filter reports based on popularity, categories, departments and type of research.

✓ Reusing data seamlessly

Integrate all research outputs and associated metadata into existing search systems and pull content into institutional repositories from our API.

User group administration

Manage the curation of files to be made public,
control quotas and administer rights

✓ Manage your space

Whether hosted on your own storage infrastructure or the figshare cloud, figshare allows administrators to manage and report on quotas and disk usage at a fine-grained level throughout your institution.

✓ Preserve your data for the future

figshare hosts a multiple mirrored solution giving you confidence that your data will be there when you need. figshare is compliant with funder mandates around preservation.

✓ Choose custom metadata schemas and licensing

Extend figshare's metadata schema to meet your institutional requirements. While figshare encourages CC0 and CC-BY licenses, institutions can nominate to have a wider range of licenses available to their academics.

✓ Assure your output meets your standards

All files are subject to an approval workflow before they are published on your institutional portal on figshare, assuring that your research is presented in the best possible way.
