

SUPPLEMENTAL DATA

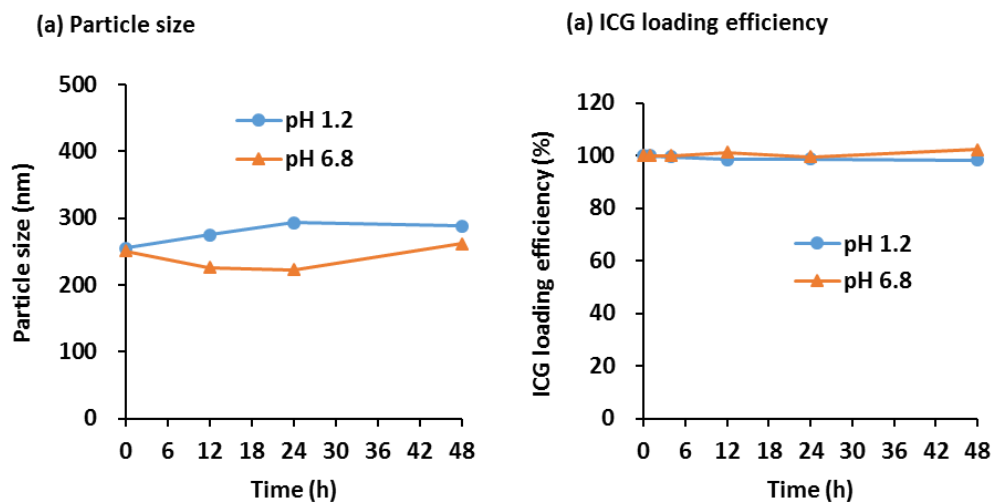

Figure S1. Effect of incubation time and different pH values (1.2 and 6.8) of dispersion mediums in the stability of ICG-loaded SUVs (n=1). (a) Particle sizes and (b) ICG-loading efficiency of SUVs.

(a) Fasted for 24 h

(b) Given Food

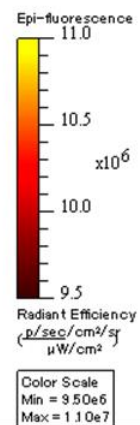

Figure S2. Effect of regular rodent food on IVIS imaging. Before image capture, the rats were fasted for 24 h (a), or given food (b).
